CHOOSE THE RIGHT WIPER!

Did You Know **Rental Shop Towels** Can Pose **Certain Risks?**

Residual Oils, Grease and Often Heavy Metals.¹ Contamination or Damage of Wiping Surfaces.

Confusing Pricing Practices...Often Meaning Higher Costs. Potential for Lead Present at Concentrations Resulting in Daily Exposure Levels Higher than Regulated Under Prop 65.¹

Threats to Workplace Safety

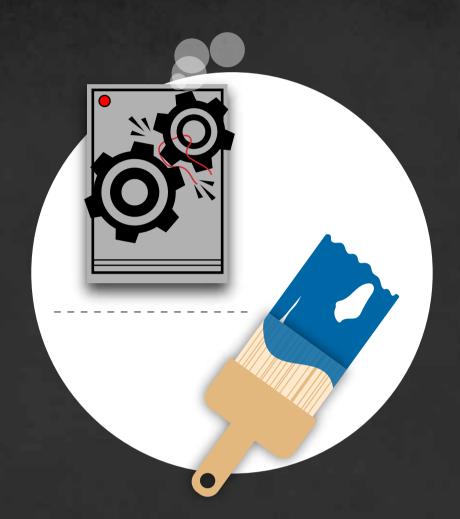

Metals, such as lead, can be accidentally ingested when transferred from the rental shop towel to workers' hands and then to the mouth.¹

Residual oils, greases and heavy metals can **endanger employee health.**¹ Metal shavings from lathing operations can injure faces and hands, **which could result in lost work time.**

Lack of Efficiency

Residual oils and chemicals can reduce absorption, cause streaks and smears, inhibit adhesion of parts and interfere with electrical connections.

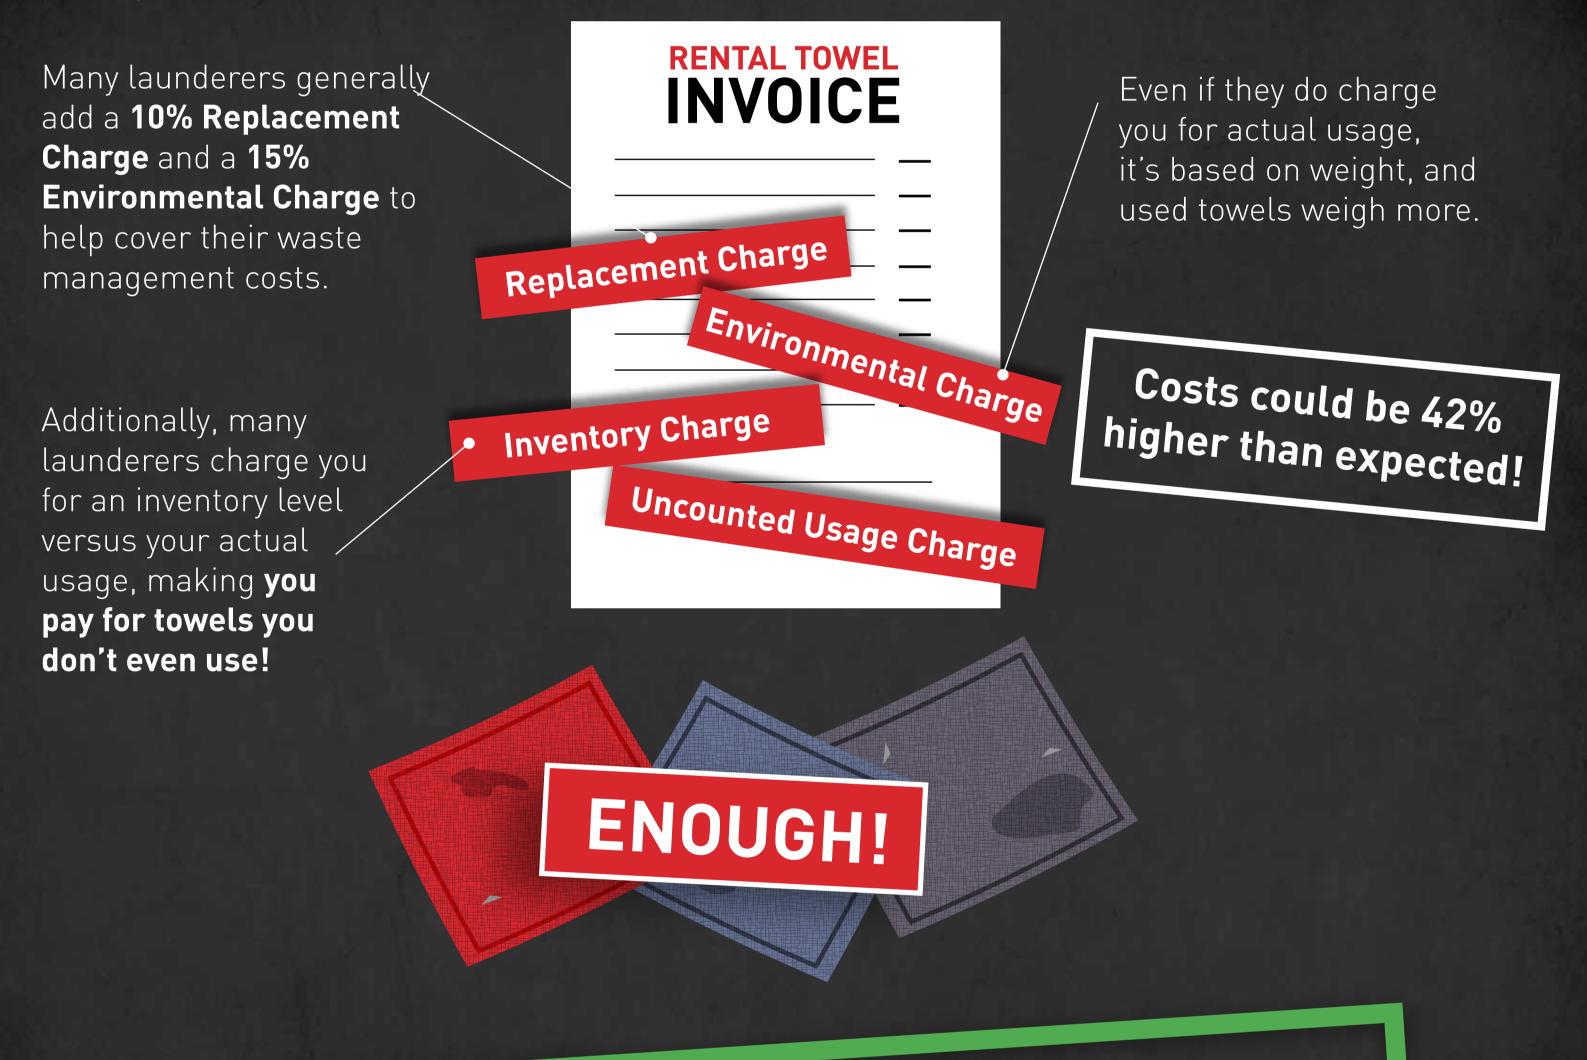

Loose threads and lint can get caught in machinery and snag on edges and protrusions. Residues in towels used to clean walls before painting can affect the paint finish.

Shop towels lying around can create a **messy** work environment. Additionally, having to grab new towels from a faraway bin can add **lost hours over the course** of a year.

The Hidden Fees

Since GP Flax Wipers are disposable, no water is used to launder them. Laundered shop towels require, on average, between 0.5 and 2.5 gallons of water each for laundering over their lifespan (average of 12 laundry cycles).³

Is There Something Better?

Introducing Brawny®Professional FLAX Cloths!

FLAX 900

FLAX 800
