# THIS HEART PUMPS OIL.

You live life under the hood. You're the ones who leave the house with your sleeves rolled up, ready to turn wrenches beneath 2 tons of steel just so the rest of the world can turn corners. You were born with grease in your veins. You've earned the dirt under your fingernails and the street knowledge in your head. Which means there's nothing you can't fix.

All you need are SK Professional Tools:

- Premium quality, precision-crafted
- Made in the U.S.A. with American steel
- Backed by a lifetime warranty

## AN IDEAL INDUSTRIES FAMILY COMPANY

SK Professional Tools is proud to be part of IDEAL INDUSTRIES, a family-owned, blue-collar American company with global reach, innovating side-by-side with tradesmen for the ever-changing challenges they face. With a philosophy of stewardship that thinks in terms of generations, IDEAL INDUSTRIES is committed to manufacturing in the communities it serves, and has been building genuine relationships with tradesmen, customers and communities for nearly 100 years.

Made in U.S.A.

S•K Tools are  
**MADE IN THE U.S.A.**,  
featuring quality workmanship and value.

## S•K Quality

S•K hand tools, including our chrome sockets, are manufactured to rigid specifications. At each step in the production process, quality control procedures ensure that every tool will deliver exceptional, long-lasting performance.

It's why S•K tools meet or exceed national and international standards.

SuperKrome® Finish

## SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp cornered hex tool.

SureGrip® Drive

Traditional Hex

## SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

## Added Versatility

Extend the performance capabilities of your S•K tool set with our line of adapters and extensions.

Added Versatility

Improved Access

## Sockets For Every Application

S•K chrome sockets are available in a variety of sizes and styles to ensure you always have the right tool for each application. They are available in standard, semi-deep, deep and extra deep depths in fractional and metric sizes.

## Professional Ratchets

### Smooth Ratcheting Action

Completely enclosed ratchet mechanism with triple tooth contact for smooth ratcheting action with little back movement. Diamond knurled grip for sure handling.

### Heavy-Duty Design

S•K's professional ratchets boast robust tooth designs and multi tooth engagement pawls for high strength and durability.

SOCKETS, RATCHETS, AND BITS

### Flex Head Ratchets Provide Greater Access

S•K's professional flex head ratchets provide greater access when working in confined spaces or when extra long reach is required.

### Slim Ratchets

S•K slim ratchets utilize a 1/4" Drive ratchet body with 3/8" Drive tang, improving access in tight compartments.

### Full Assortment of Bit Sockets, S2 Steel Bits and Power Drive Bits

### S•K BIT SOCKETS – THE RIGHT TOOL FOR THE JOB

Packaged in a plastic tray.

### Wobble Extensions

Provide improved access to hard-to-reach fasteners with up to an 8° offset angle.

## Locking Extensions

### SureGrip® Lock for Safety

New through lock, solid body design significantly improves strength. The SureGrip® lock grabs each socket and doesn't let go. This eliminates the problem of sockets remaining stuck to a fastener (usually in a hard-to-reach location), or sockets being dropped when the tool is removed from a tight compartment. With the SureGrip® lock, you can count on optimal tool control and peace of mind.

#### 1/4" Drive Locking Extensions

## Semi-Deep and Deep Sockets

### SureGrip® Drive Design

Did you know sharp-cornered hex tools can round rusted or damaged fasteners? Our SureGrip® Drive Design offers better performance and increased strength, because it drives the side of the fasteners, not the corners.

**SUPERKROME  
TESTED TOUGH**

## Flex Sockets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

### Improved Access

Aircraft, automobiles and industrial equipment are using smaller components requiring smaller fasteners. S•K's 1/4" Drive flex sockets provide the access needed to get into tight places to remove these small fasteners.

## Standard Sockets

### S•K Quality

S•K hand tools, including our chrome sockets, are manufactured to rigid specifications. At each step in the production process, quality control procedures ensure that every tool will deliver exceptional, long-lasting performance.

It's why S•K tools meet or exceed national and international standards.

SOCKETS, RATCHETS, AND BITS

**Improved Access**

The need to maximize every inch of space in today's vehicles can make servicing quite a challenge. S•K flex sockets provide greater accessibility in tight spaces by allowing an indirect approach to the fastener.

## Professional Ratchets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### Smooth Ratcheting Action

Completely enclosed ratchet mechanism with triple tooth contact for smooth ratcheting action with little back movement. Diamond knurled grip for sure handling.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

## Professional Ratchets

### Provides Greater Access

S•K's professional flex head ratchets provide greater access when working in confined spaces or when extra long reach is required.

### Heavy-Duty Design

S•K's professional flex head ratchets boast a robust 36 tooth design for high strength and durability.

### Slim Ratchets

S•K slim ratchets utilize a 1/4" Drive ratchet body with 3/8" Drive tang, improving access in tight compartments.

SOCKETS, RATCHETS, AND BITS

## Flex Sockets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool.

### Improved Access

The need to maximize every inch of space in today's vehicles can make servicing quite a challenge. S•K flex sockets provide greater accessibility in tight spaces by allowing an indirect approach to the faster.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

**SUPERKROME  
TESTED TOUGH**

## Professional Ratchets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### Smooth Ratcheting Action

Completely enclosed ratchet mechanism with triple tooth contact for smooth ratcheting action with little back movement. Diamond knurled grip for sure handling.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

**SUPERKROME

SOCKETS, RATCHETS, AND BITS

## Standard Sockets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

## No. 1933

### 33 Piece, 1/2" Drive, 12 Point, Deep Metric Socket Set Includes:

47136	1 1/8"	47144	1 3/8"	47152	1 5/8"
47170	18" Ratchet			47161	8" Extension

Packaged in an impact resistant molded tool chest.

### Protect Your Personal Safety

Secure your balance when working with sockets by pulling the ratchet toward you rather than pushing it. Use only recommended extensions and do not overload. To loosen very tight fasteners, select a flex handle. And of course, always wear gloves and eye protection.

## Professional Ratchets

### SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool.

### Secure and Portable Tool Storage

SK 21-piece and 25-piece 3/4" Drive chrome socket sets are packaged in molded plastic cases for safe, secure storage. An integrated handle helps provide easy portability for these heavy-duty sets.

### Made in the U.S.A.

You can count on the quality workmanship and value of these American made sockets.

### Easy Bit Replacement

Bit holders feature a handy through-hole design that makes it easier to replace worn or broken bits. You can pop the old bit out and quickly insert a new replacement bit.

### High Strength, S2 Steel Bits

Bits are manufactured to rigid standards, using high strength S2 steel for extended tool life.

### Extra Strong Bit Holder Design

Has at least nine times more bit holding strength. This extra strength with the new design helps prevent the bit from slipping out of the socket while working.

## Bit Holder Sockets

S•K bits are available for all common fastener patterns.

**SUPERKROME  
TESTED TOUGH**

With use of a ratchet, T-handle or spinner handle, they offer high-torque capabilities.

With the help of an extension or universal joint, they can reach into awkward spaces.

## Ball Hex Bit Sockets

### Made in the U.S.A.

You can count on the quality workmanship and value of these American-made sockets.

Made in U.S.A.

### Improved Access

Ball Hex design enables access to hard-to-reach fasteners.

### Easy Bit Replacement

Bit holders feature a handy through-hole design that makes it easier to replace worn or broken bits.

SOCKETS, RATCHETS, AND BITS

## Choosing a TORX® Bit Socket

TORX® fasteners, including the new TORX® Plus patterns, are increasingly popular on today's vehicles. As always, it is important to identify the right tool to use on any fastener, including TORX® fasteners.

The TORX® Plus pattern increases fastener contact to allow 25% more torque on the fastener. It is critical to use the TORX® Plus bit socket on these new fasteners, as using old TORX® bit sockets on them can cause damage to the fastener and tool.

When in doubt as to which tool is right, try the TORX® Plus tool first. If it fits, it is the correct tool, since TORX® Plus tools will not fit on standard TORX® fasteners.

TORX® • Tamper-Proof TORX® • TORX® Plus

## TORX® Plus Bit Sockets

### New Fastener Pattern

TORX® Plus bit sockets are designed for use on newer fasteners found on today's vehicles in interior, trim and dashboard applications.

### Improved Torque Transfer

The increased surface area of the new TORX® Plus fastener pattern allows 25% more torque on the fastener.

Made in U.S.A.

Made in U.S.A.

S•K Impact Sockets are **MADE IN THE U.S.A.**, featuring quality workmanship and value.

**CORROSIVE  
TESTED  
TOUGH  
RESISTANT**

## Socket Features

### ■ Laser Etched High Visibility

Sockets are laser engraved with 3 extra-large markings every 120° around the sockets for improved readability.

### ■ Sockets For Every Application

S•K impact sockets are available in a variety of sizes and styles to ensure you always have the right tool for each application.

## IMPACT SOCKET DEPTH COMPARISON

S•K 3/8" drive impact sockets are available in three lengths to provide exactly the right length for the application at hand.

## Tested Tough Impact Sockets

The new S•K impact sockets are coated with a rust-preventative compound that makes them exceptionally resistant to corrosive factors.

In an independent salt spray test, S•K impact sockets, with the tested tough rust-preventative coating, withstood the harsh test showing little deterioration, compared to the competitor's brand.

## Swivel Features

- **Great on Domed Fasteners**

S•K Sockets feature extra recess depth to allow for use where threaded fasteners protrude above the nut or where the fastener is domed.

- **Gets Into Tight Spaces**

The 30° flex angle on S•K Sockets allows the user to get at hard-to-reach fasteners. The socket can be positioned to the desired angle because of the heavy-duty spring.

- **Designed for Safety**

The smooth collar design on S•K swivel impact sockets prevents the pin from working loose.

SureGrip® Hex Design

IMPACT SOCKETS

## Sockets with SureGrip® Drive Design

The SureGrip® Design drives the side of the fastener, not the corners. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool. In addition, the SureGrip® Design makes S•K Sockets effective even on partially rounded fasteners.

The pictures are stress images taken of a socket in use. The amount of red indicates how much stress is being put on the fastener. As can be seen in the SureGrip® image, the stress levels are very low compared to a traditional, sharp-cornered standard hex.

**S•K QUALITY** S•K Hand Tools are manufactured to rigid specifications. At each step in the production process, quality control procedures ensure that every tool will deliver exceptional, long-lasting performance.

## Impact Tools For Automotive Applications

We feature a wide variety of impact sockets and sets designed for specific automotive applications. For a complete listing of these automotive impact tools, see our Automotive Tools section.

## Impact Universal Joints

### Ball or Pin Retainer

Choose the style you prefer.

### Improved Access

Much easier to work with hard-to-reach fasteners.

## Semi-Deep Impact Sockets

### Improved Access

Our new semi-deep impact sockets are designed to provide added reach over standard sockets, yet fit in tight spaces where deep sockets are too long.

### Nose-Down Means Greater Access

The nose-down design on S•K 3/8" drive deep impact sockets extends the taper as far as possible, for improved access over straight wall designs.

### 3/8" Drive, 6 Point, Semi-Deep Fractional Impact Sockets

## Great on Domed Fasteners

S•K Sockets feature extra recess depth to allow for use where threaded fasteners protrude above the nut or where the fastener is domed.

## Great in Tight Spaces

The 30° flex angle on S•K Sockets allows the user to get at hard-to-reach fasteners. The socket can be positioned to the desired angle because of the heavy-duty spring.

## Deep Impact Sockets

### Nose-Down Means Greater Access

The nose-down design on smaller S•K 1/2" Drive Deep Impact Sockets extends the taper as far as possible, for improved access over straight wall designs.

IMPACT SOCKETS

## Impact Socket Sets

### Improved Access

Both metric and fractional 1/2" Drive Sockets feature a unique longer-length nose-down design which provides better access to hard-to-reach fasteners.

### Safe, Secure Storage

All four sets featured are packaged in a molded plastic case for easy tool identification and safe, secure storage.

## Swivel Impact Sockets

### SureGrip® Drive Design

SureGrip® Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp-cornered hex tool.

### Great on Domed Fasteners

S•K Sockets feature extra recess depth to allow for use where threaded fasteners protrude above the nut or where the fastener is domed.

### Gets Into Tight Spaces

The 30° flex angle on S•K Sockets allows the user to get at hard-to-reach fasteners. The socket can be positioned to the desired angle because of the heavy-duty spring.

## Thin Wall Impact Sockets

### Designed For Access

The thin wall design of these sockets, combined with their 12 point SureGrip® design, makes these sockets perfect for heavy-duty applications where space is tight.

# TURBOSOCKETS®

■ 1/4" Drive TurboSockets®	106
■ 3/8" Drive TurboSockets®	106
■ 1/2" Drive TurboSockets® and Removal Kits	107
■ 3/8" Drive Deep Twist TurboSockets®	108

## The Right Tool For The Job

S•K TurboSockets® remove slotted and Phillips head screws too tight for a screwdriver. Even screws, nuts and bolts, with very thin, rounded or tapered heads can be removed. Also removes a wide variety of other problem fasteners like oil pan plugs, corroded marine nuts and bolts, and manifold nuts.

## Easy to Use

Simply place the TurboSocket® on the damaged fastener and turn. To remove the fastener from the TurboSocket®, just tap the socket or use a punch to knock out the fastener.

- SuperKrome® Short Deep Offset Box End Wrenches 128
- Adjustable and Spud Wrenches 129
- Hex Key Sets 130-131
- T-Handle Hex Keys 132

## Combination Wrenches

- S•K SuperKrome® combination wrenches feature a thicker shank and rounded edges for improved gripping and increased comfort.
- Wrench box ends feature S•K's SureGrip® Drive design, which drives the side of the hex, not the corner. This makes S•K box ends effective on partially rounded fasteners.

### WRENCH BOX WITH SUREGRIP® DRIVE DESIGN

The SureGrip® Drive Design drives the side of the fastener, not the corner. This not only provides increased strength, but also avoids the rounding of rusted or damaged fasteners, which can occur when using a sharp cornered hex tool.

The picture shown right are stress images taken of a socket in use. The amount of red indicates how much stress is being put on the fastener. As shown in the SureGrip® image, the stress levels are very low compared to a traditional sharp cornered standard hex.

SureGrip® Drive

Traditional Hex

## Flare Nut Wrenches

- Designed for soft fittings such as brass and aluminum.
- Flare nut wrenches feature S•K's SureGrip® Drive Design which drives the side of the hex, not the corner.

## Flare Nut Crowfoot Wrenches

- Flare nut crowfoot wrenches are designed for tight access of soft fittings such as brass and aluminum.
- Both S•K 3/8" and 1/2" Drive sets feature our exclusive SuperKrome® plating for a jewelry-like finish with maximum corrosion resistance.

## Open End Crowfoot Wrenches

- **Improved Access.** Open end crowfoot wrenches provide access to hard-to-reach fasteners that aren't easily accessible with a conventional wrench.

## A 1.7° ARC SWING FOR PRECISION AND POWER IN THE TIGHTEST SPACES

**REVOLUTIONARY  
6 PAWL  
TECHNOLOGY**

**Dual-opposing pawls** provide more strength

**216 positions -**  
Delivers a 1.7°  
Arc Swing

**Works in pairs**, so one pair is always engaged

**Far superior** to all other ratcheting wrenches

**I-Beam** handle distributes added force evenly for superior strength

**SureGrip®** design drives the sides of fasteners for maximum strength and minimum rounding

WRENCHES

## Combination Wrenches

Made in the U.S.A., featuring quality workmanship and value.

Made in U.S.A.

### Comfort and SureGrip®

S•K SuperKrome® combination wrenches feature a thicker shank and rounded edges for improved gripping and increased comfort.

Wrench box ends feature S•K's SureGrip® Drive design, which drives the side of the hex, not the corner.

This makes S•K box ends effective on partially rounded fasteners.

### LONG LASTING

In independent salt spray testing, a key test of corrosion resistance, S•K SuperKrome® wrenches were found to be exceptionally resistant to corrosive factors.

WRENCHES

## Combination Wrenches

### Comfort and SureGrip®

S•K SuperKrome® combination wrenches feature a thicker shank and rounded edges for improved gripping and increased comfort.

Wrench box ends feature S•K's SureGrip® Drive design, which drives the side of the hex, not the corner. This makes S•K box ends effective on partially rounded fasteners.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

## Long Pattern Combination Wrenches

### Extra Strength and Reach

Long pattern wrenches deliver extra reach to access fasteners deep in compartments. The added length provides greater torque for extra turning power in tough applications.

### Comfort and SureGrip®

S•K SuperKrome® combination wrenches feature a thicker shank and rounded edges for improved gripping and increased comfort.

### Offset

15 degree offset on box end.

Long Pattern for extra reach and more torque

SureGrip® Drive Design

## Combination Wrenches

### Long Lasting

In independent salt spray testing, a key test of corrosion resistance, S•K SuperKrome® wrenches were found to be exceptionally resistant to corrosive factors.

WRENCHES

## Short Combination Wrenches

### Shorter for Access

Short pattern design enables greater access in confined spaces.

### SureGrip® Drive Design

The SureGrip® Drive Design drives the side of the fastener, not the corner.

### SuperKrome® Finish

High polish SuperKrome® plating results in a jewelry-like finish, providing long life and maximum corrosion resistance.

### Easy Accessibility

Both wrench ends are angled for greater access. The box end design features a 15° offset head, which provides useful clearance.

The open end design features a 15° rotated head, which allows for improved access over straight head designs.

## Adjustable Wrenches

Made in the U.S.A., featuring quality workmanship and value.

Adjustable wrenches provide a wide capacity range in a single tool, which is ideal when it is impractical to carry a full set of wrenches.

The finish on S•K chrome adjustable wrenches is a nickel-based coating for rust and corrosion protection.

## T-Handle Hex Keys

### Comfortable

Cushioned handle is ergonomically curved to match the shape of the hand for increased comfort and reduced fatigue.

### Strong

Handle and blade are securely welded for greater durability and a tool that will last a lifetime.

### Precision

Chamfered hex tip ensures precise fastener engagement and balanced solid steel handle allows for flywheel effect for fast insertion and removal of screws.

## TORQUE WRENCHES

- Preset Torque Wrenches 134
- Interchangeable Head Micrometer Adjustable 134
- Interchangeable Heads 135
- Torque Screwdrivers 136-137
- Adjustable Micrometer Torque Wrenches 138

## Preset Square Drive Torque Wrench

- Ergonomic lightweight dual durometer grip to reduce operator fatigue.
- Accuracy of +/- 4% meets or exceeds ASME B107.14M and ISO 6789, offering consistent assembly quality.
- Wrench can be calibrated using any unit of torque measure.
- Ball bearing rockover assembly assures smooth operation, enhances repeatability, increases cycle life of wrench, and helps control ownership costs.
- Excellent audible and tactile impulse when preset torque is achieved.
- Can be ordered preset from the factory or torque tester can be used to set torque value.

## Preset Ratcheting Torque Wrenches

PART NO.	TORQUE CAPACITY*	DRIVE SIZE	LENGTH (IN)
<b>SKT0400</b>	50 in. lbs. / 6 Nm / 58 kgf•cm	¼"	7.3
<b>SKT0589</b>	150 in. lbs. / 17 Nm / 173 kgf•cm	⅜"	7.9
<b>SKT0058</b>	300 in. lbs. / 34 Nm / 346 kgf•cm	⅜"	10.4
<b>SKT0055</b>	750 in. lbs. / 85 Nm / 864 kgf•cm	⅜"	14.8

<b>SKT0151</b>	7200 in. lbs. / 600 ft. lbs. / 813 Nm / 83 kgf•m	¾"	37.4

\* Capacity listed is at maximum working load.  
Effective working range is from 20% to 100% of maximum.

## Interchangeable Head Preset

- Interchangeable Head Presets are superb for use on the assembly line AND in field maintenance kits!
- The +/- 4% Accuracy meets or exceeds ASME B107.14M and ISO 6789, and provides the quality your customers demand!
- The pin lock assures positive head connection, yet permits head changeover in seconds!
- Bi-directional versatility obtained by simply removing head, turning wrench over, and replacing head.
- Versatile system permits use of fewer wrenches by connecting to a wide range of standard interchangeable heads, extensions and adapters.
- Audible and tactile impulse when set torque achieved.
- Unique dovetail design transmits the load at a right angle from the wrench to the head; exceptional strength and rigidity of connection.

- Can be ordered preset from the factory or torque tester can be used to set torque value.

## Preset Torque Wrenches With Interchangeable Heads

\* Capacity listed is at maximum working load. Effective working range is from 20% to 100% of maximum.

## Interchangeable Head Micrometer Adjustable

- Versatile system permits use of fewer wrenches by connecting to a wide range of standard interchangeable heads, extensions and adapters.
- The +/- 4% Indicated Value Accuracy meets or exceeds ASME B107.14M, AS 28431 and ISO 6789.
- Neoprene rubber grip offers oil and chemical resistance, as well as cushioning and firm grip for excellent ergonomics!
- Excellent audible and tactile impulse when set torque achieved.
- Unique dovetail design transmits the load at a right angle from the wrench to the head; exceptional strength and rigidity of connection.
- The pin lock assures positive head connection, yet permits head changeover in seconds!
- Bi-directional versatility obtained by simply removing head, turning wrench over and replacing head.

### Dovetail Head Series — Newton Meter

PART NO.	TORQUE CAPACITY	LENGTH (IN)
<b>SKT0784</b>	1–6 Nm	9.0
<b>SKT0785</b>	4–20 Nm	9.0
<b>SKT0786</b>	20–100 Nm	12.8
<b>SKT0787</b>	40–200 Nm	16.3

PART NO.	TORQUE CAPACITY	LENGTH (IN)
<b>SKT0769</b>	10–50 in. lbs.	9.0
<b>SKT0765</b>	30–150 in. lbs.	9.0
<b>SKT0763</b>	100–600 in. lbs.	12.8
<b>SKT0770</b>	15–75 ft. lbs.	12.8
<b>SKT0771</b>	30–150 ft. lbs.	16.3

## Interchangeable Heads

All of S•K's interchangeable heads are made from a single piece of alloy steel. This construction style is far superior in strength as well as the maintenance of exact torque length from head to head versus the fabricated method used by competing manufacturers. The dovetail design provides an exceptionally strong connection and allows for complete head interchangeability across the full spectrum of torque ranges.

TORQUE WRENCHES

## Industrial Torque Screwdrivers

### Single Digit Adjustable

The Single Digit Adjustable torque screwdriver provides outstanding comfort and accuracy. The easy to operate twist mechanism sets your torque levels in exact, single digit increments and then the positive locking detent secures selected torque value in place. The ergonomic tri-lobular handle design gives enhanced leverage and superior grip control. The unique shape isolates only major muscle groups to reduce strain and the risk of repetitive motion injury. The profile is also comfortable in the smallest to largest of hands.

- Polished anodized aluminum exterior.
- Can be used in right and left hand directions.
- Operator cannot over torque as clutch releases automatically at desired torque level.
- Anti-backlash design enhances repeatability.
- Accuracy of +/- 6% indicated value.
- Designed to meet or exceed ASME B107.14M and ISO 6789 specifications.
- Comes with FREE calibration certificate from an ISO/IEC 17025 Accredited laboratory.
- Uses standard 1/4" hex bits, adapters, and sockets.

SKT0045

### Adjustable Torque Screwdrivers

Part No.	DRIVE Size (FEMALE HEX)	TORQUE CAPACITY	LENGTH (LESS BIT)
<b>SKT0045</b>	1/4"	20–100 in. oz.	6.8"
<b>SKT0046</b>	1/4"	15–74 cNm	6.8"

TORQUE WRENCHES

### Preset Screwdrivers

These versatile preset torque screwdrivers are perfect for precision mechanical and electronic component assembly in the factory or factory quality in field reassembly and maintenance kits.

- Automatic clutch release when preset value achieved.
- Anti-backlash design enhances repeatability.
- Long shaft for hard to reach applications.
- Bi-directional adjustment.
- Polished aluminum exterior.
- Uses standard 1/4" bits, sockets and adapters.
- Accuracy of +/- 6% (from 20% to 100% capacity).
- Meets or exceeds ASME B107.14M and ISO 6789 standards.
- Torque value can be set using any unit of torque measure.
- Minimum capacity is 20% of Maximum torque capacity.

SKT0007

<b>SKT0563</b>	1/4"	36 in. lbs. 4 Nm 40 kgf•cm	7.8"

## Adjustable Torque Screwdriver

This adjustable higher torque—torque limiting screwdriver is designed and manufactured to provide consistent user-settable torque in varying assembly or maintenance applications.

- When desired torque level achieved tool emits a distinct audible and tactile impulse (“click”).
- For production use; can be preset, cap prevents inadvertent changes.
- Scales clearly engraved on shaft and magnified for ease of reading.
- Bi-directional adjustment operation.
- Operator cannot over torque as clutch releases automatically at desired torque level.
- Anti-backlash design enhances repeatability.
- Accuracy of +/- 6% indicated value.
- Designed to meet or exceed ASME B107.14M and ISO 6789 specifications.
- Comes with FREE calibration certificate from an ISO/IEC 17025 Accredited laboratory.
- Uses standard 1/4" hex bits, adapters, and sockets.

SKT0587

TORQUE WRENCHES

## Adjustable Torque Screwdriver Set 2 – 36 in. lbs. / 0.2 - 4 Nm

- Great all in one set, no searching for bits.
- All the great features as listed above.
- Custom fitted blow molded case.

## No. SKT0568

### 29 Piece Adjustable Torque Screwdriver and Bit Set 36 in. lbs. / 0.2 – 4 Nm

Contains: 5/65", 3/32", 7/64", 1/8", 9/64" Hex; #1, #2 Posidrive; #0, #1, #2, #3 Phillips; 0-1, 3-4, 5-6, 8-10, 12-14 Slotted; T10, T15, T20, T25, T30, T40 TORX; 0, 1, 2, 3 Square Recess, 1/4" Socket Adapter, 1/4" Bit Holder; Screwdriver. Packaged in a molded plastic case.

## SK MICROMETER ADJUSTABLE TORQUE WRENCHES

- Dual scale, calibrated dual direction
- Positive lock with spring-loaded pull-down lock ring
- Fast, accurate and easy to set
- Easy to read laser marked scales
- Quick release buttons which provide solid retention as well as easy socket removal
- Accuracy: +/- 3% CW +/- 4% CCW of indicated value, CW, from 20% to 100% of full scale
- Individually serialized with matching certificate of calibration traceable to N.I.S.T.
- Durable storage case to protect your investment
- Manufactured in America with a globally sourced component.

## SCREWDRIVERS

- SureGrip® Screwdrivers 142-144
- CushionGrip Screwdrivers 145-147
- Offset Screwdrivers 148
- Interchangeable Screwdrivers 148

Made in U.S.A.

S•K Screwdrivers are **MADE IN THE U.S.A.**, featuring quality workmanship and value.

## SureGrip® Slotted Screwdrivers

- Butyrate handle for strength, durability and resistant to most automotive chemicals.
- Contoured handle for control
- Bolstered blades on larger sizes
- Nickel chrome plated for corrosion resistance
- Vapor blasted tip for fastener grip
- Easy clean up

Hex bolster on larger screwdrivers for easy turning power with wrench

Heavy duty Chrome Vanadium steel shaft

Bright nickel chrome plated shafts for best corrosion protection

Vapor blasted tip to grip fastener

Comfortable square handle for secure grip even with greasy hands.

SCREWDRIVERS

## CushionGrip Slotted Screwdrivers

- Dual durometer handle for comfort and control
- End stamp for quick identification
- Bolstered blades
- Nickel chrome plated for corrosion resistance
- Vapor blasted tip for fastener grip

Dual durometer handle provides exceptional grip.

- Retaining Specialty Pliers 160-161
- Automotive Specialty Pliers 162
- Electrical Specialty Pliers 163
- Safety Wire Twisting Pliers 164

Made in U.S.A.

S•K Pliers are  
**MADE IN THE U.S.A.,**  
featuring quality workmanship and value.

## Cutting and Gripping Pliers

- **The Right Tool for the Job:** Our cutting pliers boast drop forged, heat-treated construction. What's more, cutting edges are hand sharpened to ensure superior performance.
- **Ergonomic, Comfortable Grips:** Plastic cushion grips provide user comfort and ease of operation.
- **Flush rivet design for easier access**

Flared handle design for added power

Comfortable vinyl handles for a firm, non-slippery grip

High carbon alloy tool steel, drop forged and heat treated for maximum strength and durability

Serrated jaws resist slipping

### KNIFE-TO-KNIFE CUTTING EDGES

Induction hardened knife-to-knife cutting edges are hand sharpened to ensure superior performance.

## VARIETY OF SIZES AND STYLES

S•K pliers come in the variety of sizes and styles needed by today's professional.

From 4" diagonal cutting pliers to our 20" tongue and groove pliers, we have pliers for just about every application.

### S•K Wire Twisting Pliers

- Performance and Comfort
- S•K Manual Return wire twisters offer strong performance for those intricate twisting jobs.
- S•K Automatic return wire twisters feature return springs to twist the pliers and therefore the wire.

**ERGONOMIC HANDLES** for comfortable, all-day use. The curved handles reduces wrist and muscle fatigue.

### Flush Rivet Design

- Stronger Pivot
- Flush rivet allows smooth adjustment
- Flush rivet will not loosen
- Better access – Overall narrower
- Larger working surface

PLIERS AND CUTTERS

## S•K Long Nose Pliers

## Easy to Use

These pliers are ideal for radiator, vacuum, fuel lines and overfill hoses. The patented clamping mechanism locks automatically, there are no screws or levers to adjust. Robust and reliable performance is assured since these tools have been tested to 50,000 cycles without failure.

## Made in the U.S.A.

You can count on the quality workmanship and value of these American-made pliers.

PLIERS AND CUTTERS

## Up-Front Cutter Stripper

Both S•K's new cutting tools feature an up-front cutter, crimper to reach into tight spaces. These tools also feature bolt-cutting stations around the pivot and precision ground stripping stations. A black oxide finish helps resist corrosion, which enhances the lifelong performance of the tool. What's more, these pliers' grips are designed to be comfortable and easy to use.

- Unique behind the pivot crimping station for extra leverage.
- Features a special long, curved cutter behind the pivot, which also provides extra leverage. In addition, this tool has a 7–8mm automotive crimping station and wire looping holes.

### Up-Front Cutters, Stripper, Crimpers

PART NO.	DESCRIPTION
7699	8.50" Up-Front Cutter/Stripper/Crimper, Crimp, Strip 10–22 AWG
7702	9.5" Up-Front Cutter/Stripper, Crimp, Strip 10–22 AWG. Long curved cutter capable of cutting Romex® in one stroke.
7694	7.75" Up-Front Crimper/Cutter, Strips 10-18 AWG with 6 strip stations. Crimps insulated 10-22 AWG.

## Weatherpack Terminal Crimper

- Crimps Weatherpack terminals used on GM vehicles and motorcycles
- Black oxide coating to resist corrosion
- Crimps non-insulated, open barrel and weatherpack terminals. 14-24 AWG.

### Weatherpack Terminal Crimper

PART NO.	SIZE
7801	8.00"

## Wire Cutter/Stripper

### Stripping Pliers 6"

- Strips 10 – 18 AWG solid and 12 – 20 AWG stranded wire
- Form-ground, knife-type blades for accurate, easy stripping without nicking insulation
- Convenient plier nose for extra gripping strength

### Crimping/Stripping Pliers

- Strips 8 – 16 AWG solid and 10 – 18 AWG stranded wire
- Crimps bare and insulated terminals for 10 - 22 AWG wire, RG-59 coax connectors and 7 to 8mm auto ignition connectors
- Cuts unhardened wire, bolts and screw (4-40, 6-32, 8-32, 10-24 and 10-32) and reforms threads

PLIERS AND CUTTERS

## S•K Wire Twisting Pliers

### Performance and Comfort

S•K Manual Return wire twisters offer strong performance for those intricate twisting jobs. S•K automatic return wire twisters feature return springs to twist the pliers and therefore the wire. A must for technicians that use these tools every day, making the job quicker and easier.

### Cushion Throat Feature

To protect against FOD (Foreign Object Damage), the cushion-throat feature traps cut wire and keeps it securely in the jaws of the pliers.

### The Right Profile for the Job

Safety wiring, primarily used in aviation and racing, is used to secure critical fasteners, which often come loose due to high performance and hard running engines that create vibration.

## S•K Reversible Automatic Return Wire Twisting Pliers

The feature on our Automatic Return Wire Twisting Pliers has a unique jaw design, which eliminates cuts and nicks in the wire.

The reversible action enables right **AND** left twists.

PUNCHES & CHISELS

## Pin Punches

Designed to remove loosened pins from assemblies, after initial loosening by a starter punch. Like all S•K punches, our pin punches are hot forged in America from premium alloy steel.

S•K punches are hardened and tempered for maximum strength and durability, plus individually ground, polished and coated for a smooth finish and corrosion resistance.

PUNCHES & CHISELS

## HAMMERS

■ Hammers

173-176

Made in U.S.A.

## Dead Blow Hammers

### Made in the U.S.A.

Made in the U.S.A. featuring quality workmanship and value.

### Long Lasting

Outlasts rawhide, rubber, brass, lead, nylon, and other plastic type heads by 10 to 20 times!!

### Maximum Power and Striking Force

Shot-filled canister provides dead blow action in head.

## Strength and Safety

Canister in head and heat treated rod in handle are fully encased in hot cast polyurethane. Steel canister and rod are welded together.

### Non-Bounce Action

Convex faces on head are designed for maximum dead blow non-bounce action and are cut resistant.

### Positive Grip

Textured, non-slip comfort countered handle and safety flanged butt.

### No Mark, No Spark

Complete protection for machinery, product, and worker.

### Sledge Head

## No. 8601

### 9 Piece Interchangeable Tip Hammer Set

Unique head design for maximum striking force. Heads are easily changed with screw-on design. Packaged in molded plastic case. Non-slip grips for maximum hold and safety. Made in the U.S.A. Non-sparking, non marring dead blow hammer tips. Assorted heads are color coded for easy identification of head types.

### 5 Things You Should Never Do With A Hammer

1. Never use a hammer with a loose or damaged handle.
2. Never strike one hammer with another hammer.
3. Never use a hammer to strike a nail-puller bar.
4. Never use special-purpose hammers for general-purpose work.
5. Never use urethane-coated hammers in extreme temperatures.

**ALWAYS: Wear safety goggles to protect your eyes.**

## Disc Brake Caliper Set

7 Piece set contains the most popular hex and TORX® sizes for servicing disc brake calipers on domestic vehicles (except Chrysler). Set does not contain a T60 TORX® bit needed for some late model GM vehicles.

### No. 84227

**7 Piece, 3/8" Drive, Disc Brake Caliper Set Includes:**

PART NO.	SIZE	PART NO.	SIZE	PART NO.	SIZE	PART NO.	SIZE
41210	1/4"	41212	3/8"	45540	T40	45550	T50
41211	5/16"	41407	8mm	45545	T45		

Packaged on a rail.

## Adjustable Oil Filter Wrench

- Self-adjusting heavy-duty design actually grabs onto the filter and automatically tightens.
- Ideal for removal of most spin-off oil, fuel and fuel-water separators.
- Use either 3/8" ratchet or 3/4" open-end wrench to drive.
- Low profile (2 1/2" high) for easy access in confined areas.
- Withstands over 85 ft. lbs. of torque to remove stubborn filters.
- Sure-grip three-point contact.
- Smooth-moving sprocket gears eliminate jamming.
- Fits hundreds of filters.

PART NO.	SIZE
<b>90216</b>	62mm-121mm (2 1/2" - 4 3/4")

## Oil Filter Cup Set

- Each tool acts like a socket to remove hard-to-reach or stubborn oil filters.
- Largest size range available—All 100% USA-made.
- Specific sizes for popular import OEM and replacement filters.
- Glass reinforced composite material.
- Provides high torque capacity:
  - Handles 140 ft. lbs. of torque to remove even the most stubborn filters.
  - Competitive plastic cup wrenches don't even come close to this torque capacity.
- Metal drive insert will not deform or break even after years of service.
- Use with 3/8" drive or with extensions to reach difficult filters; protects mechanic from hot oil contact.
- Will not crush filter can or cause oil spillage and cleanup expense.
- Extensive application charts included with set.

### No. 90225

#### 5 Piece Oil Filter Cup Set Includes:

SIZE
65/67mm, 14 Flute Cup
74/76mm, 14 Flute Cup
76mm, 14 Flute Cup
76/80/93mm, 36 Flute Cup
93mm, 15 Flute Cup

Packaged in a molded plastic case.

## Hook and Pick Tools

### Versatile

Ideal for separating wires, removing small fuses, "O" rings, retrieving washers and loose parts too small to pick up with fingers.

Each hook and pick is made of high carbon polished steel and is permanently attached to a cushioned handle.

### No. 90353

#### 4 Piece Hook and Pick Set

Packaged in a pouch.

## Spark Plug Sockets

## Impact Specialty Sockets

### SureGrip® Hex Design

S•K sockets provide better performance and greater strength than sharp cornered hex tools, because the design drives the side of the fastener, not the corners. This also makes S•K impact sockets effective for use on partially rounded fasteners.

### Made in the U.S.A.

S•K automotive tools are made in the U.S.A., featuring quality workmanship and value.

Made in U.S.A.

### Speed and Efficiency

S•K automotive specialty impact sockets are designed for specific automotive applications. Individually and in sets, these tough tools will stand up to your most demanding jobs and provide years of exceptional service.

## SAFETY, WARRANTY & INDEX

▪ Safety Information	192
▪ Warranty	193
▪ Numerical Index	194-200
▪ Alpha Index	201-208

S•K takes great care in the design and manufacture of our products to insure that we are producing the best quality and safest tools possible. Safety however is not just about how the tool is built. Proper use of the tool plays a

very large role in safety. S•K does not want anyone to be injured while using our tools. That is one of the reasons we do not condone misuse or abuse of our tools in our warranty policy. Below is a list of suggested safety

tips to assist you in the safe use of our tools. This is not an exhaustive list, however, so you should also rely on training, other safety information sources, your experience and common sense when using any tool.

## HAND TOOLS

### CAUTION!

- Chrome and Industrial finish hand tools can break if overloaded or used for the wrong application.
- Damaged or broken hand tools or accessories can cause bodily injury.
- Always wear safety goggles to protect your eyes.

## HANDLES

### CAUTION!

- Tool breakage and slippage can occur and bodily injury can result. Improper use and maintenance of tools increases risk of damage, breakage and slippage during use.
- Do not use pipes or other extensions to increase leverage on handles.

## IMPACT DRIVERS

### CAUTION!

- Impact drivers can cause tool breakage or flying objects, which can result in bodily injury.
- Always wear safety goggles to protect your eyes.
- Wear hearing protection.

## PLIERS/CUTTERS

### CAUTION!

- Never modify or alter pliers or any other tool.
- Do not use pipes or other extensions to increase leverage on pliers or cutting tools.
- Broken tips or cut materials can fly unpredictably and cause bodily injury.
- Always wear safety goggles to protect your eyes.

## PRY BARS

### CAUTION!

- Prying can cause broken chips of material to fly unpredictably and cause bodily injury.
- Do not use pry bar as a punch or hammer.
- Pry bars can chip or crack if struck. Do not use a damaged pry bar.
- Always wear safety goggles to protect your eyes.
- Do not use pipes or other extensions to increase leverage on a pry bar.

## RATCHETS

### CAUTION!

- Do not use pipes or other extensions to increase leverage on the ratchet or flex bar.

- Do not use chrome sockets or drive tools with impact or power tools. Such use damages the tool and may result in bodily injury.
- Always wear safety goggles to protect your eyes.
- Mismatched, dirty or partially worn parts can cause ratchet to slip or break, and bodily injury can occur. Use only the correct socket and extension parts with the ratchet.
- Do not clean ratchet by immersing in fluids. Non-sealed ratchet mechanisms can be cleaned by hand and lubricated with light oil.

## SCRAPERS

### CAUTION!

- Do not use scrapers or putty knives as a pry bar or chisel. Damage to the product and injury to the user can occur.
- Always use safety goggles to protect your eyes.

## SCREWDRIVERS

### CAUTION!

- Do not use a screwdriver as a pry bar, chisel or punch. Damage to the product and injury to the user can occur.
- Do not use screwdrivers with plastic handles near live wires or for electrical testing. Plastic handles do not provide insulation from electrical current. For electrical applications, use only insulated screwdrivers designed for the purpose.
- Always use safety goggles to protect your eyes.

## CHROME SOCKETS

### CAUTION!

- Use only the proper type of socket for the application. All chrome-plated sockets are for hand use only. Do not use chrome sockets or drive tools with impact or power tools. Such use damages the tool and may result in bodily injury.
- Do not use pipes or other extensions to increase leverage on the ratchet.
- Always use safety goggles to protect your eyes.

## IMPACT SOCKETS

### CAUTION!

- Use only the proper type of socket for the application. All impact sockets are for use with impact drivers only. Do not use impact sockets with chrome ratchets or power tools. Such use damages the tool and may result in bodily injury.

- Do not use pipes or other extensions to increase leverage on the ratchet.
- Always use safety goggles to protect your eyes.

## STRIKING AND STRUCK TOOLS, PUNCHES/CHISELS

### CAUTION!

- Always select the correct style and size of punch or chisel for the job. Punches and chisels can break, chip or mushroom when struck. Do not use a damaged or mushroomed punch or chisel. File edges or mushroomed ends to original shape with a hand file.
- Do not strike a punch or chisel with any object or any tool that is not designed for the purpose. Oversized hammer can chip the punch or chisel. Hammer head should be approximately  $\frac{3}{8}$ " larger in diameter than the head of the punch or chisel in use.
- Always use safety goggles to protect your eyes.
- Steel punches and chisels can cause sparks during use. Do not use near flammable substance as sparks can ignite substance, causing bodily injury.

## HAMMERS

### CAUTION!

- Hammers can cause flying chips. Strike squarely and avoid glancing blows.
- Chipped, mushroomed or cracked hammers can cause flying chips that can result in bodily injury.
- Always use safety goggles to protect your eyes.
- Steel hammers can cause sparks during use. Do not use near flammable substance as spark can ignite substance, causing bodily injury.
- Do not use polyurethane hammers near liquid oxygen. Polyurethane hammers can rupture or ignite if exposed to liquid oxygen, and can cause bodily injury.

## WRENCHES

### CAUTION!

- Do not use pipes or other extensions to increase leverage on the wrench. Such use damages the tool, and may also result in bodily injury.
- Always wear safety goggles to protect your eyes.
- Do not over-torque.
- Mismatched, dirty or partially worn parts can cause wrench to slip or break, and bodily injury may result.

### LIMITED LIFETIME WARRANTY

SK® Hand Tool, LLC products, except as otherwise specified, are warranted under normal use and service against defects in materials and workmanship for the expected life of the tool. This warranty does not cover wear from normal use, or any problems caused by misuse, abuse, modification or improper maintenance of the tool.

### EXCEPTION

For only a period of one year after the date of purchase, storage products, micrometer torque wrenches, dial torque wrenches, torque screw drivers and consumable products that are reasonably expected to be used up or damaged during use are warranted under normal use and service against defects in materials and workmanship. This warranty does not cover wear from normal use, or any problems caused by misuse, abuse, modification or improper maintenance of the tool.

### EXCLUSIVE REMEDY

Your sole and exclusive remedy for any breach of this warranty is that S•K will, at its sole option, either repair or replace the defective tool, or refund your purchase price, if you return the tool to an authorized S•K warranty station. Contact SK® Hand Tool, LLC Customer Service at 800-822-5575 to obtain information regarding authorized warranty stations. No consequential, incidental, special, or punitive damages, or damages for property loss or personal injury, can be recovered under this warranty.

### ABUSE AND MISUSE

Abuse or misuse of any tool may cause serious or fatal bodily injury, as well as significant property or environmental damage. SK® Hand Tool, LLC will not condone or support the abuse or misuse of any S•K product. Using a tool for the sole purpose for which it was designed is extremely crucial. Any tool that appears to have been used for any purpose other than that for which it is intended will not be accepted for warranty replacement, repair or reimbursement. Safety tips and disclaimers are found throughout the S•K product catalog and the SKtools.com website. S•K does not warrant abused and misused tools that could cause injury or threaten the safety of an individual or the environment.

### TORQUE PRODUCT FACTORY REPAIR

Due to the wide variety of torque measuring and limiting devices that SK® Hand Tool, LLC offers we utilize different service centers that specialize in each product category. Please refer to the chart below for specific warranty center or contact one of our S•K customer service representatives at 800-822-5575 for further assistance.

### WARRANTY PROCESS

You may take your warranty item(s) to your local S•K dealer or you may send them directly to:

**SK® Hand Tool, LLC**  
**1600 South Prairie Drive**  
**Sycamore, IL 60178**

Make sure to include your name, address and phone number inside the package. In most cases warranty claims are processed within 2-3 weeks, but in rare instances may take up to 8 weeks depending on product availability. If your warranty involves a ratchet or breaker bar please call first as it most likely can be fixed with a repair kit that we can send to you. Please note that you can request repair kits to be sent to you at any time.

For all other warranty inquiries, please contact:

**SK® Hand Tool, LLC Customer Service**  
**Phone: 800-822-5575 | Fax: 800-752-2434**  
**Email: customerservice@skhandtool.com**

Agents and distributors of S•K tools have no authority to make representations or warranties other than those contained in this warranty.

THIS LIMITED WARRANTY IS MADE IN LIEU OF ALL OTHER WARRANTIES, WHETHER ORAL, WRITTEN, EXPRESSED, OR IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY. If you are a consumer this warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
