

DRAWER

The Drawer unit provides unsurpassed floor space efficiency – up to 180 different SKUs can be independently managed in a 30" x 20" footprint. The modular Drawer unit can operate as a standalone machine or combined with other units to provide the best vending solution for your specific needs.

This solution's multi-drawer, configurable design features progressively opening drawers, set up in pods that can be configured in a variety of formats for managing all item types – anything from small carbide inserts to welding gloves. Progressive drawer technology opens a drawer just enough to dispense the needed quantity, so items can be released in less than package quantities without the need for repackaging and without dropping tools. All while providing absolute security over your items.

Ideal for

High value production needs offering high storage capacity with minimal footprints: holds twice the number of SKUs in half the space of a coil machine.

Features

- Multi-drawer design:
 - Configures to your inventory
 - Promotes security, accountability and traceability
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Reporting package
- Easily expandable with most MSC vending units while retaining single point of control

Specifications

Overall Dimensions

30.25"W x 20.5"D x 78.75"H (250 lbs.)
