Now a **GLOBAL LEADER**

CRC is a leading global manufacturer of specialty products and formulations for maintenance and repair professionals and do-it-yourselfers, serving the industrial, electrical, automotive, marine, heavy truck, hardware and aviation markets.

CRC has a rich history of innovation, driven by a core focus on identifying unmet needs in the marketplace and providing differentiated solutions for its customers. CRC has been first-to-market with many industry-leading products such as CRC Bräkleen[®], the #1 selling brake parts cleaner worldwide. That passion for innovation continues today as the company creates high quality formulations that are custom-matched to specific application needs while keeping the health and safety of the user at the forefront in a highly-regulated environment.

CRC is the only company to offer the S.D.[L.][®] (Safety Data Label) – a Safety Data Sheet printed on the reverse side of the product label, keeping critical safety information at the fingertips of the user.

As an ISO (International Organization for Standardization) 9001:2015 certified manufacturer, CRC places strict controls on every step of the product development and manufacturing process; starting with the finest raw materials and continuing with consistent, quality manufacturing techniques. The benefits of achieving and maintaining ISO 9001:2015 certification reach CRC customers through the consistent conformity of its products and services, and the assurance of superior quality, environmental responsibility, safety and reliability.

CONTACT CLEANER 2000®

Precision Cleaner

An aggressive general purpose precision cleaner that effectively removes dirt, light oils and other contaminants. It evaporates quickly, leaves no residue and has no flash point. Not recommended for use on Noryl® or polycarbonate type plastics.

Part#	Item#	Case/Order#	Size	Units/cs
03150 ¹	1003419	1003418	16 oz aerosol	12
03153 ¹	1003423	1003423	55 gal drum	1

PF PRECISION CLEANER

Innovative contact cleaner that offers strong cleaning action, fast evaporation and no residue. PF Precision Cleaner has no flash point and is safe to use on plastics.

Part#	Item#	Case/Order#	Size	Units/cs
03190 ¹	1003447	1003446	16 oz aerosol	12

NT™ PRECISION CLEANER

Patented formula NT™ Precision Cleaner effectively removes dirt, light oils and other contaminants from electronic equipment. It evaporates quickly and leaves no residue. NT™ Precision Cleaner has no flash point and is an optimal alternative to HCFC 141b-based cleaners when sensitive plastics are not a concern.

Part#	Item#	Case/Order#	Size	Units/cs
03205 ¹	1003461	1003460	16 oz aerosol	12

ELECTRONIC COMPONENT CLEANER

Precision Cleaner

Aggressive cleaner for use on electronic components in industrial, electrical, and aviation applications. Its high purity, fast penetrating formula aggressively dissolves dust, lint, dirt, oils, polar soils, and other contaminants from most non-plastic surfaces. It evaporates very rapidly and leaves no residue.

Part#	Item#	Case/Order#	Size	Units/cs
03200 ¹	1003455	1003454	16 oz aerosol	12

XT-2000™ PRECISION CLEANER

A non-flammable, low odor and rapidly evaporating precision cleaner for use in electrical and industrial applications. Effectively removes dirt, light oils and other contaminants from electronic equipment.

Part#	Item#	Case/Order#	Size	Units/cs
03155 ¹	1003425	1003424	16 oz aerosol	12

QD® CONTACT CLEANER

A petroleum distillate and alcohol blended precision cleaner suitable for cleaning sensitive electronics. Evaporates quickly, leaves no residue and is safe to use on all plastics.

CONTACT CLEANER

Advanced Technology Formula Contact Cleaner does not contain known ozone depleting substances or VOCs. It provides an optimal alternative to CFC, HCFC, and flammable contact cleaners. Regular use will help prevent electrical failure, increase performance and prolong equipment life. Contact Cleaner will not damage sensitive modern plastics such as Noryl®, ABS and Lexan®.

Part#	Item#	Case/Order#	Size	Units/cs
03070 ¹	1003333	1003332	16 oz aerosol	12

CE™ PRECISION CLEANER

Azeotropic blend designed specifically for dissolving and flushing away carbon dust, polar soils, mineral oils and non-polar soils found in elevator rooms and vertical lifts. CE™ Precision Cleaner has a controlled evaporation rate, providing sufficient dwell time to dissolve and flush dirt from surfaces before evaporating without leaving a residue.

ISOPROPYL ALCOHOL Precision Cleaner

A quick drying light-duty precision cleaner for use in electronic and aviation applications. Its 99% pure formula aggressively dissolves grease, dust, dirt, lint, oils and flux.

Part#	Item#	Case/Order#	Size	Units/cs
03201	1003457	1003456	16 oz aerosol	12

DUSTER™ Aerosol Dust Removal System

Safely removes dust from energized equipment without damaging sensitive components or surface finish. Penetrates into cracks and crevices to remove contaminants that normal hand dusting cannot reach. It delivers a powerful blast of product to remove embedded debris. The extension tube can be used for more precise delivery. Energized equipment use only. Non-flammable and plastic safe.

Part#	Item#	Case/Order#	Size	Units/cs
14085	1004818	1004817	12 oz aerosol trigger	12

HF™ CONTACT CLEANER

Petroleum distillate-based precision cleaner that offers the safety of a high flash point without leaving a residue. It may be used on most plastic materials.

DUSTER™ Moisture-Free Dust & Lint Remover

Effectively removes dirt, dust, lint and other contaminants with a dry blast of air. Safely eliminates debris from sensitive electronics, appliances and equipment.

Part#	Item#	Case/Order#	Size	Units/cs
05185	1003746	1003744	16 oz aerosol trigger	12

CONTACT CLEANER & PROTECTANT

High purity precision cleaner that helps make equipment perform like new. Penetrates surface pores, cleans away contaminants and leaves a fine microscopic corrosion resistant film.

Part#	Item#	Case/Order#	Size	Units/cs
03140*	1003417	1003416	16 oz aerosol	12

FREEZE SPRAY

Aerosol coolant system that instantly freezes surfaces to -60°F, dissipating heat and cooling equipment. Freeze Spray also assists in locating thermal intermittent components, failures and shorts. Safe to use on sensitive components and all surface finishes. Freeze Spray comes with an extension tube for precise application of the product.

Part#	Item#	Case/Order#	Size	Units/cs
14086	1004820	1004819	12 oz aerosol trigger	12

FOOD GRADE CONTACT CLEANER

Contact cleaner suitable for cleaning sensitive electronics. Evaporates quickly, leaves no residue and is safe to use on all plastics. NSF P1 Registered for use in meat and poultry plants.

A STRONGER, SAFER, SMARTER PARTS WASHING SYSTEM

The CRC SmartWasher® is a bioremediating parts washing system designed to clean dirty equipment parts during repair and maintenance operations. The system combines 3 essential components – the SmartWasher® parts washer, the OzzyJuice® cleaning fluid, and the OzzyMat® filter that contains a proprietary blend of microbes.

The SmartWasher® heats and circulates the OzzyJuice® and the OzzyJuice® cleans the parts. The OzzyMat® releases the microbes into the cleaning fluid to break down and eat oil, grease and carbon-based contaminants, creating a self-cleaning system that does not generate hazardous waste.

The SmartWasher® system harnesses the power of nature to deliver exceptional cleaning performance while also eliminating the need to handle or dispose of hazardous waste, making it a safer choice over manual solvent or aqueous-based parts washers.

WHAT IS BIOREMEDIATION?

Bioremediation is the use of microbes to break down and “eat” oil, grease, and carbon-based contaminants. This proven biotechnology is used to assist in the clean-up of wastewater treatment ponds and lagoons in petroleum refineries and industrial manufacturing facilities all around the world.

INDUSTRIAL CLEANERS

SMARTWASHER®

Oil contaminants enter the solution as parts are washed.

Surfactant in OzzyJuice® solution emulsifies the oils.

Emulsified oil is eaten by the Ozzy® microbes.

Oil is converted into water and carbon dioxide.

CERTIFICATION & APPROVALS

The SmartWasher® system is a safe and highly-effective alternative to manual solvent and aqueous-based parts washers. It is eco-friendly and makes operations better and safer for the user and the environment. All OzzyJuice® solutions used in the SmartWasher® are non-hazardous, non-corrosive, pH-neutral, non-flammable, non-toxic and non-caustic. When used in accordance with directions, the SmartWasher® system does not generate hazardous waste or potential for cradle to grave legal liability.

Clean Air Solvent Certificate

OzzyJuice® products certified “Clean Air Products” by SCAQMD (South Coast Air Quality Management District) include SW-1, SW-3, SW-4, SW-6, SW-7, SW-8 and SW-LF.

Meets US EPA Safer Product Standards

OzzyJuice® SW-4 and OzzyBooster® Microbial Enhancer have been awarded the SAFER CHOICE label and seal of approval by the EPA.

NSF Registered Products

All OzzyJuice® formulas are registered A1 for use in food manufacturing facilities.

FL-4 OZZYMAT® MULTI-LAYER FLUID ACTIVATION MAT

Designed for applications with normal to heavy usage, the FL-4 Multi-Layer OzzyMat® has (4) white layers and (1) blue layer. The white layers on the mat trap any particulate larger than 50 microns and should be peeled away once a week for optimum performance. The blue layer is the support structure that contains the microbes (Ozzy®) and delivers them into the system. These microbes (Ozzy®) migrate from the OzzyMat® into the OzzyJuice®, located in the SmartWasher® tank, and break down oil and grease.

PENETRATING

KNOCK'ER LOOSE®

Penetrating Solvent

An industrial strength lubricant and penetrant designed to quickly loosen and free seized, bound or frozen fasteners. It quickly dissolves rust, scale, gum, grease and corrosion with a formula that creeps into cracks, seams, threads and joints better than the competition. Eases the disassembly of machinery, tools and equipment for routine maintenance and emergency repairs.

TECHNICAL GRADE 3-36®

Multi-Purpose Precision Lubricant

Multi-purpose, plastic safe lubricant, penetrant and corrosion inhibitor that helps prevent electrical malfunctions caused by water penetration, humidity, condensation or corrosion. It drives out moisture and leaves a thin, long lasting film to protect against corrosion. Excellent for use around modern plastics and insulators.

Part#	Item#	Case/Order#	Size	Units/cs
03003	1003251	1003250	16 oz aerosol	12

INDUSTRIAL SILICONE

Multi-purpose silicone spray for industrial applications. It forms a colorless, odorless, non-staining film that lubricates and protects in most metal to non-metal applications. Silicone film eliminates binding and sticking, while protecting surfaces.

Part#	Item#	Case/Order#	Size	Units/cs
03032	1003287	1003286	16 oz aerosol	12

DRY PTFE LUBE

A multi-purpose, micro-thin film containing PTFE. Dry PTFE Lube penetrates and bonds to most surfaces including metal, wood, rubber, plastic and glass. It forms a micro-thin film that prevents sticking, reducing friction and wear.

Part#	Item#	Case/Order#	Size	Units/cs
03044	1003302	1003301	16 oz aerosol	12

ROLL-UP DOOR LUBRICANT

Superior lubricant that prevents friction and wear on all roll-up and overhead door assemblies. Its unique viscosity allows it to cover more surface area and penetrate deep into the surface of all metal components found in roll-up and overhead doors. Roll-Up Door Lubricant displaces moisture and leaves a thin, long-lasting film to protect against rust and corrosion.

POWER LUBE®

High-Performance Lubricant w/PTFE

High performance, multi-purpose lubricant with the benefits of PTFE to provide long lasting lubrication and protection against friction, wear and corrosion. Will increase the life and operating efficiency of parts and equipment, as well as withstand extreme load carrying situations. Up to 4500 lbs in Falex test.

SYNTHA-TECH™ LUBRICANT WITH PTFE

A zero VOC[∞], unique blend of synthetic lubricants that utilizes PTFE, anti-wear and extreme pressure additives to increase equipment life and performance. This food grade synthetic lubricant is NSF H1 Registered for use in meat and poultry facilities. Additionally, its long lasting film minimizes surface contact thereby extending lubricating intervals.

FOOD GRADE CHAIN LUBE

A special blend of synthetic lubricants and mineral oil, designed to keep roller drive and conveyor chains lubricated. It is specifically designed to provide the convenience of aerosol application where incidental food contact may occur. Food Grade Chain Lube penetrates, lubricates and protects moving parts by reducing friction and wear.

Part#	Item#	Case/Order#	Size	Units/cs
03055	1003313	1003312	16 oz aerosol w/Perma-Lock®	12

FOOD GRADE BELT DRESSING

Provides a temporary, food grade, synthetic treatment for worn belts. Extends belt life by reducing slippage, hardening, glazing, dirt build-up and friction. Belt Dressing can be used on leather, rubber, canvas or fabric, and is ideally suited for flat, round and V-belts. Improves traction and reduces belt tension, relieving stress on motors, shafts and wheels for improved operating efficiency.

DRY GRAPHITE LUBE

A dry film lubricant that is ideal for applications where petroleum products must be avoided. Dry Graphite Lube bonds instantly to metal, rubber, plastic and most substrates to form a dirt repelling barrier that lubricates and protects the surface from pressure and friction. Withstands temperatures up to 850°F and extreme pressures, as well as water and chemical attack.

NOZZLE CLEANERS AND PROTECTANTS

NOZZLE-KLEEN #2®

High quality aerosol anti-spatter for most applications. Paintable, non-flammable and contains no fluorocarbons.

Part#	Item#	Case/Order#	Size	Units/cs
007022 ¹	1008283	1008203	16 oz aerosol	6

NOZZLE-KLEEN HD®

Used for high temperature applications, including pulsed welding and argon-rich mixtures. Outstanding fixture protection. Excellent for stainless steel. Paintable, non-flammable and contains no fluorocarbons.

Part#	Item#	Case/Order#	Size	Units/cs
007020 ¹	1008282	1008202	16 oz aerosol	6

NOZZLE-KLEEN® 107A

A convenient quick-drying aerosol that contains no methylene chloride. 107A allows for pre-heat, higher duty cycles, and higher temperature applications. Excellent for fixture and tooling protection. Paintable, non-flammable and contains no fluorocarbons.

Part#	Item#	Case/Order#	Size	Units/cs
YOR-107-A	1008304	1008225	20 oz aerosol	12

NOZZLE-DIP HD®

A leading water-based gel reduces spatter buildup on nozzles and tips. Excellent cooling properties for longer tip and nozzle life. Can dip hot or cold, gel will not migrate into liner. Non-flashing and paintable.

ANTI-SPATTER

WELD-KLEEN HD®

Heavy duty base metal treatment that is solvent based and quick drying. Accepts pre-heating and is non-flammable.

Part#	Item#	Case/Order#	Size	Units/cs
007030 ¹	1008284	1008204	20 oz aerosol	6

WELD-KLEEN 350®

An effective water-based product designed for use on most base metal applications. Environmentally friendly anti-spatter with superior performance over other water-based anti-spatters. Ideal for protecting parts, clamps, tooling and fixtures. Non-hazardous, non-flammable and paintable.

Part#	Item#	Case/Order#	Size	Units/cs

WIRE CLEANERS AND LUBRICANTS

LUBE-MATIC® LUBE PADS

For all types of steel wire including solid and fabricated. Each black pad is pre-treated with Lube-Matic® Wire Kleener and Lubricant allowing for smooth feeding of wire with poor cast, poor helix, rust or long feed liners. 6 pads per pack. Not recommended for aluminum.

Part#	Item#	Case/Order#	Size	Units/cs
007060	1008258	1008160	1 pack	6

LUBE-MATIC® LUBE PADS

Red pads clean rust and dirt off wire surface reducing burnbacks by up to 50%. Excellent for all types of welding wire including aluminum. 6 pads per pack.

Part#	Item#	Case/Order#	Size	Units/cs
007061	1008260	1008162	1 pack	6

LUBE-MATIC® COMBO PAK

For maximum torch life and best possible cleaning and lubrication of wires, use both pads together (black and red) for each welding station and every wire change. Pack includes one black and one red pad.

Part#	Item#	Case/Order#	Size	Units/cs
007062	1008262	1008164	1 pack	24

LUBE-MATIC® WIRE KLEENER AND LUBRICANT

Helps feed all mild steel, fabricated, and core wires. Cuts rust and reduces wire drag by 60%. Use to re-lube black pads. Great for longer distance feeds.

CONTACT CLEANER 2000[®] VC Precision Cleaner

Aggressive precision cleaner designed to remove contaminants from electronic equipment. It provides an effective alternative to HCFC 141b-based cleaners when sensitive plastics are not a concern. It is VOC compliant in all 50 states[∞].

Part#	Item#	Case/Order#	Size	Units/cs
02240 ¹	1003249	1003248	16 oz aerosol	12

ELECTRONIC COMPONENT CLEANER Precision Cleaner

Aggressive precision cleaner for use on electronic components in industrial, electrical, and aviation applications. Its high purity, fast penetrating formula aggressively dissolves and rinses away dust, lint, dirt, oils, polar soils, and other contaminants from most non-plastic surfaces. It evaporates rapidly, leaves no residue, and has no flash point.

Part#	Item#	Case/Order#	Size	Units/cs
02200 ¹	1003243	1003242	16 oz aerosol	12

XT-2000[™] PRECISION CLEANER

A non-flammable, low odor, rapidly evaporating precision cleaner for use in electrical and industrial applications. Effectively removes dirt, light oils and other contaminants from electronic equipment. It is safe on most plastics and has no flash point.

Part#	Item#	Case/Order#	Size	Units/cs

DUSTER™

Aerosol Dust Removal System

Safely removes dirt and dust from energized equipment without damaging sensitive components or surface finish. Penetrates into cracks and crevices to remove contaminants that normal hand dusting cannot reach. It delivers a powerful blast of product to remove embedded debris. The extension tube can be used for more precise delivery. Energized equipment use only. Non-flammable and plastic safe.

LECTRA CLEAN®

Heavy Duty Electrical Parts Degreaser for Energized Equipment

Quickly and effectively removes grease, oil, tar, dirt, grime, corrosion, sludge and other stubborn substances from energized electrical equipment to increase operating efficiency. Offers quick & efficient degreasing action, fast evaporation and no residue. With no flash point, it is an excellent alternative to 1,1,1-based cleaning products. Use caution near plastics. Designed specifically to be safe for use on energized electrical equipment.

HONING & CUTTING OIL

All-purpose, non-chlorinated, metal cutting/machining oil extends tool life and improves the finish of machined surfaces. It contains extreme pressure, anti-weld, lubricity, wetting agent and anti-corrosion additives to allow higher machine speeds and feed rates. Better Falex values than those produced by Sulfur-Chlorine systems.

RTV SILICONE ADHESIVE/SEALANTS

CRC Room Temperature Vulcanizing (RTV) Adhesive/Sealants are designed for a wide range of sealing, bonding, protecting and waterproofing. They cure at room temperature – no special curing methods required. The chemically stable formulations show little change in physical properties after exposure to rain, snow, temperature extremes and weathering.

- Clear: Forms a barely visible water-tight seal
- White: Designed for high moisture, indoor/outdoor applications
- Blue: Heavy duty industrial gasket sealant
- Red: High temperature, low odor, non-corrosive gasket sealant
- Black: High pressure, low odor, non-corrosive gasket sealant

RTV SILICONE PRESSURIZED TUBES

Revolutionary packaging with Select-a-BEAD® Nozzle – allows user to control bead width. Dispenses a uniform bead for consistent results. Pressurized package keeps silicone fresh so it won't dry out. Self-sealing plug – Simply pull out to re-use the product. VOC compliant.∞

FOAM

Minimal Expansion

Polyurethane foam designed to fill, seal, bond, retrofit, insulate and deaden sound in and around cracks and cavities. It forms a permanent, waterproof and airtight bond to masonry, wood, glass, metal and most plastics. Stops drafts, dust, moisture, insects and rodents. When cured, foam can be sanded, painted or stained. The low expansion formula expands 50% when fully cured. Cured foam insulates to R-5 for each inch of foam. UL® classified as a caulking sealant. Foam is non-flammable. Reusable for up to 30 days after initial use.

TESTING

SMOKE TEST®

Smoke Detector Tester

Convenient, easy and safe product to test the functional ability of a smoke detector. Checks for obstructions or debris, which clog detector vents and prevents smoke from properly entering the sensing chamber. Simulates smoke to provide a true, functional test for smoke detectors. Aerosol spray extends user reach up to 6', allows testing to be done while standing safely on the floor. No harmful residue, plastic safe, non-staining. UL® Listed.

AEROSOL LEAK DETECTOR

Formulated for the quick and easy site detection of gas leaks and air leaks. Reliably locates gas leaks and pressure losses in pipes and pressurized systems by forming highly visible bubbles when applied over any leak. The water-based formula contains no oils, silicones or harmful solvents. Highlights all leaks, even under low pressure. Non-flammable aerosol package enables fast and easy application with no waste or spillage. No odor. NSF P1 Registered.

GENERAL PURPOSE SILICONE MOLD RELEASE

A general purpose mold release used for a variety of applications including injection molding, compression molding, blow molding, and extruding. Provides fast and easy part removal from molds. Medium duty silicone content 3.5%. Ideal for use on cold and hot metals.

Part#	Item#	Case/Order#	Size	Units/cs
03300	1003488	1003487	16 oz aerosol	12

LECITHIN MOLD RELEASE

Non-silicone mold release helps assure multiple releases and will not interfere with parts to be painted, bonded, heat sealed or laminated. Lecithin Mold Release imparts a smooth dry, non-toxic film. No special cleaning required before part decoration.

Part#	Item#	Case/Order#	Size	Units/cs
03306	1003494	1003493	16 oz aerosol	12

FOOD GRADE SILICONE MOLD RELEASE

Formulated to be used for light duty applications. Contains the same high-quality ingredients as our General Purpose Silicone Mold Release. Light duty silicone content 3%. NSF M1 Registered.

Part#	Item#	Case/Order#	Size	Units/cs
03301	1003490	1003489	16 oz aerosol	12

BORON NITRIDE MOLD RELEASE

Ideal when working with the latest high temperature resins. It is also an excellent release for die-casting of low melting point metals such as lead, zinc and aluminum. Forms a non-reacting layer with molten metals, salts, fluxes and slags. High electrical resistance and thermal conductivity.

Part#	Item#	Case/Order#	Size	Units/cs
03310*	1003496	1003495	16 oz aerosol	12

HEAVY DUTY SILICONE MOLD RELEASE

Superior lubrication that provides maximum releases. Formulated for difficult to remove molded parts. Heavy duty silicone content 5%. Helps avoid molding material build-up.

WASP & HORNET KILLER PLUS™

Insecticide

Fast acting, high strength insecticide that knocks down and kills wasps, hornets, fire ants, black widow spiders and scorpions on contact. Contains no chlorinated solvents. Safe on most plastics. CRC trigger provides a dense, accurate spray that will reach up to 20 feet to drench harmful insects and their nests. High dielectric strength of 47,600 volts. Extension tube doubles as a locking mechanism.

Part#	Item#	Case/Order#	Size	Units/cs
14010	1004768	1004767	20 oz aerosol trigger	12

FR (FLAME RESISTANT) CLOTHING INSECT REPELLENT

Repellent for the treatment of flame resistant clothing. Provides a protective barrier against mosquitoes, gnats, chiggers, ticks, biting flies and other flying insects. Contains Permethrin which is a contact insecticide that not only repels but also kills insects. It will not damage or negatively affect the protection properties of flame resistant clothing. Binds to fabric and protects up to two weeks, even through washing. Convenient aerosol package provides easy and controlled application of product. Conforms to ASTM F2621-06 Standard Practice for Determining Response Characteristics and Design Integrity of Arc Rated Finished Products in Electric Arc Exposure. Non-flammable, non-DEET formula is safe for clothing. Do not apply to skin.

14036	1004778	1004777	8 oz aerosol	12

BEE BLAST®

with Residual Wasp & Hornet Killer

Fast-acting, high strength insecticide that instantly soaks harmful insects and their nests with a high output 20' jet blast. Bee Blast® contains no chlorinated solvents and is safe on most plastics. High output 20' jet blast kills wasps, hornets, yellow jackets and bees on contact. Safety Data Label S.D.[L.]® right on the can – a CRC exclusive. High dielectric strength of 47,300 volts. Kills with residual action as wasps and hornets return to nests.

Part#	Item#	Case/Order#	Size	Units/cs
14009	1004766	1004765	20 oz aerosol	12

INSECT REPELLENT

Insect Repellent uses a high strength formula to repel mosquitoes, gnats, chiggers, fleas, ticks, biting flies and other biting insects. Insect Repellent protects outdoor workers by reducing the risk of contracting Lyme Disease from ticks when sprayed on exposed skin and clothing. Convenient aerosol package. Contains 25% active ingredient (DEET). The only insect repellent in the industry with the CRC S.D.[L.]®, a current SDS printed on the reverse side of the product label. Safe on most plastics.

ALL-PURPOSE ENAMEL SPRAY PAINT

Remarkably versatile, general purpose, quick-dry, non-fading coating for use in exterior and interior applications. Recommended for general use in every day factory and contractor applications.

The only paint in the industry with the CRC S.D.[L.][®], a current SDS printed on the reverse side of the product label. Resistant to heat up to 180°F (82°C). Dries tack free in 30 minutes and fully dry in less than 1 hour. Recoat before 1 hour or after 72 hours. Yellows and reds cover 10-12 sq. ft. per can, others cover 16-22 sq. ft. per can. Good resistance to abrasion and corrosion; fair resistance to solvents.

Compliant with state and federal aerosol coatings VOC regulations. Vinyl toluene oil enamel resin system.

RUST PROOF ENAMEL SPRAY PAINT & PRIMER

Rust Proof Enamel is a rust resistant, premium quality alkyd enamel designated for moderate to severe corrosive environments and is specially formulated to resist rusting, peeling and fading. Fights weathering, salt spray and the most severe and demanding industrial conditions.

The only paint in the industry with the CRC S.D.[L.][®], a current SDS printed on the reverse side of the product label. Dries tack free in 15 to 30 minutes and fully in 1 hour, recoat anytime. Resistant to heat up to 300°F (149°C).

Yellows and reds cover 15-18 sq. ft. per can, others cover 22-30 sq. ft. per can. Coverage increases when CRC Rust Proof Enamel Primer is used. Excellent resistance to corrosion and solvents and good resistance to abrasion. CRC Rust Proof Primer seals out moisture and fills hairline cracks and other slight surface imperfections to provide a uniform basecoat for CRC Rust Proof Enamels.

Compliant with state and federal aerosol coatings VOC regulations. Modified chain stop alkyd enamel resin system.

The Occupational Safety and Health Act (OSHA) stipulates that industrial plants provide color coded safety equipment in the workplace. OSHA also requires that hazardous areas be identified with certain colors. CRC provides a range of OSHA colors for the correct application and safety.

UPSIDE DOWN MARKING PAINT

These paints clearly and effectively mark the location of underground utilities and are the professionally preferred markers at construction sites. Colors meet the A.P.W.A One Call International Color Standards. Particularly safe on turf grass, fields and golf courses.

The only paint in the industry with the CRC S.D.[L.][®], a current SDS printed on the reverse side of the product label. One can covers up to 700 linear feet with a 1 to 3 inch bright vivid line width. Lead free formula won't harm grass. Non-clogging nozzle & unique spray head is easy to use, less finger fatigue. Twist cap prevents accidental discharge. Dries fast and tack free in 2 to 5 minutes.

AVIATION XT-2000[™] PRECISION CLEANER

A non-flammable, low odor, rapidly evaporating precision cleaner for use in aviation applications. Effectively removes dirt, light oils and other contaminants from electronic equipment. No flash point. Evaporates rapidly leaving no residue. Chemically stable, non-conductive and non-corrosive. Safe on most plastics. Meets performance requirements of Boeing D6-17487. Approved by Pratt & Whitney for use in SPOP1&6.

AVIATION 3-36[®] Corrosion Inhibitor

Meets MIL-C-81309E, Amendment 3, Type III, Class 1 & 2 – Listed on the Military QPL since 12/1999. This versatile, petroleum-based formula protects all metal surfaces leaving behind a corrosion inhibiting film. The low viscosity allows it to cover a large surface area and penetrate deep into the surface of all metals including steel, copper, brass and aluminum alloys. It displaces and seals out moisture and prevents the return of wear and corrosion. For use in applications that require compliance to MIL-C-81309E.

BIODEGRADABLE

A substance that is capable of being broken down into harmless products by the action of living things. The rate at which compounds may be chemically broken down by bacteria and/or natural environmental factors.

CONSUMER PRODUCTS VOC REGULATIONS

Several states have restrictions on the amount of Volatile Organic Compounds (VOC) that can be present in consumer and institutional use products. VOC limits are set by product category. There are a wide range of regulated categories including cleaners, degreasers, lubricants, adhesives, sealants and automotive cleaners.

DIELECTRIC STRENGTH

The minimum electrical gradient that a material can withstand without decomposition usually specified in volts per millimeter of thickness. Also known as the breakdown voltage.

ELONGATION PERCENT

Directly related to Tensile Strength. Elongation is the deformation that results from the application of a tensile force and is calculated as the change in length divided by the original length.

EMULSION

A mixture of water-soluble and water-insoluble groups held together by a surfactant. Emulsions are usually milky white.

EXTREMELY FLAMMABLE

As defined by the Consumer Products Safety Commission, a substance with a flashpoint at or below 20°F as determined by Tagliabue Closed Cup Tester. Or, for an aerosol, if the flame travels back to the actuator and the flashpoint is at or below 20°F.

FALEX TEST

A method for determining the extreme pressure (EP) or anti-wear properties of oils and greases. Vee blocks (with large "V-shaped notch) are placed on opposite sides of rotating steel shaft, and the apparatus is immersed in the test lubricant. Load is automatically increased until seizure occurs. Measurable wear scars are formed on the blocks.

FERROUS

Metals related to or containing iron.

FLAMMABLE

Capable of catching fire easily and burning rapidly. OSHA defines flammable liquids as having a flashpoint below 100°F.

FLASH POINT

The lowest temperature of a liquid or solid at which it gives off vapors that will ignite but not continue to burn when a small flame is periodically passed over the surface.

GALLING

Destructive wear of a metal surface characterized by large chunks of metal being removed.

KB VALUE

The Kauri Butanol (KB) value is a measure of the solvent power of a hydrocarbon liquid. Kauri gum is readily soluble in butanol but insoluble in hydrocarbons. The KB value is the measure of the volume of solvent required to produce turbidity in a standard solution containing kauri gum dissolved in butanol. The higher the KB value, the more powerful the solvent.

NLGI GRADE

National Lubricating Grease Institute. A numerical scale for classifying the consistency of a particular grease. The most common consistency number is #2. Softer grades, especially #0 and #1, are often used for improved pumpability or low-temperature service. High consistency numbers, #3 through #6 are used for certain high-speed bearings where leakage and sealing are particular concerns.

NSF REGISTRATION

National Sanitation Foundation Registration Program for Proprietary Substances and Nonfood Compounds. This program mirrors the prior USDA program. Product evaluation is based on formulation and label review. Approved products receive a Letter of Authorization and are included on the NSF White Book List of Proprietary Substances and Nonfood Compounds.

NON-FERROUS

Metals that contain no iron.

ODCs

Ozone Depleting Compounds. Substances that contribute to the deterioration of the ozone. There are two types of ODCs: Class I and Class II ozone depleters. Class I ODCs are the most harmful to the ozone. Currently listed as Class I ODCs are chlorofluorocarbons (CFCs), carbon tetrachloride,

and 1,1,1-Trichloroethane. Class II ODCs are less harmful but still pose a threat. Currently listed as Class II ODCs are HCFCs.

PH

A scale ranging from 0 to 14 used to measure acidity and alkalinity. The lower the number the more acidic; the higher the number, the more alkaline; 7 is neutral.

PSI

Pound per Square Inch. A unit of pressure equal to the pressure resulting from a force of 1 pound applied uniformly over an area of 1 square inch.

SAE

Society of Automotive Engineers.

SUBSTRATE

The surface being cleaned; the substrate may be metal, plastic, ceramic, etc.

SURFACTANT

A specialized molecule that connects water soluble and water-insoluble groups.

TENSILE STRENGTH

The strength of different metals to support different loads (masses) before going through the point at which they change from being elastic to being plastic. The tensile strength test measures the elastic and plastic properties of metal.

TIMKEN OK LOAD

The highest load than can be applied without abrasive wear to a rotating test cup containing a grease sample. The higher the OK number, the better protection a grease provides under severe service. The highest number typically given to any sample is 80.

VISCOSITY

The resistance to flow or degree of thickening fluid. Flow requires stress; liquids such as additive-free lubricating oils are known as Newtonian fluids in that shear rate is proportional to the pressure or stress applied. This proportion is the coefficient of viscosity.

VOCS

Volatile Organic Compounds. A class of chemicals that contain carbon and have the potential to form ground-level ozone (smog). Many common items including gasoline, oil-based paints and alcohols produce VOCS.

CATEGORY CODE 3H

This product is acceptable for use as a Release Agent on grills, ovens, loaf pans, boning benches, chopping boards, or other hard surfaces in contact with meat and poultry food products to prevent food from adhering during processing.

CATEGORY CODE A1

This product is acceptable for use as a general cleaning agent on all surfaces, or for use with steam or mechanical cleaning devices in all departments. Before using this compound, food products and packaging materials must be removed from the room or carefully protected. After using this compound, surfaces must be thoroughly rinsed with potable water. Permission for the use of this compound on loading docks and other similar areas is left to the discretion of the Inspector-In-Charge of the establishment.

CATEGORY CODE C1

This product is acceptable for use as a general cleaner/degreaser in inedible product processing areas, and/or exterior areas of official establishments operating under the Federal Meat, Poultry, Shell Egg Grading, and Egg Products Inspection Programs provided that it is not used to mask odors resulting from unsanitary conditions, and that any characteristic odor or fragrance does not penetrate into an edible area. Permission for the use of this compound on loading docks and other similar areas is left to the discretion of the Inspector-In-Charge of the establishment.

CATEGORY CODE C3

The product is acceptable for use in official establishments operating under the Federal Meats and Poultry Products Inspection Program. This compound may be acceptable in areas of food processing facilities where edible products are neither processed nor stored in open containers. This category also covers paint removers and snow and ice melting products intended for use in non-processing areas.

CATEGORY CODE D2

This product is acceptable for use as a sanitizer on all surfaces not always requiring a rinse in and around food processing areas. Before using this compound, food products and packaging materials must be removed from the room or carefully protected. A potable water rinse is not required following the use of this compound on previously cleaned hard surfaces provided that the surfaces are adequately drained before contact with food so that little or no residue remains which can adulterate or have a deleterious effect on edible products. A potable water rinse is required following use of this compound under conditions other than stated above. The compound must always be used according to applicable label directions.

CATEGORY CODE E4

The product is acceptable for use as a hand cream, lotion or cleaner in non-processing areas. The use of such products is limited to toilets, dressing rooms and other non-processing areas. Employees who handle edible products may use such compounds only when leaving the plant.

CATEGORY CODE H1

This product is acceptable as a lubricant with incidental food contact for use in official establishments operating under the Federal Meat and Poultry Products Inspection Program. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is potential exposure of lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance, which could be transferred to food being processed. The final granting of authorization for the proposed use of such compound is the responsibility of the Inspector-In-Charge of the official plant.

CATEGORY CODE H2

This product is acceptable as a lubricant where there is no possibility of food contact in official establishments operating under the Federal Meat and Poultry Products Inspection Program. Such compounds may be used as lubricants, release agents, or anti-rust films on equipment and machine parts or in closed systems (ex. Hydraulic systems) in locations where there is no possibility of the lubricant or lubricated part contacting edible products. The final granting of authorization for the proposed use of such compound is the responsibility of the Inspector-In-Charge of the official plant.

CATEGORY CODE K1

This product is chemically acceptable as a solvent cleaner for use in non-processing areas of official establishments operating under the Federal Meat and Poultry Products Inspection Program. After using the product, equipment and utensils must be thoroughly washed with an acceptable detergent solution and rinsed with potable water to remove all traces of the cleaner before being returned to the processing area. The final granting of authorization for the proposed use of such compounds is the responsibility of the Inspector-In-Charge of the official plant.

CATEGORY CODE K2

This product is chemically acceptable as a solvent for cleaning electronic instruments and devices which will not tolerate aqueous cleaning solutions in official establishments operating under the Federal Meat and Poultry Products Inspection Program. Before using this compound, food products and packaging materials must be removed from the area or carefully protected. This compound must be used in a manner so that all odors associated with the compound are dissipated before food products or packaging material are re-exposed in the area. The final granting of authorization for the proposed use of such compounds is the responsibility of the Inspector-In-Charge of the official plant.

CATEGORY CODE K3

This product is acceptable for use as an adhesive or glue remover, for removing adhesive or glue from food packaging materials in and around food processing areas, where its use is not intended for direct food contact. Before using this compound, food products and packaging materials must be removed from the area or carefully protected. After using these compounds, all surfaces must be thoroughly washed with an acceptable detergent solution, and rinsed with potable water. This compound must be used in a manner so that all odors associated with the compound are dissipated before food products or packaging materials are re-exposed in the area.

CATEGORY CODE P1

This product is chemically acceptable for use in official establishments operating under the Federal Meat and Poultry Products Inspection Program. This compound must be used in a manner which prevents direct or indirect contamination of edible products or potable water. The final granting of authorization for the proposed use of such compounds is the responsibility of the Inspector-In-Charge of the official plant.

CATEGORY CODE M1

This product is acceptable for use as a mold release agent on molds that are used to produce packaging materials that will contact food to prevent the finished product from adhering to the mold. The amount used on the equipment should be the minimum required to accomplish the effect.

CATEGORY CODE R2

This product is acceptable for use as a coating where there is no possibility of food contact such as floors, walls, and ceilings. The coating must be applied in a manner which prevents direct or indirect contamination of edible products. Before the food product may be placed in the area where the material is being used, the area should be sufficiently free of odor to prevent product contamination. As a safety precaution, smooth coatings should not be applied to walking or standing surfaces in processing area.

CRC OFFERS CHEMICAL MANAGEMENT SOLUTIONS THROUGH OUR PROGRAMS.

RISK REDUCTION MOBILE™ (R2M™)

A program that will help save money, eliminate redundant inventory and reduce the risks associated with the procurement, use, storage and disposal of maintenance chemicals. CRC will perform a remote chemical assessment of your maintenance chemical inventory.

The program works in 3 easy steps:

1. Provide information on how you procure and manage the chemicals utilized in the maintenance department. (Typically, these chemicals are stored in yellow flammable cabinets.)
2. Email pictures or a list of products to your distributor partner. (If taking photos, please photograph 1 to 4 products per picture.)
3. CRC and your distributor partner does the rest!

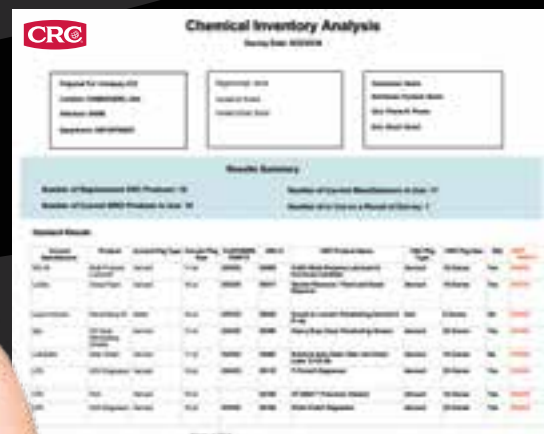

CRC and your distributor partner will provide:

- A complete survey of the existing inventory with recommended CRC products.
- A “Value Document” highlighting SKU reductions, vendor consolidation and CRC’s patented S.D.[L.]® Safety Data Label.
- Product samples (as requested) and follow up to answer any questions or concerns.
- Product recommendations based on identified needs.

SURVEY

RISK REDUCTION PARTNERSHIP PLAN® (R2P2®)

CRC is committed to providing our customers with value-added services has prompted the creation of the Risk Reduction Partnership Plan®. Much more than just a chemical use guide, this plan is a presentation piece that highlights CRC value-added services. CRC, together with distribution, works with our key end-users to improve the overall management of their MRO chemicals and provide them with documented cost savings.

STOPLIGHT® FOOD SAFETY PROGRAM

Developed in response to a growing need within the industry to minimize the risk of food contamination from maintenance chemicals across all food processing areas, the StopLight® Food Safety Program helps to insure proper product usage, minimum risk and cost, and helps you meet the FSMA (Food Safety Modernization Act).

WATER RESTORATION

Plan ahead for recovery of water damaged electrical and electronic equipment with the CRC step-by-step Water Restoration Guide. CRC precision cleaners, degreasers and lubricants, together with our proven restoration procedure, significantly reduce damage and can lead to complete recovery of flooded equipment.

SAFETY SHORTS – TRAINING

CRC will conduct Safety Shorts Training for groups of any size in your facility. Our training presentations cover a variety of topics including Chemical Handling, Fire Safety, General Aerosol & Chemical Safety, Hazardous Waste, Personal Protective Equipment, Safety Data Sheets and Ventilation. Each presentation is 20-30 minutes in length and attendees receive a certificate upon completion. A sign-in sheet records who attended training which is required by many companies to satisfy training objectives.
