# YOUR BEST WORK YET. NEEDS YOUR TOTAL FOCUS

The safety and productivity of every professional worker is our goal. Our mission is to design products that deliver on this goal. We are always finding better ways to help increase worker productivity and safety.

Every day, hundreds of professional workers are injured at work— industrial accidents are avoidable.

Our goal is to ensure that you return home after a safe and productive day at work in the same healthy condition as you went to work.

Legislation and regulation continue to increase safety at work, and all of our products will meet or exceed the necessary levels.

We will also work to ensure that all of our distributors receive product knowledge training to ensure they provide the right product for the right application. We are committed to understanding the needs of the professional end users.

When workers are confident that their PPE is designed with their health and safety in mind, they can concentrate on the job at hand, achieving maximum productivity.

## The World's Greatest Ratcheting Headgear System—Period!

Our patented Jackson Safety® 370 Speed Dial™ offers the fastest, easiest, and most efficient ratcheting headgear system in the industry today! The 370 Speed Dial™ incorporates two unique designs—an oversized ratcheting adjuster knob, and a patented "quick-fit" rear headband that swivels up and down. Together, these two features combine to achieve a perfect fit every time, increasing safety, productivity and satisfaction. Try any of our industry-leading Jackson Safety® products that incorporate our famous 370 Speed Dial™ and experience the difference yourself!

The 370 Speed Dial™ ratcheting headgear can be found on these exclusive Jackson Safety® industry-leading products. More new products coming soon!

# QUAD™ 500 FACE SHIELDS— SUPREME MULTI-PURPOSE

**NEW!**

## Quad™ 500 Multi-Purpose Face Shield System

- Jackson Safety® introduces the all new Quad 500 multi-purpose face shield, our premium face protection product
- The Quad 500 offers an unparalleled range of face and eye protection solutions for almost every application including grinding, cutting, oxy/acetylene cutting, plasma cutting, and brazing
- All Quad 500 products have been designed to offer maximum above-the-neck face protection, including an extra-large molded polycarbonate window featuring our premium Sta-Clear® anti-fog coating
- For added protection, the molded window is completely framed on the sides and chin and features an extra-large crown
- The Quad 500 offers exceptional panoramic views with virtually no distortion

## Featuring the exclusive Jackson Safety® 370 Speed Dial™ ratcheting headgear system!

- The Quad 500 features the Jackson Safety® 370 Speed Dial™ ratcheting headgear system—an industry best!
- The 370 Speed Dial™ is highlighted by Jackson's famous "Easy Grab-Easy Turn" oversized adjusting dial and patented swivel adjuster band, achieving maximum comfort and fit quickly, easily, and conveniently—saves time, increases productivity, and improves worker safety!

**370**  
SPEED DIAL

## Available with optional flip-up/flip-down extra-large IR window

- The Quad 500 face shield is also available with an exclusive, extra-large flip-up/flip-down IR window for added eye protection when used in applications producing infrared hazards
- It's easy and safe—by keeping the Quad 500 clear window in the down position at all times, the operator can flip the IR shaded window up or down, providing uninterrupted face protection during cutting and grinding operations
- Flip windows available in:
  - **Shade 5 IR** for oxy/acetylene cutting, brazing, and plasma cutting
  - **Shade 8 IR** for oxy/acetylene welding and plasma cutting
- Both the clear and flip windows feature detents that lock in both the up and down positions
- Designed to be used with most goggles, respirators, and all safety glasses
- Two available mounting options:
  - Complete with Jackson Safety's premium 370 Speed Dial™ ratcheting headgear suspension
  - For mounting on slotted hard hats, assembled with Jackson Safety's exclusive HHIS slot adaptors
- All models meet or exceed **ANSI Z87.1+ high impact** standards
- Models 14220, 14230, 14233, 14235 **CSA certified to CAN/CSA Z94.3** standards
- Models 14220, 14230, 14233 **CE certified**

## DP4 FACE SHIELDS— PREMIUM MULTI-PURPOSE

S32010

### DP4 Multi-Purpose Face Shield System

- Sellstrom's exclusive multi-purpose DP4 face shield system has been an industry leader for more than 15 years
- The DP4 offers an incredible range of face protection solutions

### DP4 Face Shield Only

- As a standard face shield, the DP4's specially designed molded polycarbonate window curves naturally to fit facial contours
- Offers exceptional panoramic views with virtually no distortion
- Window meets high-impact standards and is chemical resistant
- Available in three full-sized window options: clear anti-fog (S32010), Shade 3 IR (S32030) or Shade 5 IR (S32050)
- Standard DP4 face shields feature a premium ratcheting headgear for maximum operator comfort and convenience
- Model S32261 **CSA certified**

## FACE SHIELDS—PREMIUM MULTI-PURPOSE

### DP4 Face Shield with Flip-Up/Flip-Down IR Windows

- The DP4 face shield is also available featuring a unique spring-mounted flip-up/flip-down IR window (4.375" x 9.25" x .070")
- It's easy and safe—by keeping the full size DP4 clear window in the down position at all times, the operator can flip the spring-mounted IR Shaded window up or down, providing uninterrupted face protection during cutting and grinding operations
- Flip visor available in:
  - **Shade 5** IR for: oxy/acetylene cutting, brazing and plasma cutting
  - **Shade 6** IR for: oxy/acetylene cutting, brazing and plasma cutting
  - **Shade 8** IR for: oxy/acetylene welding and plasma cutting
  - **Shade 6B Cobalt Blue** for: oxy/acetylene welding of aluminum and cast iron, in metal and glass furnace foundry work
  - Cobalt Blue diffuses the orange glow associated with the sodium in molten metal and glass
- DP4 multi-purpose face shields are available in two mounting options: premium ratcheting headgear suspension or exclusive universal slot adaptors (for mounting on slotted hard hats)

### DP4 Face Shields Now Available With Optional Chin Guard

- All DP4 face shields can be fitted with optional chin guard (S32200) for added below-the-neck protection during cutting and grinding operations
- DP4 Face shields can be ordered with the chin guard included, or if you already own a DP4 face shield, the chin guard can be ordered separately and easily attached by the operator

### DP4 Safety Standards

- All models meet or exceed **ANSI Z87.1+ high impact** standards
- Models S32010, S32151, S32181, S32251, S32281 **CSA certified to CAN/CSA Z94.3** standards
- Model S32010 **CE certified**

# MAXVIEW™ FACE SHIELDS—PREMIUM

**NEW!**

## Maxview™ Face Shield System

- Jackson Safety® introduces the all new Maxview face shield, a premium face protection product
- The Maxview is designed to offer maximum face protection coverage, incorporating an extra-large clear polycarbonate window that is available in two options: without anti-fog treatment or with our premium Sta-Clear® anti-fog coating
- The high-impact PC window is then framed on the side and chin areas and features an extra-large crown
- This combination translates into maximum coverage, head to lower neck, and side to side. In fact, Maxview offers a full 1" of extra window protection on each side (2" total) versus the leading face shield model, ensuring best-in-class protection and exceptional panoramic views. Check and compare!
- Given its amazing coverage and viewing area, the Maxview is incredibly light
- Maxview incorporates engineered detents that lock in both the up and down positions
- Designed to be used with most goggles, respirators, and all safety glasses
- Two available mounting options:
  - Complete with Jackson Safety's premium 370 Speed Dial™ ratcheting headgear suspension
  - For mounting on slotted hard hats, assembled with Jackson Safety's exclusive HHIS slot adaptors

## Featuring the exclusive Jackson Safety® 370 Speed Dial™ ratcheting headgear system!

- The Maxview face shield features the Jackson Safety® 370 Speed Dial™ ratcheting headgear system—an industry best!
- The 370 Speed Dial™ is highlighted by Jackson's famous "Easy Grab-Easy Turn" oversized adjusting dial and patented swivel adjuster band, achieving maximum comfort and fit quickly, easily, and conveniently—saves time, increases productivity, and improves worker safety!

- All models meet or exceed ANSI Z87.1+ high impact standards
- Models 14200, 14201 CSA certified to CAN/CSA Z94.3 standards
- Models 14200, 14201 CE certified

Hard Hat Interchange system available

- Windows attachment pattern exclusive to Sellstrom's 380 Series crown

PRODUCT NO.	Window Dimensions	Tint	Coatings	Case Qty.
<b>S36000</b>	6.5" x 19.5" x .040"	Clear	Uncoated	125
<b>S36020</b>	6.5" x 19.5" x .040"	Dark Green†	Uncoated	125
<b>S36040*</b>	6.5" x 19.5" x .040"	Clear	Sta-Clear™ Anti-Fog	125
<b>S36050</b>	6.5" x 19.5" x .040"	Shade 5 IR	Uncoated	100

†Not for use as IR protection

**Please note:** For replacement ratcheting headgear, use #S27051.

\*Anti-fog windows use an acetate window instead of a polycarbonate window.

Single crown style is lightweight and allows for increased air circulation

Impact resistant polycarbonate windows available in clear, anti-fog, and Shade 5 IR

Meets ANSI Z87.1+ high-impact standards and CUL certified to meet CAN/CSA Z94.3 standards

Available with adjustable ratchet headgear suspension for a custom fit at the turn of the knob.

Patterned pin mount design allows for quick and simple window replacement—requires no tools

# 390 FACE SHIELDS— PREMIUM SINGLE CROWN

## 390 Series Face Shields

- Sellstrom's 390 Series face shields have been the industry standard for decades
- **Made in the USA**, these premium face shields are manufactured using superior polycarbonate windows
- Anti-fog models are treated using an exclusive Sta-Clear<sup>®</sup> chemical solution that is superior to other anti-fog treatments
- These face shields are virtually 100% fog free
- The shield curves naturally to fit facial contours—excellent protection from splash, chemical splash, particles and flying debris
- Extra-large high impact crown provides excellent above-the-head coverage
- Complete units available with standard 8" x 12" x .040" clear, Sta-Clear<sup>®</sup> Anti-Fog, and Shade 5 IR windows
- Extra-large 8" x 16" x .040" windows are also available (optional)
- Windows attach using exclusive Sellstrom patterned pin mount design
- Headgear models available with pinlock or Sellstrom's exclusive ratcheting headgear suspensions (S27051)
- All models meet or exceed **ANSI Z87.1+ high impact** standards
- Models S39110, S39140, and S39150 **CSA certified to CAN/CSA Z94.3** standards

FACE PROTECTION

## 312 FACE SHIELDS— PREMIUM ARC FLASH RATED

### 312 Series Arc Flash Rated Face Shields

**ARCFLASH™**

- Sellstrom Arc Flash-rated face shields provide protection from low level arc flash hazards
- Arc flash is created by an electric arc and can result in an explosive condition releasing electromagnetic energy, fragments and molten metals that can cause serious injury
- Sellstrom Arc Flash face shields feature a unique, molded high-impact and splash resistant polycarbonate window
- Provides optimum clarity with no distortion and panoramic vision
- Specially formulated window incorporates a light green tinted window that allows 55% light transmittance and true color optics
- These true color optics allow the operator to see all colors perfectly. This is critical when working around color coded wiring in electrical applications
- Two window versions: 9.9 Cal/cm<sup>2</sup> and 12 Cal/cm<sup>2</sup> ATPV rating
- Face shield curves naturally to fit facial contours, providing superior protection
- Available with or without hard hat, with a dielectric hard hat adaptor

S31200

### 312 Standards

- All product meets **ANSI Z87.1+ high-impact** standards, tested and certified to **ASTM F-2178** specifications and **NFPA 70E-2009** standards

## Hard Hat Interchange System

**The All-In-One Safety Solution.** Injuries can happen in a split second. Now it's easy to stay protected with the Jackson Safety® Hard Hat Interchange System. It lets you add, remove, or switch between your face shield or welding helmet, without removing your head protection.

In accordance with ANSI Z87.1, the system was designed to protect against multiple combinations of hazards. Remain safe, productive, and compliant with the Hard Hat Interchange System. It's worker preferred and safety manager enforced.

- Quickly switch between face shields and welding helmets without removing hard hats
- Meets ANSI standards when PPE products are used separately or combined
- Hear the audible click—Know your PPE is assembled correctly without the need for visual inspection
- One-button action provides quick release
- Vertical lock-in eliminates the annoyance of helmet creep
- HHIS headgear system comes fully assembled and ready to use
- Made from lightweight polypropylene
- Dielectric—Keeps your hard hat Class E rated!

# JACKSON® SG SAFETY GLASSES—PREMIUM

### JACKSON® SG Series Safety Glasses

- Introducing the all new JACKSON® SG series, a premium eye protection product offering outstanding fit, comfort, protection, style, and durability
- Specially designed to offer maximum eye coverage and protection, incorporating a variety of lens shades and coatings
- Made with premium virgin polycarbonate high impact, optically correct wrap style lenses, providing 99.9% UV protection
- Soft temples are curved inwards from front to back to ensure a super comfortable, slip-resistant fit
- As an added advantage, the temple tips are extremely flexible, further ensuring a snug fit while relieving any undue pressure to the user—these glasses are extremely comfortable and stay on during use!
- Frames have been developed using a specially formulated ultra-flexible, ultra-strong base material that provides incredible durability, significantly reducing breakage—check and compare!
- The lightweight frame includes a soft non-allergic nose pad for maximum comfort and fit
- Each safety glass comes complete with a convenient neck strap—no more misplaced or lost glasses!
- All models meet or exceed **ANSI Z87.1+ high impact** standards
- Models 50000, 50001, 50002, 50004, 50006, 50010, 50040, 50041, 50042 are **CSA certified to CAN/CSA Z94.3 standards**
- Models 50000, 50002, 50004, 50005, 50006, 50008, 50009, 50010; 50040, 50041, 50042 **CE certified**
- Available in three styles—framed, framed polarized, and frameless

**Extreme Flexibility and Strength for Maximum Durability and Life!**

## SAFETY GLASSES— PREMIUM SEALED

S71910

- Sealed safety glasses offer the best of both worlds—the comfort and fit of a safety glass with goggle-like protection
- Features a fire-resistant closed cell foam insert that seals the glass to your face
- Provide maximum protection in dusty, windy conditions and wherever airborne particles are present
- Foam insert features top and bottom vent ports allowing superior air circulation
- Curved, custom molded high-impact polycarbonate lenses provide exceptional panoramic views
- Made with premium virgin polycarbonate high-impact lenses
- Lenses are specially coated with Sellstrom's premium Sta-Clear® anti-fog/anti-scratch washable lens treatment for maximum performance, durability, and life
- Virtually 100% fog free for optimum operator safety
- Provide 99.9% UV protection
- All models meet or exceed **ANSI Z87.1+ high impact** standards, **CSA certified to CAN/CSA Z94.3** standards and model XPS502 is tested to the **U.S. Military Standard MIL-PRF-31013** safety requirement of 640 feet per second

**FOG FREE!**

## SAFETY GLASSES—PREMIUM SEALED

### XPS502 Sealed Safety Glasses

- Features flexible, soft temples that are permanently attached to the frame using a heavy-duty ratcheting (up or down) temple adjustment hinge
- Allows the user to adjust temples for maximum comfort and protection
- Includes a cloth strap that conveniently attaches to the temples
- Detachable strap can be easily removed/re-attached as desired
- Ballistic Rated—meets **US Military Standard MIL-PRF-31013** requirement
- 12/box, 144/case

## GERMICIDAL CABINETS

S90494

### Monitor™ Germicidal Cabinets

- **Made in the USA**—Sellstrom's Monitor Series Germicidal Cabinet has been the industry leader for decades
- Germicidal cabinets sanitize goggles/safety glasses for next use
- Kills 99.4% of germs during the timer controlled cycle in five minutes—**third party tested**
- Sanitizes eyewear surfaces from germs, bacteria, mold, and fungus contaminants
- Sturdy 22-gauge white enameled steel cabinet features interlocking doors
- Features tamper-resistant latches with two keys provided
- Multiple units are keyed alike
- Zero UV radiation escapes during use
- Equipped with automatic shut-off if doors are opened
- Pilot light confirms UV lamp is in use on the Monitor 2000
- Wall or shelf mountable and includes 7' (2.13m) grounded cord
- For indoor use only; temperature range 32° to 104° Fahrenheit

# GERMICIDAL CABINETS

## Monitor™ 2000 Germicidal Cabinet

- The Monitor 2000 has been the top selling germicidal cabinet for decades
- Specially designed for educational and medical industry applications
- Larger 32"H x 24.5"W x 9.5"D format includes eight shelves total
- Each shelf holds approximately five goggles or six safety glasses
- Sanitizes goggles/safety glasses for next use in just five minutes, an industry best
- Underwriters Laboratory listed and **CUL certified**

## Optional Magnetic Hooks for Hanging Face Shields in Monitor Cabinet—NEW!

- Allows use of Monitor 2000 germicidal cabinet to sanitize face shields instead of glasses and goggles
- Set of four magnetic hooks allows sanitization of up to four face shields during the five-minute cycle time
- It's easy—simply remove the glasses and goggle rack from the Monitor 2000
- Space the four magnetic hooks in a pattern that allows up to four face shields to fit inside the cabinet
- Four magnetic brackets are designed to mount on the metal back wall of the cabinet
- Hang the face shields, close the door, set the timer, and after five minutes, away you go!
- Option expands the range of products that can be sanitized to include safety glasses, goggles, and now face shields
- The following Jackson and Sellstrom face shields have been tested and certified with the Monitor 2000 cabinet, effectively killing 99.4+% of germs:
  - Jackson Quad 500, Maxview, F4XP, MFS320, 14955, 14957
  - Sellstrom 301, 303, 380, 390, and DP4 Series

Water flow is activated by pulling down yellow tray

Complies with ANSI Z358.1

Delivers 14 gallons of water over 15-minute period

Dual spray heads

S90320  
16-Gallon Portable Eyewash Station

## EMERGENCY EYEWASH

- The proper selection of emergency eyewash stations is critical when operating a safe working environment
- OSHA regulations listed in 29 CFR outline where and when eyewash equipment must be installed
- ANSI Z358.1 (Emergency Eyewash and Shower Equipment) is the standard that outlines the proper design, performance, and installation of emergency equipment to comply with the OSHA standard
- Sellstrom offers a wide range of emergency eyewash solutions, all of which are designed to meet the ANSI standards

### EYEWASH STATIONS—PORTABLE EMERGENCY

#### Gravit-Eye 6-Gallon Portable (Personal) Gravity Feed Eyewash Station

- Six-gallon, gravity-flow personal portable eyewash station
- Ideal as a portable, first response eyewash solution
- Water stream is activated by removing the water retaining strap
- Water is fed through dual spray heads for maximum effectiveness
- 3' drain hose directs waste water into floor drain or storage tank
- Furnished with epoxy coated steel wall mounting bracket
- Can also be placed on flat surfaces such as counter tops
- Comes with 8 oz. bottle of bacteriostatic additive (S90322), which protects against growth of bacteria, fungus, algae and acanthamoeba
- Weight: 9.5 lbs. empty
- Complies with ANSI Z358.1 for portable personal eyewash stations

## EYEWASH STATIONS—PORTABLE EMERGENCY

### Gravit-Eye 16-Gallon Portable Gravity Feed Eyewash Station

- 16-gallon, self-contained gravity-flow portable eyewash station
- Water is fed through dual spray heads for maximum effectiveness
- Delivers over 14 gallons (53 litres) of water over a 15-minute period
- High-viz green body is easily located in case of emergency
- Heavy wall construction with reinforced ribs ensures strength and durability
- Water flow is activated by pulling up (on) or down (off) on bright yellow tray
- Integrated full flow nozzle delivers gentle spray of water
- Waste water is directed through drain opening in tank basin
- 3' drain hose directs waste water into floor drain or storage tank
- Furnished with steel wall mounting bracket
- Can also be placed on flat surfaces such as counter tops
- Comes with 8 oz. bottle of bacteriostatic additive (S90322) which protects against growth of bacteria, fungus, algae and acanthamoeba
- Weight: 13 lbs. empty, 146 lbs. full
- Unit comes completely assembled
- Complies with **ANSI Z358.1** for portable eyewash stations

## EYEWASH STATIONS—PORTABLE BOTTLES

### Rapid-Clear Portable Eyewash Bottle Stations

- Personal eyewash bottle stations are extremely portable and handy
- Quickly flushes contaminants from eyes using a sterile, buffered and preserved saline solution
- The ideal first response solution when continuous water supply is not available
- Single or dual bottle stations available
- Date coded for easy inspection
- Tamper-evident seal with an easy-to-open twist off cap
- Highly visible green plastic backboard can be wall mounted or placed on flat surface
- **FDA approved**

**HEARING PROTECTION**

**SOME SOUND  
ADVICE**

20774

67212

67220

523410

523403

## HEARING PROTECTION

### What You Should Know About Hearing Protection!

- Exposure to continuous high noise levels causes irreversible hearing loss
- Developing an effective workplace hearing safety program is critical
- OSHA sets the permissible eight-hour work day noise exposure level at 90 dBA and only two hours of exposure to 100 dBA
- Many companies place noise level limits even lower than the OSHA standard
- Here are guidelines that some companies apply for increased safety
  - 8 hours exposure = 85 dBA
  - 4 hours exposure = 88 dBA
  - 2 hours exposure = 91 dBA
  - 1 hour exposure = 94 dBA

### About NRR Ratings and Their Practical Application in the Field

- The NRR ratings found on many hearing protection products in the market, including Jackson and Sellstrom, have been tested and certified in controlled laboratories
- However, working environments are seldom controlled environments
- In the field, hearing protection is not always fitted properly, leading to noise creep and the potential for hearing damage
- As a precaution, NIOSH recommends the following deratings during field use:
  - Ear Muffs—NIOSH recommends derating NRR ratings by 25%
  - Earplugs—NIOSH recommends derating NRR ratings by 50–75%
- In some applications, to achieve maximum protection, the use of earplugs and muffs together may be the safest solution. It is estimated that by combining the two, an extra 5 dBs can be added to the overall tested NRR rating

### What Level of Protection Do You Need?

All hearing protectors sold by Jackson Safety and Sellstrom are tested to the American National Standards Institute (ANSI) S3.19-1974 Standard to receive a Noise Reduction Rating (NRR), which is labeled on all such products as required by the U.S. Environmental Protection Agency (EPA).

This number gives the consumer a method to judge performance among different models of hearing protectors—a higher NRR indicating more effective protection against sound. Some models of hearing protectors have multiple NRR numbers. This reflects the fact that these hearing protectors may be worn with their headbands in different positions.

### Hearing Loss is Forever—Take Prevention Seriously!

Hearing protection should be taken very seriously and protectors, either muffs or plugs, should be comfortable to wear and offer sufficient attenuation to prevent hearing loss based on individual protection needed.

## EARPLUGS—PREMIUM DISPOSABLE

### Disposable Earplugs—Bullet Shape

- Contoured bullet shape premium quality polyurethane earplugs
- Gently but quickly expands to fit ear canal—one size fits all!
- Soft, non-irritating PU foam for maximum comfort
- Available corded and uncorded
- Plugs are individually packed in pairs and sold:
  - Uncorded = 200 pairs in convenient dispenser box
  - Uncorded = 500 pairs in bulk bag (replacement plugs for dispenser)
  - Uncorded = 500 pairs in convenient see-through wall dispenser
  - Uncorded = 10 pairs in retail slide blister package
  - Corded = 100 pairs in convenient dispenser box

## EARPLUGS—PREMIUM BANDED

### Banded Earplugs

- Banded earplugs are designed to wear around the neck when not in use
- Ensures workers always have quality hearing protection when required
- Ideal for regular and intermittent applications—easily installed or removed
- Compliance enforcement is made easy due to the Hi-Vis green band
- Specially designed band shape is curved at the plug end—keeps the ear pods up and away from dirty and contaminated surfaces when not in use
- Comfortable blue earplugs/pods are easily replaced when dirty (S23431)
- Used extensively on construction work sites, at airports and race tracks, in factory and shop applications, and wherever reusable ear protection is required
- Independently tested/certified to **NRR 25 (ANSI S3.19)**
- **CSA Class AL**

# EAR MUFFS— SUPER PREMIUM DIELECTRIC

20774

20775

## H70 Vibe<sup>®</sup> Premium Dielectric Ear Muff

**\*\*\*  
BEST**

- Jackson's exclusive H70 Vibe<sup>®</sup> ear muffs offer premium comfort, fit, and protection
- Stylish, modern lightweight design
- Dielectric durable thermoplastic material protects you from electric shocks and shorts
- Headband, swivel fork arms, and cup pads have been carefully designed to deliver strength, durability, consistent noise reduction, and most importantly, to offer a comfortable snug fit with minimal pressure for all-day comfort
- Cup pads are super soft and comfortable—ideal for extended use
- Easily adjustable for quick and convenient positioning
- Features soft foam headband padding for maximum operator comfort and style
- Independently tested/certified to **ANSI S3.19**
- Available in both banded and hard hat cap mount format for use with slotted hard hats such as Jackson's SC-6
- Available in three popular NRR ratings
- Comes in four-color box with integrated fold-out hang tag
- **CE certified**

**Types & Class Standards**

Protective hard hats are classified according to the specific impact and electrical performance requirements they are designed to meet. All protective hard hats in accordance with this standard shall meet Type I impact requirements. In addition, all hard hats are further classified as meeting Class C, Class G, or Class E electrical requirements.

**Impact Types**

**Type I:** Hard hats intended to reduce the force of impact resulting from a blow only to the top of the head.

**Type II:** Hard hats intended to reduce the force of impact resulting from a blow which may receive limited protection odd center, lateral, or to the top of the head.

**Electrical Classes**

**Class C (Conductive):** Class C hard hats are not intended to provide protection against contact with electrical conductors.

**Class G (General):** Class G hard hats are intended to reduce the danger of contact exposure to low-voltage conductors. Test samples are proof-tested at 2,200 volts (phase to ground). However, this voltage is not an indication of the voltage at which the hard hat protects the wearer.

**Class E (Electrical):** Class E hard hats are intended to reduce the danger of exposure to higher-voltage conductors. Test samples are proof-tested at 20,000 volts (phase to ground). However, this voltage is not intended as an indication of the voltage at which the hard hat protects the wearer.

**Optional Standards**

**Reverse Donning:** Reverse-wearing option hard hats must pass force transmission requirements whether they are worn facing forward or backwards in accordance with the manufacturer's wearing instructions.

HEAD PROTECTION—CLIMBING STYLE INDUSTRIAL HARD HATS

CH HARD HATS—INDUSTRIAL "CLIMBING" STYLE

**NEW!**

**COMING SOON!**

CH-400V "Climbing Inspired" Industrial Hard Hat—Vented

- Introducing Jackson's new ultra-modern "climbing inspired" industrial hard hat
- Lightweight, molded from high-quality ABS materials
- Unique sliding vent hole system allows operator to open vents when working in direct sun/hot dry climates—or closed when used in cold or rainy conditions
- Super comfortable 6 pt. ratcheting suspension fits head sizes 6-1/2 to 8
- Rapid-Dial ratcheting headgear—just grab and adjust, even with gloves on
- Comfortable and convenient chin strap with molded chin cup for added security
- Comfortable, replaceable sweatband
- More comfortable than "traditional" hard hats
- Four external clips are strategically positioned to securely fasten elastic straps found on LED lighting systems
- Slotted adapters allow use with multiple Jackson and Sellstrom hard hat accessories including face shield adapters, ear muffs and Safe 2 System
- Multiple accessories available, including ear muffs and face shield adaptor systems
- Dual rear slots allow use of optional red reflector for improved safety
- Hi-Vis reflective tape kit available for added safety
- Ideal for at-height and scaffolding work, confined space applications, construction sites requiring chin straps, and general all-around head protection
- Meets ANSI Z89.1, Type 1, Class C

R30	<b>64520</b>			●			●	Single

#### Introducing

#### The New R10 N95 Standard For All-Day Comfort, Fit, and Safety!

That's right! Jackson Safety is pleased to introduce an all-new N95 NIOSH-approved foldable disposable respirator designed for maximum all-day comfort. When your job requires the wearing of a protective mask, our Jackson 64235 introduces a new ultra-soft, ultra-comfortable respirator that significantly reduces facial irritation and discomfort. The pouch-style breathing chamber offers exceptional breathability while at the same time ensuring a minimum 95% filtration efficiency.

Look at these outstanding features:

- Ultra-soft non-irritating lining offers superior comfort over traditional N95 respirators
- Pouch-style breathing chamber provides exceptional breathability—check and compare!
- Two 1/2" extra-wide head straps and an adjustable nose clip further improves comfort and helps to ensure a tight facial seal, preventing leakage around the mask edges
- Nose clip reduces potential fogging of glasses and face shields
- Unlike traditional N95 masks, these respirators fold flat, reducing storage space requirements and shipping costs, as well as reducing the chance of product damage
- N95 NIOSH rating provides a minimum 95% filtration efficiency of 0.3 micron particles
- Features two layers of electrostatically treated melt-blown filter media,
- A single-use respirator designed for use by skilled professionals in critical environments who are mandated to wear specific PPE to protect against the transfer of aerosolized solid and non-oil based liquid/particulate matter
- Compatible with a variety of SureWerx protective eyewear and hearing protection
- Packed 50 per bag, 6 bags (300 pieces) per case
- **Disclaimer: Not intended for medical use**

### KneePro Ultra Flex III Knee Pads

- Sellstrom's **KneePro Ultra Flex III** knee pads have been the industry standard for more than 30 years
- Simply the best knee pads made!
- The articulating hinged design ensures proper placement all day long—set them once and forget you are even wearing them
- Soft elastic, extra-wide woven straps with reinforced sewn ends are placed well above and below the knee—no Velcro, which contaminates over time
- Straps stay aligned with your legs in any position—will not bind behind the knee
- Built with strong, flexible hard plastic outer shells that extend well above, below and to the inside/outside of the knee for added knee and leg protection
- Metal rivet hinge ensures long lasting protection while kneeling or walking
- On the outside, pads feature a perfectly placed curved non-marking Grip Strip
- Grip-Strip designed for use in all applications without gumming up
- Grip Strips are easily replaceable
- On the inside, pads offer a long lasting 5/8" closed cell foam pad for maximum comfort and protection (KneePro Ultra Flex III version)
- Sweat does not penetrate closed cell foam—lasts longer and won't "stink"
- **Our KneePro Hybrid Ultra Flex III** version offers even greater user comfort and protection through the use of a three layer, 3/4"-thick closed cell foam pad with built-in gel packs—the ultimate in knee protection!
- Virtually indestructible—built for years of hard work and heavy use
- Specially designed Quick-Snap clips ensure quick and easy removal
- Comes in convenient, reusable mesh bag with one extra Quick-Snap clip
- Pads weigh only 9 oz. each
- Straps, Grip Strips, and speedclips are replaceable
- Excellent for welders, ship builders, roofers, construction workers, flooring installers, and anywhere hard-working knee pads are required

## KNEE PADS—SPECIALTY

FOR  
**HIGH HEAT**  
APPLICATIONS

### KneePro Roofers Knee Pads

- The KneePro Roofers vented foam rubber knee pads are specially designed for the tough roofers industry
- Manufactured using a special grade of ultra-dense rubber, offering extreme durability
- Non-marring rubber leaves no transfer on surfaces
- Inner pads are serrated, creating channels that allow air to flow through the pad
- These channels dissipate heat, creating a cooler working environment at the knee
- Ideal for roofers working in high-heat applications
- Straps are located to allow the calf muscle curvature to help hold the pads in place without pinching the knee joint
- The upper end of the pads is hooked upward and inward to help hold the pads in place on the knee
- Weight—1.25 lbs. per pad, 2.5 lbs. per pair
- Ideal for roofers, welders, and anyone kneeling on heated surfaces

## KNEE PADS—ADVANTAGE SERIES

### KneePro ZeroGravity Lightweight Knee Pads

- The KneePro ZeroGravity knee pad is one of the lightest yet toughest knee pads on the market today—weigh only 2 oz. each
- So light, you won't even know you have them on!
- The outer shell is made using a durable, heat-formed, non-marking material for maximum life
- The inner closed cell foam protective pad is a full 1/2" thick for superior comfort
- Pad is molded to contour of knee, which helps it to stay in place during use
- Revolutionary new fastening system pops in and out like a button for easy and convenient on/off action
- To adjust the strap, simply pull the strap end to a comfortable size
- Extra-wide, soft woven elastic cloth strap for improved comfort and fit
- Economically priced but built for hours of long-lasting protection and comfort
- Ideal for roofing, plumbing, flooring, tiling, gardening, carpentry, electrical work, maintenance, and home repair

## ArmorPro Tactical Elbow Pad

# ArmorPro

- The ArmorPro Tactical Elbow Pad is the ultimate in elbow and arm protection
- The 11" long, abrasion-resistant foam and rubber body protects most of your arm
- Secures to your body with comfortable extra-wide top and bottom cinch straps
- Pull tabs help with adjustment even when wearing gloves
- Pad stays in position until **you** decide to change or remove
- Body is extremely flexible, becoming an extension of your arm
- Elbow protecting cap slides up and down for personal adjustment, comfort, and fit:
  - Shift cap to upper position for arm protection during belly crawl, or
  - Lower position for sniper stand off—your choice, your comfort
  - Tough grip cap holds your elbow in place on any surface
- Lightweight and cool—only weighs 7 ounces (each pad)
- Available in four colors: Black, OD Green, Tan and Foliage/Coyote Brown

**WARNING:** Due North® traction aids help give you traction on ice, snow, or similar porous surfaces. However, because NO product can completely prevent a slip or fall on slippery surfaces, remember to exercise care when walking or running in Due North® traction aids. Caution should also be taken when moving on any hard or polished surface, such as granite or marble, on ladders, or when driving a vehicle. Use care, as these traction aids are sharp and may injure or damage flooring, surfaces, or skin. Due North® traction aids are not to be used for mountaineering or hiking, in rocky terrain, or when the user may encounter steep up or down slopes. Due North® traction aids are not designed or intended to be used on high heel footwear. This product contains latex.

# SLIP PROTECTION

# KEEPING YOU GROUNDED

# ICE TRACTION AIDS

## Superior in all ways!

- Exclusive "military grade" tungsten carbide replaceable spikes for superior strength
- Extra-strong spike material allows Due North to use a smaller diameter spike, resulting in faster, easier ice penetration while ensuring longest life!

Replaceable ICE DIAMOND™ tungsten-carbide spikes

Due North products are manufactured using exclusive, specially formulated 100% rubber

Exclusive "Pulse Grip" tread design over a larger surface area provides even more traction on all surfaces

100% rubber is far superior to competitors using synthetic materials—check and compare!

## ALL PURPOSE VERSION SHOWN

Provides maximum flexibility and durability in extreme cold conditions

# LEADING THE WAY FOR REPLACEABLE SPIKE ICE TRACTION AID PERFORMANCE

Due North® Winter Traction product is ideal for those who walk, run, or work outdoors and require more stability and increased traction. Whether you're an industrial worker or someone who just needs extra stability in winter conditions, the enhanced design and improved shape will give you the extra confidence you need when walking or running on icy and snow conditions. The increased traction will help with preventing slips and falls on ice and snow, which reduces the risk of pulled muscles, fractured bones, or even back problems caused by a quick slip or fall. When not in use, the compact design makes them easy to store in small places, such as your coat pocket, handbag, briefcase, or the glove box in your vehicle.

# ICE TRACTION AIDS—INDUSTRIAL HEEL

## HTA Easy Flip Heel Traction Aid (Replaceable Spikes)

Ideal for drivers, delivery personnel, or anyone operating machinery where use of a conventional, full coverage traction aid may interfere with driving capabilities

The HTA offers a unique design feature that quickly allows the user to flip the traction pad underneath the heel (spike side in) when encountering a walking surface that may be damaged by exposed spikes

### 8 SPIKES PER PAIR!

- “Military” grade tungsten carbide “replaceable” spikes maximize traction and performance
- Eight tungsten carbide spikes per pair—excellent for general industrial applications
- Exclusive specially formulated 100% rubber—provides maximizes flexibility and durability in extreme cold conditions
- **Patented design** allows the user to easily and quickly flip the traction pad spike side in (facing the heel of the boot), or to simply slip the pad out from underneath the heel completely, resting on the back of the boot. Both functions eliminate spikes from damaging sensitive floor surfaces
- The flip-up position allows the operator to avoid damaging sensitive surfaces by removing the spikes from surface contact
- Ideal for drivers, delivery personnel, and machine operators where use of a full-coverage traction aid may interfere with driving capabilities
- One size fits most

PRODUCT NO.	Old Code	Description	Strap Color	Spike Count	Size	Case Qty.

# SAFETY APPAREL

## Pioneer History

The Pioneer story began in 1887 in boomtown Vancouver. In the 1890s, the founders grew the business quickly by supplying gear to prospectors arriving from all over North America heading to the famous Alaska/Yukon Klondike Gold Rush. These “sourdough prospectors”, as they were called, fought mountainous terrain and the harshest climates in their long journeys to the northern goldfields. They relied heavily on their Pioneer gear to help them get the job done. Pioneer has now been keeping workers safe and comfortable for over 130 years.

Klondikers carrying supplies ascending the Chilkoot Pass, circa 1898

Over these years, Pioneer has grown a reputation for designing and building high-quality and innovative protective and safety apparel. Using only the best/safest materials, componentry, and by using advanced sewing methods, Pioneer continues to deliver on safety, fit, durability, comfort and value for the professional worker.

Today, Pioneer offers a complete selection of safety clothing including Hi-Vis gear, flame resistant wear, rainwear and much more... plus custom embroidery solutions. SureWerx combines Pioneer with the rest of the SureWerx family of safety brands to offer protection to workers from head to toe.

## Why Choose Pioneer?

- Century long reputation for delivering the highest quality and most durable safety apparel
- Independently tested to meet and exceed all stated safety standards
- Innovative new product solutions based on the voice of the customer
- Unique bar tacking operation on all key seams, pockets, and other areas of stress
- Custom embroidery and silk screen solutions available
- Exclusive StarTech® reflective tape

## HEATED OUTERWEAR

### Heated Safety Nano Bomber Jacket

- ANSI/ISEA 107-15 Class 3 Type P and R (class 1 for black)
- Three-panel Nano Technology 4 levels of heat settings LED switch for on/off and heat levels
- Comes with USB port to connect to rechargeable power bank (power bank not included; must be purchased separately)
- 300 denier Oxford polyester, PU coated shell fabric
- 120GSM insulated with taffeta lining
- 100% waterproof and windproof
- Double-stitched and heat sealed seams
- StarTech® reflective tape
- Full front waterproof zipper
- Two lower slash pockets with waterproof zip, 1 lower inside zip pockets, laser chest zip pocket
- Two radiophone clip straps
- Three-piece lined detachable hood
- Fleece lined collar
- Elastic rib wrists
- Machine washable
- Sizes: S-4XL

## HI-VIS OUTERWEAR

### Hi-Vis Safety Insulated Bomber Jacket

- PU-coated oxford polyester shell
- Meets ANSI 107-15 Class 3 Type P and R
- 160 GSM quilted poly insulation
- 100% windproof and waterproof
- StarTech® reflective tape provides excellent visibility
- Embroidery access zipper on the inside
- Detachable snap hood with pouch to conceal hood
- Comfort collar with fleece lining
- Elastic ribbed cuffs and waist
- Full front zipper
- Two radiophone clip straps
- Two large front zippered pockets
- One cell phone pocket
- Inside chest pocket
- Black bottom to conceal soiling

## FLAME RESISTANT

### Flame Resistant Tech Premium Soft Coveralls

- ANSI/ISEA 107-15 Class 1 Type O
- FR-Tech™ 88% premium cotton blended with 12% high-tenacity nylon, 7 oz (240 GSM)
- Material and all components meet CGSB 155.20-2017 and NFPA 2112-2018 certified to UL
- Thermal Protective Performance (TPP) Value 9
- 7702/7702T—CSA Z96-15 Class 3 Level 2 and Class 3 Level FR
- 7704/7704T—CSA Z96-15 Class 1 Level 2 and Class 1 Level FR
- Meets ASTM F1506-2018, NFPA 70E-18 and CSA Z462-18
- ATPV 10 cal/cm<sup>2</sup> (Arc Thermal Protective Value)
- ARC 2 Arc Rating Category
- Double-stitched StarTech® FR reflective tape provides excellent visibility
- Sewn with aramid inherently FR thread
- Flame resistance guaranteed for the life of the garment
- Radiophone clip strap
- Two-way FR brass zipper
- Seven storage pockets: two back, two chest, two side, one tool
- Two pass-through pockets
- Adjustable wrists and ankles
- Superior flash fire and arc flash protection

### Flame Resistant Zip-Style Heavyweight Cotton Safety Hoodie

- ANSI/ISEA 107-15 Class 1 Type O
- CSA Z96-15 Class 1 Level 2 and Class 1 Level FR
- 100% FR treated preshrunk cotton, 12 oz (400 GSM)
- Material and all components meet CGSB 155.20-2017 and NFPA 2112-2018 certified to UL
- Thermal Protective Performance (TPP) value: 12.6 cal/cm<sup>2</sup>
- Meets ASTM F1506-10a, NFPA 70E and CSA Z462-15
- ATPV 23 cal/cm<sup>2</sup> (Arc Thermal Protective Value)
- ARC 2 Arc Rating Category
- Double-stitched StarTech® FR reflective tape X on the back provides excellent visibility
- Sewn with inherently FR thread
- Two front slash pockets
- FR brass non-locking zipper
- Tough double-stitched seams
- Liberal sizing
- Detachable snap hood

CLASS 1-TYPE O

## ANSI/ISEA 107-15 AMERICAN NATIONAL STANDARD FOR HIGH-VISIBILITY SAFETY APPAREL AND ACCESSORIES

What is **ANSI/ISEA 107-15** American National Standard for High Visibility Safety Apparel and Accessories?

The latest ANSI/ISEA 107-15 version consolidates the requirements of ANSI/ISEA 107-2010 and ANSI/ISEA 207, American National Standard for High-Visibility Public Safety Vests, in an effort to establish a single comprehensive document that considers all occupational tasks. The standard continues to present three performance classes of garments based on the amount of visible materials and design attributes incorporated into the final configuration, and identifies garment types based on expected use settings and work activities being performed. These are designated as off-road (type O), roadway and temporary traffic control (type R), or public safety activities (type P). For a detailed explanation of these standards, visit [www.safetysupply.com/ansiisea-107-2015](http://www.safetysupply.com/ansiisea-107-2015).

Listed below is a simplified explanation of the ANSI/ISEA 107-15 classes of garments:

### CLASS 1-TYPE O (Off Road)

Class 1 safety apparel are for workers whose jobs puts them at the lowest risk level. These would be for environments where traffic is traveling at or below 25 mph and work is taking place at a safe distance from a roadway. An example of this type of work would be sidewalk repair in a small residential neighborhood.

According to ANSI, in order for a vest to qualify as a Class 1 Type O safety apparel, it must have 217 square inches of background material in safety yellow or safety orange and have a minimum of 155 square inches of reflective tape. These reflective stripes must go around the middle of the vest as well as over the shoulder. These ANSI safety vests are designed to cover the torso only and do not require sleeves.

As defined by ANSI, “Performance Class 1 provides the minimum amount of high-visibility materials required to differentiate the wearer visually from non-complex work environments, in scenarios in which the struck-by hazards will not be approaching at roadway speeds, and therefore operative detection and identification distances.”

- Basic harness or safety tape over the shoulders and encircling the waist.
- Suitable in less complex work areas where workers are separated from car and truck traffic.
- Example: Class 1 = Class 1 tape configuration + non-retroreflective background material.
- Pioneer model #135AU (V1021571U) Hi-Vis Safety Vest and Pioneer model #337SFU (V2570470U) Flame Resistant Zip Style Heavyweight Cotton Safety Hoodie are both Class 1—Type O HVSA.

## ANSI/ISEA 107-15 AMERICAN NATIONAL STANDARD FOR HIGH-VISIBILITY SAFETY APPAREL AND ACCESSORIES

### CLASS 2—TYPE R and/or P (Roadway, Temporary Traffic Control, and/or Public Safety)

Class 2 safety apparel is intended for working environments that pose a greater risk than Class 1. This can include workers who are on a roadway where traffic is moving under 50 mph. This apparel is larger than their Class 1 counterparts because they require more high visibility and reflective areas to be present. A Class 2 vest, for example, must have at least 775 square inches of safety yellow or safety orange background material and 201 square inches of reflective striping. Class 2 apparel are commonly worn by survey crews, airport baggage handlers, and school crossing guards.

- Full coverage of the upper torso including front, back, sides and over the shoulders.
- The background material must be high visibility.
- For use in more complex or low-light work areas requiring greater visibility.
- Example: Class 2 = Class 2 tape configuration + retroreflective background material.
- Pioneer model #6990U (V1051150U) Birdseye Safety T-Shirt is a Class 2—Type R and P garments.

CLASS 2—TYPE R AND/OR P

### CLASS 3—TYPE R and/or P (Roadway, Temporary Traffic Control, and/or Public Safety)

Class 3 safety apparel is reserved for people working in the most dangerous environments where visibility is the highest priority. This includes roadways where traffic is traveling in excess of 50 mph, but it can also apply to emergency personnel or tow truck operators working in extreme weather conditions where visibility is at a minimum.

Class 3 ANSI approved safety apparel requires the most background fabric and reflective striping. The standard includes 1,240 square inches of safety yellow or safety orange background with 310 square inches of reflective striping.

As defined by ANSI, “Performance Class 3 can offer greater visibility to the wearer in both complex backgrounds and through a full range of body movements by mandatory placement of background, retroreflective and combined-performance materials on sleeves and pant legs (if present). Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3.”

- A Class 2 garment combined with arm and leg bands.
- The background material must be high visibility to the standard.
- Hi-Vis coveralls meet this standard; safety jackets (Class 2) and pants (Class E) can be worn combined, or arm/leg bands can be added to Class 2 garments, to attain Class 3.
- Suitable for use in complex work areas where low light, fast-moving traffic and inclement weather are safety factors.
- Example: Class 3 = Class 3 tape configuration + retroreflective background material
- Pioneer model #6690U (V1023550U) Hi-Vis Safety Vest With Sleeves, Pioneer model #5999AU (V1070160U) Hi-Vis Traffic Safety Coverall are all Class 3—Type R and P garments.

CLASS 3—TYPE R AND/OR P

SUPPLEMENTAL CLASS E

## ANSI/ISEA 107-15 AMERICAN NATIONAL STANDARD FOR HIGH-VISIBILITY SAFETY APPAREL AND ACCESSORIES

### SUPPLEMENTAL CLASS E

ANSI Supplemental Class E applies to Hi-Vis pants, bib overalls, shorts, and gaiters. Alone, these garments are not ANSI compliant. When combined with a Class 2 or Class 3 garment, the combination satisfies Class 3 requirements. This classification remains the same under the ANSI/ISEA 107-2015 standard.

ANSI designates “pants, bib overalls, shorts, and gaiters” as Class E.

- Class E garments must always be worn in combination with other items to meet HVSA PPE requirements.
- Class E items worn in combination with Performance Class 2 or Class 3 items will achieve an overall classification of Performance Class 3.
- Pioneer model #5404AU (V1200451U) Hi-Vis 300D Ripstop Waterproof Safety Bib Pant and Pioneer model #5999PU (V1070360U) Hi-Vis Traffic Safety Pant are both Class E HVSA.

*Safety officials in your region determine the appropriate class wear for specific job sites. Hazardous risk assessment should be performed by a qualified individual to determine the applicable high visibility classification.*

Size	26	28	30	32	34	36	38	40	42	44	46	48	50	52	54	56	58	60	62	64	66	
Waist	26	28	30	32	34	36	38	40	42	44	46	48	50	52	54	56	58	60	62	64	66	
Hip	32	34	36	38	40	42	44	46	48	50	52	54	56	58	60	62	64	66	68	70	72	
Inseam	30.5	31		31.5		32		32.5		33		33.5		34		34.5		35		35.5		

Shirts (select size by neck for closed collar shirts, by chest for open collar shirts)																				
	S		M		L		XL		2XL		3XL		4XL		5XL		6XL		7XL	
Neck	14-14.5		15-15.5		16-16.5		17-7.5		18-18.5		19-19.5		20-20.5		21-21.5		22-22.5		23-23.5	
Chest	34		38		42		46		50		54		58		62		66		70	
Sleeve	33.5		34		34.5		35		35.5		36		36.5		37		37.5		38	

Women's Garment Sizing												
	XS		S		M		L		XL		2XL	
Chest	32		34		36		39		42		45	
Waist	24		26		28		31		34		37	
Arms	29		30		31		32		33		34	
Hip	35		37		39		42		45		48	
Inseam	27		28		29		30		31		32	

All measurements in inches.

Talls in Coveralls are 2 inches longer in the torso and 1 inch longer in the sleeves and legs.

### Measurement Directions:

**Neck:** Measure around the base of your neck, round up to the next half-inch.

**Chest:** Measure around your chest, under the arms and across the shoulder blades, over a shirt if stomach is larger than chest; choose the larger size.

**Waist:** Measure around your waist at the level you normally wear your pants, over a shirt.

**Hip:** Standing with feet together, measure around the widest part of your hips, parallel to the floor.

**Inseam:** Measure a good-fitting pair of pants along the inseam, from crotch seam to bottom edge of cuff.

**Sleeve:** Bend arm and place fist on hip. Measure from center back of your neck, across shoulder and down arm to elbow and then to your wrist. This is your sleeve length.

For working garments, measure liberally to find your size, as you need freedom of movement.

# STAR★TECH®

STARTECH® reflective tape is exclusive to Pioneer safety products. It is designed and tested to far exceed the ANSI/ISEA 107-15 high-visibility safety apparel reflective tape standard.

StarTech® reflective tape has been independently tested to meet:

- ANSI 107-15 American National Standards Institute
- EN ISO 20471 High-Visibility Standard Level 2 high-visibility safety apparel and accessories

StarTech® FR tape is made of FR cotton or aramid material as backing and has been independent lab-tested to meet:

- CGSB 155.20-2017 (Heat-Resistant Test)
- NFPA 2112-2018 Standard on Flame-Resistant Garments for Protection of Industrial Personnel against short duration thermal exposure from fire

The many standards for reflective tapes all require passing a battery of tests that simulate working conditions.

These include measuring the retroreflective performance of StarTech® tape after being subjected to abrasion, multiple flexing, cold temperatures, variable temperatures, multiple washings, wet conditions, and, for the FR version, its heat resistance properties as well. Due to its premium design and quality, StarTech® tape not only meets but exceeds all of these standards!

## NFPA (National Fire Protection Association) 2112-2018— Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire

- NFPA 2112-2018 requires 3rd party certification through UL.
- Tests performed under NFPA 2112:
  1. Heat transfer performance—predict burn injury (2nd or 3rd degree burn).
  2. Flame resistance—ASTM D6413 as received and after 100 wash cycles. Tested for 3 secs.
  3. Thermal shrinkage resistance/Heat resistance test—Oven test at 260°C.
  4. Manikin testing—ASTM F1930—Manikin has sensors and is subjected to 84kW/m<sup>2</sup> for flame for 3 secs. to verify if 2nd or 3rd degree burns are recorded.
  5. Thread melting resistance—260°C of heat is applied to verify if thread melts.
  6. Other tests included: label legibility, fabric weight, tensile strength, tear strength, material burst strength, laundering shrinkage, colorfastness, seam efficiency.

### Electric Arc Standards

#### Test Method:

- ASTM F1506-2018—Standard Performance Specification for Flame Resistant and Arc Rated Textile Materials for Wearing Apparel for Use by Electrical Workers Exposed to Momentary Electric Arc and Related Thermal Hazards.

#### Standards:

- NFPA 70E-2018—Standard for Electrical Safety in the Workplace.

### What is ARC Flash?

When an electric current passes through air between underground conductors or between underground conductors and grounded conductors, temperatures can reach 20,000°C (35,000°F).

Exposure to these extreme temperatures burns the skin directly and ignites clothing, which adds to the burn injury.

The majority of hospital admissions due to electric accidents are from arc flash burns, not from shocks.

### ASTM F1506-2018

- Both NFPA 70E and CSA Z462 define the following categories for ARC rated clothing
- ATPV (Arc thermal protective value)—point at which 2nd degree burn is registered on the sensor and fabric is still intact
- EbT (Break-open threshold)—point at which 2nd degree burn is registered on the sensor and fabric has broken/formed a hole
- Minimum ARC rating required 4 Cal/cm<sup>2</sup>
- ARC 1—4 Cal/cm<sup>2</sup> to 7.9 Cal/cm<sup>2</sup>
- ARC 2—8 Cal/cm<sup>2</sup> to 24.9 Cal/cm<sup>2</sup>
- ARC 3—25 Cal/cm<sup>2</sup> to 39.9 Cal/cm<sup>2</sup>
- ARC 4—40 Cal/cm<sup>2</sup> and up.

Tests in this standards go way beyond testing for ARC rating:

- Breaking load test—Grab test
- Tear resistance
- Seam slippage
- Colorfastness—Laundering/Dry Cleaning—three cycles of washing
- Dimensional Change—Max 3%
- Flammability—Char length needs to be below 150mm
- Before and after 25 washes, Bursting strength, Arc Rating

## WARRANTY

### Garment and Safety Gear

Pioneer warrants all garments to be free of defects in materials and workmanship under the normal use for which the product is intended. Normally, a garment defect of manufacture will show up in the first two months of use.

This warranty is limited to product failure as a result of seam separation, broken snaps or zippers, material delaminating, or any defect in material or workmanship that affects the performance of the garment.

Excluded from this warranty are products that have been affected by cuts or punctures, disfigured from continued wear or use, and products that have been exposed to solvents or excessive heat which may degrade their performance and garments that have not been maintained as per wash care instructions on the garment.

Warranty claims will only be provided for those products that have been made available for inspection by Pioneer. Any warranty claim on garments that have been purchased over 60 days ago will have to be accompanied by pictures and/ or defective garment itself for inspection. To maintain our health and safety standards, all products returned for inspection must be free of all removable debris. Any products returned that do not meet the above conditions will be returned to the customer at their expense.

Pioneer shall not be liable for indirect, special, incidental, or consequential damage or penalties and does not assume liability of purchaser or others for injury to persons or property.

For a warranty claim on a Pioneer garment, please contact your local sales or customer service representative.

# PEACE OF MIND

## PeakWorks Knows Fall Protection

From its inception in 2008, PeakWorks has been passionate about providing workers peace of mind when working at heights. The PeakWorks founders, with over 50 years of fall protection experience between them, set out to build a company that not only offered an industry-leading product line, but also provided their customers with value-added services supplying real solutions for both workers and the companies employing them. Today, as an integral part of our family of brands, we embrace those same principles. We know that the best fall protection is to eliminate the fall hazard in the first place. However, we also know that life doesn't always work that way. Our single goal, then, remains very simple: to ensure the best possible outcome when the unexpected occurs.

## PeakWorks Embraces Industry Standards

Our in-house fall protection experts are driven to provide the best possible products and systems to ensure maximum worker safety. Like you, we live and work in North America, and we are intimately knowledgeable about the strict regulations imposed in this country, which has the highest standards in the world. In fact, we are so dedicated to the advancement of worker safety that our fall protection experts are active members of both the CSA and ANSI standards committees. Not only do we adhere to these standards, we help to develop them!

## PeakWorks Thrives on Problem Solving

PeakWorks is all about solving problems for workers at height. Our team of experts is available to consult on applications, hazard analysis training, recertification of products and much more. If you need help, we are just a phone call away!

## PeakWorks Offers Uncompromising Value

Great news! Not only have we developed a world-class fall protection program, we have also made every effort to ensure that it is delivered at the best value to you, the customer. We have accomplished this without compromising product quality—your safety remains our primary objective. So give us a call and let us know how PeakWorks can not only exceed your safety expectations but potentially lower your overall fall protection costs at the same time.

## ANSI Certification

Products that are certified to the ANSI standard is much different than products that meets or exceed ANSI standard. Certified to ANSI means that the product has been tested and certified by a third party testing facility that have meet all the requirements of ISO 17025. The products undergo all the testing that is set forth by the ANSI standard to qualify as certified product. This gives the user an extra level of assurance that the product will perform as designed. On the other hand, if a product has the term "Meets or exceeds" on the labeling or instruction manual, it simply means that the manufacturer has tested the products internally usually without a 3rd party verification. It's important that you as the user of the equipment understand these difference so that you can make an informed decision on the products you are using or specifying to use in the field.

## FALL PROTECTION DEFINED

### What is Fall Protection?

Fall Protection refers to a series of regulated products or systems designed to protect workers from the risk of falls when working at height.

### Types of Fall Protection

There are three basic types of fall protection available on the market:

**Fall Restraint**—Comprised of products or equipment which prevent a free fall from happening in the first place. The fall restraint system is designed to prevent a worker from ever reaching the edge or drop-off point when working at heights. Common examples: Guard Rails or Restraint Lanyards connected to Full Body Harnesses that are shorter in length than the distance from the Anchor Point to the Drop-Off Point.

**Fall Arrest**—Comprised of products, equipment or systems which stop a free fall once it occurs. These products are carefully designed and tested to stop a falling worker with minimal risk of injury. Common examples: Full Body Harnesses connected to Shock Absorbing Lanyards, or Self-Retracting Lifelines that are connected to an approved Anchor Point.

**Work Positioning**—Comprised of products or equipment which support or suspend a worker in order to allow the worker to be positioned at their working point hands-free. Common examples: Rebar Chain Assembly, Boatswain's Chairs, Descent Controllers.

### Know Your ABCs

Fall protection systems are designed to prevent contacting a lower level if you fall from a height. There are several key components to these systems and it is important to know the basics.

**A = Anchorage Connectors**—The Anchorage is an engineered product which connects to some form of structure. The combination of these two critical components must be capable of withstanding the forces incurred during a fall. In North America, these components must be capable of withstanding a minimum 5,000 lb (22 kN) of force. Common examples: Anchor Slings, Fixed D-Rings, Beam Anchors, Concrete Hole Anchors, Carabiners.

**B = Body Support**—The Body Support is the component that is worn on or around the torso. There are two types of Body Support:

#### Restraint Belt:

Belt that is installed at the waist and used for worker positioning and travel restraint. A Restraint Belt must NEVER be used for fall arrest.

#### Full Body Harness:

A Full Body Harness is a body support device that is installed on the entire body and is designed to distribute the forces of a fall to the shoulders, thighs and pelvis.

All Full Body Harnesses have a back D-ring designed for the fall arrest connection point. Other styles of Full Body Harnesses are available with other attachment points such as side D-rings for work positioning, a frontal D-ring for ladder climbing, and shoulder D-rings for confined space work. Some styles of harnesses can also have a combination of all or some of these attachment points, for example our Class APLE has the following connection points: (1) back D-ring, (2) side D-rings, (1) frontal D-ring and (2) shoulder D-rings.

Full Body Harnesses are the only accepted body support to be used for a fall arrest application. NEVER use a Restraint Belt in a fall arrest application.

**C = Connectors**—Connectors are the engineered components that connect the Body Harness or Body Belt to the appropriate Anchorage. Common examples: Shock Absorbing Lanyards, Self-Retracting Lifelines (SRLs), Restraint Lanyards, Lifelines.

PEAKWORKS™

# HARNESSES

# SECURING YOUR PEACE OF MIND

## FULL-BODY HARNESSES

### About Full-Body Harnesses

- Full-body harnesses are designed to arrest a fall while simultaneously distributing the tremendous shock or load to the worker's body.
- There are many applications and conditions in which full-body harnesses must be worn. In order to maximize effectiveness and minimize injury, it is critical that an appropriate body harness be selected based on the job for which it is intended. PeakWorks offers a full range of body harnesses for almost every application.
- Full-body harnesses must be fitted and tightened properly to ensure maximum protection and to minimize injury.
- Waist or restraint belts are not replacements for full-body harnesses.
- All PeakWorks full-body harnesses are built to meet or exceed the highest standards while providing maximum fit and comfort.

### Harness Classes

- Full-body harnesses come in many styles with a variety of attachment points (D-rings). The placement of these D-rings is critical to the type of application and positioning of the worker when performing a job.
- The fall protection industry and regulatory committees have standardized the positioning of these attachment rings into Harness Classes A, D, E, L, P.
- Depending on the application, full-body harnesses may require more than one attachment class in order to correctly position the body and stress points during a fall; i.e., AE and AP.
- All full-body harnesses come with a standard Class A D-ring (located at the back between the shoulder blades).

**Class A**  
Fall Arrest

**Class D**  
Descent

**Class E**  
Limited Access

**Class L**  
Ladder

**Class P**  
Work Positioning

### Harness Hardware

PeakWorks full-body harnesses are available with a variety of buckle types for your convenience:

Pass-Thru Chest Strap

Pass-Thru Leg Strap

Grommeted Leg Strap

Stab Lock Chest  
or Leg Strap

Friction Torso Adjustment  
or Leg Strap

Large Back D-Ring

Padded Back Support

Frontal D-Ring

Lanyard Park

### Reference Guide

#### Third Party Certification

PeakWorks offers four series of harnesses: PeakPro Plus, PeakPro, Contractor, and Compliance.

- Certified to both **ANSI Z359.11** and **CSA Z259.10** standards
- Meets or exceeds all applicable OSHA standards
- 130 to 310 lb. (60 to 141kg) capacity (combined weight of person, tools, clothing, etc.)
- Sub-pelvic strap for added safety and support
- Fall indicator for easier inspection before use
- Polyester webbing

**NEW!**

Example: V8005170  
(FBH-70110G)

Example: V8255623  
(FBH-60110A1020-L)

### PEAKPRO PLUS

- Peek-a-boo webbing has wear indicator for simple inspection
- Hi-Vis yellow top and black bottom, easily visible and distinguishable for ease of donning
- Five points of adjustment ensuring a good fit (two leg, two torso, one chest)
- Buckles: premium Stab Lock (chest), Stab Lock (legs)
- Premium padded shoulder, back and leg straps for all-day comfort
- Anodized aluminum hardware for reduced weight and no corrosion
- Includes installed trauma straps at no additional cost
- Includes integrated padded belt

### PEAKPRO

- Hi-Vis green top and black bottom, easily visible and distinguishable for ease of donning
- Five points of adjustment ensuring a good fit (two leg, two torso, one chest)
- Buckles: premium Stab Lock (chest), Stab Lock (legs) or grommets (legs)
- Padded shoulder, back and leg straps for all-day comfort
- Includes installed trauma straps
- Available as harness & belt combo or just the harness.

## TRAUMA STRAPS

- In the event of a fall, trauma straps help reduce the effects of suspension trauma
- Trauma straps can be added to any PeakWorks® full body harness
- Trauma straps are an important part of any rescue plan

### How to Use Trauma Straps

- Pull the straps out of their packs
- Clip the straps together
- Step into the straps

### Orthostatic Intolerance or Suspension Trauma

- Blood can accumulate in the veins while in a sedentary position
- Reduction in quantity and/or quality (O<sub>2</sub>) of blood flowing to the brain and kidneys
- May be fatal

### Suspension Trauma Signs and Symptoms

- Faintness
- Breathlessness
- Sweating
- Paleness
- Hot flashes
- Increased heart rate
- Nausea
- Dizziness
- Unusually low heart rate
- Unusually low blood pressure
- Graying loss of vision

# SELF-RETRACTING LIFELINES (SRLs)

## Choosing the Right Self-Retracting Lifeline

There are different styles of SRLs that can be used for different applications. It is important to consider the specific application when choosing an SRL. Knowing the type of work environment, where the attachment point of the SRL is located on the job site, what the worker will be doing at heights and the required location of the fall protection will be crucial information to choosing the correct SRL. Below are questions to consider when choosing the appropriate SRL and where a fall hazard exists that could cause the lifeline to come into contact with the edge; for example, when working over structural steel or in high-rise concrete buildings under construction with open flooring.

### Will the Installation of the SRL be Overhead (Vertical) or at Horizontal/Foot-Level (LE)?

#### Horizontal/Foot-Level (LE)

- If there is no anchorage point overhead to connect an SRL, you will likely be connecting at foot level or horizontally, also known as leading edge (LE) application.
- A leading edge can be described as any sharp edge commonly found on a work site with which a cable or webbing connection could come into direct contact during a fall.
- An SRL-LE device is an SRL that has enhanced design features for use in leading edge applications and must always be used for any leading edge application.

#### Allowable Edges on your SRL-LE device?

- ANSI Z359 standard only requires leading edge testing over a steel sharp edge with radius of .005 inches to classify an SRL as leading edge approved. (Identified by the global sharp edge symbol below)
- ANSI Z359.14 standard does not cover testing over additional materials commonly found on many job sites, such as concrete edges, wood edges, paneled rounded fascia.
- It is important to be aware of additional edge materials that the lifeline might come in to contact with and verify if the SRL-LE can be used in that application with the manufacturer.

Global Sharp Edge symbol—  
Radius as sharp as .005 in. (.13mm)

#### Vertical (non-LE)

If the installation will be overhead or at shoulder level, you should determine the minimum fall clearance requirement on the job site to help identify the correct class of SRL you should be using. ANSI Z359 classifies an SRL as a CLASS A or CLASS B with the differences in arresting distances and average arrest forces indicated in the image below.

The extra 2-1/2 feet difference in arresting distance between ANSI Class A and B is a critical factor if you only have 6 feet fall clearance from the lower level (danger level).

## SELF-RETRACTING LIFELINES (SRLs)

### Peakworks SRL-LE Clear Advantage

#### One Device for Both Applications

- PeakWorks offers one device that is certified as ANSI Z359.14 CLASS A in vertical non-LE applications as well as leading edge certified for use in horizontal applications. One product works for most applications
- Reduces inventory duplication and safety investment costs

#### Deceleration System

- Unlike most SRL-LE devices in the market, PeakWorks SRL-LE devices do not require an external shock pack in order to meet the leading-edge standards due to the exclusive internal braking system
- This translates to shorter arresting distances in both vertical and horizontal orientation (refer to page 187 for fall clearance comparison)

#### Allowable Edges

- PeakWorks SRL-LE devices have had additional testing over multiple leading-edge materials commonly found on job sites, such as concrete edges, wooden beams, paneled rounded fascias, and trapezoidal sheet metal
- Contact a PeakWorks representative for information on additional material testing

#### Dyneema® Webbing vs Cable

- PeakWorks SRD-LE units are up to 32% lighter than competitors' SRD-LE of equivalent length
- Thin webbing accommodates smaller housing design
- Outstanding versatility for use on multiple surface materials
- Dyneema® webbing is a proven LE-rated material

## THE PEAKWORKS LE ADVANTAGE

- No shock pack required
- Reduces fall clearance by up to 4 feet!
- Certified for both vertical and horizontal applications
- Ultra lightweight!

PeakWorks Leading Edge-rated devices can be identified with labels on the housing and lifeline

V845526006LE

PeakWorks understands the importance of calculating the fall clearance, which is why we created an app for calculating fall clearances. Visit the App Store today to download it.

# THE PEAKWORKS SRL-LE FALL CLEAR ADVANTAGE!

## SRL FALL CLEARANCE COMPARISON

\*Eliminate Swing Fall whenever possible! If Swing Fall exists, always account for additional fall clearance.

# SELF-RETRACTING DEVICE (SRD)—LEADING EDGE

## Dual Tie-Back LE

### COMPACT UNIT

Among the smallest SRLs in the market. Designed for comfort and to reduce fatigue

Impact-resistant aluminum housing provides maximum durability compared to nylon or thermoplastic housing SRLs in the market

Internal automatic locking pawls will stop a fall within inches while keeping average arresting forces to 900 lbs. or less. Unlike competitor SRLs, no external shock pack is required on any of the PeakWorks SRLs as shock absorbers capability are built in to the internal braking mechanism

Tie-back snap hook with a 5,000 lb. gate strength and 0.83" (21mm) gate opening

V845528009TB

### Using the correct snap hook on your SRL tie-back makes all the difference

PeakWorks designed the new Tie-Back with a special snap hook that will not accidentally open under gate load. Be sure to use approved Tie-Back gear that is certified to meet ANSI standards 5,000 lb. gate strength.

# SELF-RETRACTING DEVICE (SRD)—LEADING EDGE

## Tie-Back SRD-LE—Class A

### Tie-Back

- Tie-back is an all-in-one, self-retracting lifeline and anchorage connector, thus reducing the amount of equipment required on the job site and making it a cost-effective alternative
- It allows the unit to attach directly to a compatible structural anchor by wrapping around the structure to tie-back to itself
- Single and dual 100% tie-off configurations available
- **Approved for use in vertical and horizontal applications**
- LE minimum fall clearance: 13 ft. (4m)
- Maximum total arrest distance: 24 in. (0.61m) non-leading edge application
- Average arrest force: 765 lbf (3.4kN)
- LE minimum setback distance: 12 in. (0.31 m)
- Third-party certified to **ANSI Z359.14-2014, Class A and Leading Edge**, meets applicable **OSHA** standards

## SELF-RETRACTING DEVICE (SRD)—LEADING EDGE

### Dual Compact SRD-LE—Class A

- Dual units are also available with lightweight aluminum rebar hooks
- Attachment points include a swivel eye on housing with connection pin for mounting below the dorsal D-ring
- Hi-Vis green Dyneema® webbing lifeline has been sharp-edge tested over a .005" radius sharp edge
- Class A rating means the fall distance is less than 2 ft. (0.6m) or less when connected overhead (non-LE application)
- Leading edge minimum fall clearance of 13 ft. (4m) required
- Third-party certified to **ANSI Z359.14-2014, Class A** and **Leading Edge, CSA Z259.2.2**, meets applicable **OSHA** standards

# SELF-RETRACTING DEVICE (SRD)—LEADING EDGE

## Single SRD LE—Class A

### Class A—Dyneema® Web

- Approved for use in vertical and horizontal applications
- LE minimum fall clearance: 13 ft. (4m)
- Maximum total arrest distance: 24 in. (0.61m) non-leading edge application
- Average arrest force: 765 lbf (3.4kN)
- Minimum setback distance: 12 in. (0.31 m)
- Foot level tie-off: Tested and approved for foot level tie-off
- Operating temperatures: -22°F to 122°F (-30°C to 50°C)
- Aluminum housing
- Under 2.5 lbs. total weight
- Steel snap hook with .75" (19mm) gate opening; different snap hook types available
- Double-locking steel carabiner with 3,600 lb. gate strength included for anchor connection
- Certified to meet **OSHA, ANSI Z359.14-2014, Class A, Leading Edge** and **CSA Z259.2.1** standards

PRODUCT NO.	MODEL NO.	Webbing Width	Length	Weight	Hook (Gate Opening)	Capacity

### Class A—Cable

- Tested and approved for foot level tie-off
- Carabiner hook included for attachment to the anchor point or rear D-ring of the harness
- Available with regular snap hook or lightweight aluminum form hook
- Lightweight composite plastic housing
- 3/16" (5mm) galvanized cable, 10 ft. (3m) working length
- LE minimum fall clearance: 13 ft. (4m)
- Maximum total arrest distance: 24 in. (0.61m) non-leading edge application
- Average arrest force: 765 lbf (3.4kN)
- Minimum setback distance: 16 in. (0.4m)
- Third-party certified to **ANSI Z359.14-2014, Class A** and **Leading Edge, CSA Z259.2.2**, meets applicable **OSHA** standards

PRODUCT NO.	MODEL NO.	Cable Diameter	Length	Weight	Hook (Gate Opening)	Capacity
V845533010LE	SRL-53302-10LE	3/16" cable (5mm)	10 ft. (3m)	5.28 lbs. (2.4kg)	3/4" snap hook (19mm)	300 lbs. (136kg)
V845534010LE	SRL-53402-10LE	3/16" cable (5mm)	10 ft. (3m)	6.3 lbs. (2.9kg)	2-1/2" form hook (64mm)	300 lbs. (136kg)

### QUICK NOTE

Selecting a Dual vs Single SRD?  
Dual Self-Retracting Devices allow for 100% tie-off when moving or transitioning between levels or obstacles.

## SELF-RETRACTING LIFELINES (SRL)—LEADING EDGE

### Class B—Cable

- Approved for use in vertical and horizontal applications
- Tested and approved for foot level tie-off
- Additional testing over alternate leading edge materials
- Carabiner hook included for attachment to anchor point
- Aluminum housing for maximum durability
- 3/16" (5mm) galvanized cable lifeline
- LE minimum fall clearance: 13 ft. (4m)
- Minimum set-back distance from edge: 20 in. (50cm); refer to user manual
- Maximum total arrest distance: 54 in. (1.4m) non-leading edge applications
- Average arrest force: 765 lbf (3.4kN)

PRODUCT NO.	MODEL NO.	Lifeline Type	Length	Weight	Hook Style	Capacity
V845533020LE	SRL-53302-20LE	3/16" (5mm) Cable	20' (6m)	7 lbs. (3 kg)	3/4" Snap Hook	300 lbs. (136kg)

# LANYARDS

# CONNECTING YOU SAFELY

## LANYARDS

Anchor connector hook available with regular snap hook 3/4" (19mm) gate opening of form hook with 2-1/2" (64mm) gate opening

Shock-absorbing lanyards are available with a single leg which is designed to connect to a single anchor point or 100% tie-off lanyard which is designed to protect workers when moving from anchor to anchor

Easy to inspect Shock Pack. The Shock Pack will be deployed if involved with a fall. The lanyard must be removed from service immediately

Shock-absorbing lanyards are available with 1" (25mm) polyester webbing or with a 1/4" (6mm) galvanized plastic coated cable

Snap Hook  
(3/4" (19mm) Gate Opening)

Form Hook  
(2-1/2" (64mm) Gate Opening)

### About Lanyards

- Lanyards are engineered products, and the critical connection component between the full body harness and the anchor. They are sometimes referred to as connectors
- PeakWorks lanyards are designed and tested to comply to strict CSA and ANSI standards
- There is a wide variety of lanyards to suit a wide range of applications
- There are two common types of lanyards: Fall Restraint and Fall Arrest

### Fall Restraint Lanyards

- Fall restraint lanyards are a fixed-length connection and have no shock absorbing capability
- These lanyards are designed to limit the distance a worker can move from the anchor point and towards the edge of the structure and should never be used when there is a risk of falling

### Fall Arrest Lanyards

- The shock absorbing action of these lanyards limits and reduces the force of a fall on the worker, significantly reducing injury to the body

### SP (Shock Pack):

- SP (Shock Pack) lanyards are comprised of "tear webbing" which is woven in a manner that allows the webbing to tear when it has a load applied to it. This tearing absorbs a significant amount of downward force under load, reducing injury
- This tear webbing is folded and shrink-wrapped into a compact 1" x 2" x 6" (2.5cm x 5cm x 15cm) pack that is sewn into the lanyard next to the body connector
- Cable lanyards are ideal if you're working in abrasive or high-heat environments

# SHOCK ABSORBING LANYARDS

## Shock Pack (SP)

PeakWorks Shock Pack (SP) shock absorbing lanyards are certified to **ANSI Z359.13** standards.

- Made with a superior grade, heavy-duty 1-3/4" (45mm) or 1" (25mm) polyester webbing for maximum strength or 1/4" (6mm) galvanized plastic coated cable, with tear webbing shock absorber
- Resists abrasions and harmful UV rays
- Shock packs are designed to tear the inner webbing to reduce the force the worker feels to an acceptable level

## RESTRAINT LANYARDS

Preventing a fall is a better way of protecting workers than arresting a fall. For these applications, PeakWorks has a wide selection of fall restraint lanyards. Fall restraint lanyards should never be used if there is any risk of falling.

- Fall restraint lanyards are a fixed length connection and have no shock absorbing capability
- These lanyards are designed to limit the distance a worker can move from the anchor point and towards the edge of the structure and should never be used when there is a risk of falling
- PeakWorks restraint lanyards are made using two types of material—a rugged heavy-duty polyester webbing or a premium polyester rope—and with a variety of hook configurations
- PeakWorks restraint lanyards are available in 4' (1.2m) and 6' (1.8m) lengths

PRODUCT NO.	MODEL NO.	Length	Product Name	Hook Type

## VERTICAL LIFELINES & ROPE GRABS

### Lifelines

- Lifelines are specially designed from rope made using high-strength polysteel
- Polysteel is an extruded co-polymer fibre that yields an extremely high-strength, lightweight rope with excellent resistance to acids and alkalis
- PeakWorks vertical lifelines are all 5/8" (16mm) in diameter
- Minimum breaking strength 6,000 lbs (27kN)
- We offer a wide range of lengths with a variety of snap hook/carabiner options
- All PeakWorks lifelines have a back splice at the trailing end to prevent the rope grab from coming off the end of the lifeline
- Certified to **CSA Z259.2.5-2012** and meets or exceeds **ANSI Z359.15** standards

PRODUCT NO.	MODEL NO.	Length	Product Name	End Configuration	
				Anchor End	Trailing End
V84013XXX	VL-1115-X	25', 50', 100' (7.6m, 15.2m, 30.5m)	Premium Vertical Lifeline, 5/8" (16mm) Rope	Carabiner	Back Splice
V84014XXX	VL-1125-X	25', 50', 100' (7.6m, 15.2m, 30.5m)	Premium Vertical Lifeline, 5/8" (16mm) Rope	Snap Hook	Back Splice
V84084XXX	VL-1825-X	25', 50', 100' (7.6m, 15.2m, 30.5m)	Standard Vertical Lifeline, 5/8" (16mm) Rope	Snap Hook	Back Splice

Note: other lengths available as a special order.

### DID YOU KNOW?

Automatic rope grabs are designed to move easily up and down vertical lifelines hands-free to provide continuous fall protection. PeakWorks rope grabs include a shock-absorbing pack to reduce arresting forces in the event of a fall.

# VERTICAL LIFELINES & ROPE GRABS

## Rope Grabs

- Rope grabs are designed to travel hands-free on 5/8" (16mm) rope
- These automatic rope grabs follow the user during their ascent or descent
- In the event of a fall, the rope grab will "bite" onto the rope and arrest the user's fall
- PeakWorks rope grabs are also equipped with a panic lock feature which "bites" onto the rope even if the user mistakenly pushes the cam up, ensuring that the rope grab will lock and arrest the fall in any situation
- Rope grabs offer the most cost-effective fall protection solution when working at height
- 130 to 310 lb. (60 to 141kg) capacity (combined weight of person, tools, clothing, etc.)
- All Peakworks rope grabs meet or exceed **ANSI Z359.15** standards

# ANCHORAGE CONNECTORS

# ANCHORAGE CONNECTORS

## Anchors and Roof Brackets

- A complete fall arrest system requires three primary components: approved full body harness, connector and anchorage connector
- Anchors can be connected to a variety of materials such as steel, wood and concrete
- PeakWorks offers a wide range of anchor systems including: single-use/reusable roof anchors, sliding beam anchors, concrete hole anchors and permanent anchors
- The anchor should be located directly above the worker to prevent swinging
- The height of an anchor is a key variable when determining fall clearance
- As with all fall protection products, anchors must be inspected by a competent person at a minimum annually
- All PeakWorks anchors are built with a minimum tensile strength of 5,000 lbs (22 kN)
- All PeakWorks anchors meet or exceed **CSA Z259.15** and **ANSI Z359.18** standards and **OSHA** requirements
- 310 lb. (141kg) capacity for one worker (combined weight of person, tools, clothing, etc.)

PRODUCT NO.	MODEL NO.	Product Name	Application

## ANCHORAGE CONNECTORS

### Overhead Beam Clamps

Overhead beam clamps are designed to attach to overhead structure without the aid of any tools. Simply adjust the size of the clamp to the bottom flange of the beam, lock it in place and it's ready to go. The beam anchors provide a safe and practical solution to connecting to overhead beams. PeakWorks offers two styles of beam clamps.

- 1) Stationary—fixed in one location
- 2) Sliding—which can follow the worker to prevent a swing fall

Both beam clamps style models have a breaking strength of 5,000 lbs. (22kN).

PRODUCT NO.	MODEL NO.	Product Name	Size of Beam	Style
V8222130	CP-11010-1	Adjustable Sliding Beam Anchor	3.5" to 13.25" (88.9mm to 336.6mm)	Sliding
V8221131	AC-9450-SBAR	Sky Bar	3.5" to 12" (88.9mm to 304.8mm)	Stationary
V8222150	CP-11010-3	Aluminum Super Sliding Beam	3.5" to 12" (88.9mm to 304.8mm)	Sliding
V8222138	AC-9900-TROLLEY7	I-Beam Trolley	3" to 10" (76.2mm to 254mm)	Sliding

V8222138

### I-Beam Trolley

- Designed to easily roll along over head I-beams while trailing the worker.
- Can be removed and reused without any tools.
- Easily adjust to various I-beam widths ranging from 3" to 10"
- **ANSI Z359.18** and meets applicable **OSHA** standards for 5,000 lbf / 22 kN

# ANCHORAGE CONNECTORS

## Drop-In/Drop-Thru Anchors

### Removable Anchors

Removable anchors, developed for fall protection, are safe, lightweight, and surprisingly simple to employ. PeakWorks manufactures three styles of removable anchors

- 1) Drop-Thru Anchors
- 2) Concrete Anchors
- 3) Toggle Anchors

### Drop-Thru Anchors

The Drop-Thru Anchor is a removable and reusable anchor designed for overhead applications. Available in three different sizes: 4", 6", and 12" diameter plates. Simply insert the cable end of the anchorage connector to an approved anchor and begin using it. Once the task is complete, pull the cable back through the opening and it's ready to be re-used.

### Concrete Anchors

PeakWorks anchors have been tested to meet ANSI Z359.18. They have a long list of benefits above competitive products. A few include:

- Ease of use—simply drill the proper size hole into your concrete, blow the dust out with compressed air, and insert the unit
- Multi-directional attributes—PeakWorks removable anchors work in horizontal, vertical and overhead surfaces
- Reusability—when your job is done, simply fill in the drilled hole if necessary and reuse at your new desired location

### Toggle Anchors

- Popular removable bolt anchor due to the portable and re-usable design.
- Concrete anchorage connector can be used in variety of fall protection applications
- Breaking strength: 5,000 lbf/22kN
- Meets **ANSI Z359.18** and applicable **OSHA** standards

PRODUCT NO.	MODEL NO.	Product Name	Size of Open/Hole to install thru/in	Application

### Anchor Slings

- Anchor slings provide peace of mind when a temporary anchor is required
- PeakWorks offers anchor slings using two basic material styles: abrasion-resistant webbing or galvanized cable
- All PeakWorks anchor slings are built to a minimum tensile strength of 5,000 lbs (22 kN)
- All PeakWorks anchor slings meet or exceed CSA and ANSI standards
- Peakworks introduces new line of anchor slings with added wear sleeve for durability

# TANK TROLLEY™

The PeakWorks Fall Protection Tank Trolley™ is designed for use on water and fuel storage tanks. The Tank Trolley™ provides a 5,000 lbs. anchorage as required by OSHA and ANSI standards. The Tank Trolley simply rides on the top lip of the storage tank and can be used with a standard lanyard or self-retracting lifeline.

- Standards Compliance: Materials meet **OSHA 1926.5 subpart M, 1910.66 app. C, and ANSI A10.14.**
- Trolley: Rollers 1/4" steel, powder coated finish with forged steel O-ring attachment, polyurethane composite material
- Capacity: Application 310 lb. designed working load
- **TROLLEY6:** Storage tanks with minimum 10' diameter, fits 1/4" to 1" flange widths
- **TROLLEY6A:** Storage tanks with minimum 10' diameter, fits 1" to 1-7/8" flange widths
- Made in USA

## COMPLIANCE KIT

\*  
GOOD

The PeakWorks® Compliance Kit includes an all-in-one harness and shock-absorbing lanyard. The full-body harness features three points of adjustment for ultra-lightweight comfort. Quick-connect pass-thru buckles, located on the chest and legs, make it easy for donning. All of the PeakWorks harnesses include fall indicators for ease of inspection and two lanyard parks for easy and safe storage. The shock-absorbing lanyard is certified to the newest ANSI standards. The shock-absorbing lanyard is permanently attached to the rear dorsal D-ring for simplicity. The lanyard is comprised of “tear webbing”, which will significantly limit and reduce the force of a fall on a worker.

## CONFINED SPACE KITS—COMPLETE KITS

- The PeakWorks engineering team has developed a unique tripod with distinct advantages over the competition
- The PeakWorks TR-100 Tripod offers a built-in pulley system that is located above the head assembly
- The placement of this pulley situates the wire rope cable directly over the center point of the tripod for superior perfect operator balance
- Locating the pulley system above the head assembly also allows the operator increased head room over traditional “below-the-head” pulley systems
- The PeakWorks TR-100 features adjustable aluminum legs complete with swivel steel feet and non-slip rubber bases
- The TR-100 can be used with a 65' (20m) Man-Rated Winch (MW-65G) or, by attaching the tripod mounting bracket, with a PeakWorks SRL-53303 60' (18m) or 108' (33m) recovery style SRL
- 7' (2.1m) tripod features adjustable locking legs, two additional anchorage points, non-slip safety feet and safety chain
- MW-65G man winch features 65' (20m) galvanized cable with swivel hook, 300 lb. (135kg) capacity
- 310 lb. (141kg) capacity (combined weight of person, tools, clothing, etc.)
- Meets or exceeds **CSA Z259.15** and **ANSI Z359.18** and **OSHA** requirements

## CONFINED SPACE KITS—REPLACEMENT COMPONENTS

Confined Space Tripod Systems are commonly used for fall arrest, rescue/retrieval, and material handling. Common applications for the PeakWorks confined space system include difficult to access areas such as manholes, sewer systems, tanks, pits, crawl spaces and silos.

**Quick note:** When using a confined space system, do not use the 3-way SRL as a primary means to lower or retrieve personnel or material. A man winch should be used instead and the 3-way SRL should be used as a secondary fall arrest system.

PeakWorks recommends the use of a confined space yoke in combination with a Class AE full-body harness when lifting or lowering personnel in to a confined space.

## RESCUE PRODUCT KITS

- OSHA requires that all employers meet the requirement for prompt rescue including personal escape, self rescue, and assisted rescue before employees work at heights.
- As time is critical when responding to a worker in need, it is incumbent upon all job sites to have the right equipment and proper training available in case of an emergency.
- PeakWorks offers a wide range of equipment and training to help you develop the rescue system required for your specific application.
- Contact your representative for details.

### Res-Q-Pole

- The PeakWorks Res-Q-Pole with Res-Q-Head is an innovative and effective solution designed to remotely connect a carabiner to a fallen worker or anchor.
- The pole is a strong yet lightweight fibreglass-constructed telescoping pole that reaches from 6' to 12' (1.8 to 3.7m).
- A lightweight bracket holds the carabiner open until the operator hooks onto the victim's D-ring or anchor and pulls back. At that point, the carabiner is released from the head and snaps shut.
- Designed for use with the CP-03015-1 carabiner (sold separately).

### Res-Q-Kit

- The Res-Q-Kit is a unique 4:1 100' (30.4m) raise and lower kit; it allows a person to be lowered using friction or raised by using a mechanical one-directional pulley.
- The Res-Q-Kit is our most effective retrieval kit.

### About Confined Space

A confined space is an area, other than an underground working, that:

- is enclosed or partially enclosed;
- is not designed or intended for continuous human occupancy;
- has limited or restricted means for entry or exit that may complicate the provision of first aid, evacuation, rescue or other emergency response or service;
- is large enough and so configured that a worker could enter to perform assigned work

Confined space has limited openings for entry and exit. Examples would be spaces such as: silos, vats, ship holds, sewers, tunnels, large pipelines and other such spaces that humans could enter to perform work.

## CONFINED SPACE AND RESCUE KITS

### Davit Systems

Davit systems are a permanent or temporary solution for confined space where a traditional tripod does not meet your needs. PeakWorks' davit system offers numerous configurations to suit an application.

#### Davit system includes:

- Davit V845534060, 3-way SRL-R rescue, and V845179065 man/material winch.
- Lightweight and portable
- High strength construction
- Easy, fast set up
- Man-rated for work positioning, confined space entry/retrieval, rescue, fall protection and material handling
- Rated for working load limit of one person (310 lbs capacity including clothing, tools and equipment)
- Legs can be adjusted to extend up to 6', 75" entry point.
- Reach 28"
- Height 84"
- Weight 89 lbs. (includes weight of 3-way SRL and winch)

#### Standards compliance:

- Work Positioning: **OSHA 29 CFR 1926, subpart L**
- Rescue: **ANSI Z359.4**
- Confined Space: **OSHA 1910.146, ANSI Z117.1**

## LADDER SAFETY SYSTEM

### What's Changed for Fixed Ladders Under OSHA 1910 Walking-Working Surface Standard?

Fixed ladders provide stability when ascending to an elevated work surface because they are fastened to a building or a secure surface. In the past, OSHA has required cages for ladders taller than 20 feet, but as of November 19, 2018, fall protection is required on ladders taller than or that extend beyond 24 feet. Several of the important changes are listed below.

- **New height requirement.** Fall protection is required on ladders taller than or that extend beyond 24 feet.
- **New equipment specification.** As of November 19, 2018, cages are no longer considered compliant fall protection in newly-installed ladders. To meet OSHA standards, a personal fall arrest system or a ladder safety system is required.
- **Repair/replacement specifications.** As of November 19, 2018, a personal fall arrest ladder system or ladder safety system will be used to replace any damaged or nonfunctioning section, cage, or well that was previously installed on a fixed ladder.
- **Need more information?** For a more detailed explanation of OSHA 1910, visit [www.osha.gov/walking-working-surfaces](http://www.osha.gov/walking-working-surfaces).

PeakWorks® offers two different ladder safety systems that meet or exceed the new regulations:

- **Fixed Rail System**
- **Cable System**

A low-angle photograph of a worker on a fixed ladder. The ladder is a cage-style structure with multiple rungs and side rails, mounted against a large, cylindrical metal tank with horizontal corrugations. The sun is shining brightly, creating a lens flare effect on the tank's surface. The sky is clear and blue.

**RAIL OR CABLE  
SOLUTIONS AVAILABLE  
FOR OUTDATED  
LADDER CAGES**

## LADDER SAFETY SYSTEM—CABLE

PeakWorks® vertical cable ladder systems are designed for hands-free movement and 100% protection. The system consists of a top and bottom bracket, and a cable that is attached to these brackets at both ends. The cable grab connects the worker to the system and provides a hands-free climb without ever having to manipulate the cable grab. For longer systems, PeakWorks® provides intermediate brackets to minimize the vibration of the system.

Systems come in standard lengths of 30', 50', 100', and 200' which are in stock and can be customized for exact requirements.

### Features:

- Fewer parts allow for simple installation and inspection
- Pre-swaged cable termination; 7x19 high-strength galvanized 3/8" steel cable provides simple and easy installation and low maintenance
- System designed for ladder rung installation only; contact SureWex for climb extension and removable extension options coming soon
- Designed working load is 310 lbs.
- Standards Compliance: **ANSI A10.14, OSHA 1910.66, 1926.500**

# LADDER SAFETY SYSTEM—CABLE

## CableGrab™

The CableGrab™ is a detachable sliding device which moves freely up or down hands free on the 3/8" galvanized steel cable. When the upward force is removed, the CableGrab device automatically locks at any point on the cable. The instantaneous locking is achieved through an effective cam-locking system. The system includes a double-locking carabiner which is to be used when securing the CableGrab™ device to the climber's full body harness.

- The CableGrab™ glides freely up or down the cable as the worker climbs
- Dual independent cams designed to immediately lock on to the cable and arrest the fall. The CableGrab™ will remain locked until the worker can step back onto the ladder or be rescued
- Easy to install and detach anywhere along the cable
- Intended for use on 3/8" diameter solid core cable system
- Intended for use with a 2" self-locking carabiner and attached to a front D-ring full-body harness
- Maximum length of the connector to the wire grab from the harness should not exceed 9'
- 2.75 lbs lightweight construction

## LADDER SAFETY SYSTEM—RAIL

### 2000 Series Climb-Rite® Fixed Rail Ladder Safety System

The Climb-Rite® fixed rigid rail ladder system offers workers 100% fall protection when climbing permanent ladders. Each are custom designed by our in-house engineering staff to provide the right solution for your needs. The system works by bringing four hardened steel brakes into contact with the rail as soon as a fall is detected. Using a detachable sliding sleeve that rolls freely up and down the rail, the Climb-Rite® system can be used both above and below ground, and on interior or exterior surfaces.

#### 100% Fall Protection for Fixed Ladders

The complete climbing system includes the Climb-Rite® device, 10' rail sections, rail splices, rail stops, parking pins, and rung clamps. The system has been designed without rail notches or serrations that can corrode or rust. Rail extensions and unique SkySwivel™ rotation device are available for safe ladder access and egress.

#### Features:

- System glides effortlessly, allowing hands-free movement up and down the ladder
- Easy to install, remove, and maintain
- Climbing device weighs only 2 lbs.
- All ladder hardware is corrosion-resistant stainless steel
- Type 316 stainless steel rail is available for marine or other corrosive environments
- Can be mounted to side or center of ladder
- Ladder extensions available
- Accommodates multiple workers
- Easy to order complete kits and simple installation kits
- Meets OSHA and ANSI standards

# EMERGENCY DESCENT SYSTEMS

**ESCAPE-RITE®  
SYSTEM SHOWN**

# EMERGENCY DESCENT SYSTEMS

## Escape-Rite® Series

PeakWorks' Escape-Rite® is an emergency controlled descent device that has been trusted in the field for decades. The Escape-Rite® device helps employers meet the OSHA requirement for prompt rescue including personal escape, self-rescue and assisted rescue. It is compact, lightweight, and very simple to use. Its bi-directional design provides the capability for more users to evacuate in a short period of time. As a descent is initiated, the other end of the rope ascends, making it ready for another rescue automatically. Available in two descent rate options of 3' or 6' per second, depending on the height and number of users needed to evacuate. Angled descent packages are available for approved applications ranging from 45 to 90 degrees.

- Unit Dimensions: 18" x 9.75" x 8"
- Maximum Working Load: 400 lbs. (181 kg)—one person descent at a time
- Weight: Unit w/ spool: 12.25 lbs. Cable: .06 lb./ft.
- Made in USA

PRODUCT NO.	MODEL NO.	Description	System Lengths	User Weight Capacity
V85531-XX	1003-DEVXXX	Escape-Rite descent rate approx. 3'/s (0.91m/s)	10'-300' (3m to 91.4m)	400 lbs. (181kg), one person descent at a time
V85532-XX	1006-DEVXXX	Escape-Rite descent rate approx. 6'/s (1.83m/s)	10'-300' (3m to 91.4m)	400 lbs. (181kg), one person descent at a time

-XXX denotes the length of the system

## Escape-Rite Applications

- Ski lift rescue
- Portable rescue
- High-rise buildings
- Overhead crane cabs
- Offshore oil rig platforms
- Scaffolds

## PeakWorks Advantage

- Fully automatic controlled descent
- Complete system, simple to use
- No power source or special skills required to operate

## ENGINEERED SYSTEMS

### Permanent Horizontal Lifelines

#### Permacable® Systems

The PeakWorks Permacable® system is pre-engineered, synthetic cable designed for horizontal lifeline applications. It is lightweight, strong, and has an excellent resistance to weather and chemicals. The synthetic cable reduces the forces transferred to the anchorage. Permacable® meets all recommended OSHA requirements for horizontal lifelines and can span up to 200' without intermediate supports, unlike traditional steel cable which require supports every 30' to 50'. It can support up to two workers at a time. A special red inspection liner in the cable alerts the user to wear or damage.

- Lightweight; only 15 lbs. per 100'
- Strong tensile strength 16,000 lbs.
- Spans up to 200' between anchorage and weighs only 15 lbs. per 100'
- Low anchorage points forces
- Low sag
- High chemical and wear resistance
- Adjustable length allows for use in permanent or semi-permanent applications.
- Special red liner alerts user to wear or damage. Allows up to four workers.
- Variety of prefabricated anchor points, posts and inverted L's are available.
- Meets **OSHA 1910.66, 1926 subpart M**
- Made in the USA

#### Temp HLL (Temporary Horizontal Lifeline)

Temporary, polyester rope horizontal lifeline system with bucket storage

##### Features

- Temporary, polyester rope horizontal lifeline that is ideal for electrical, built-up-scaffolding, tanks, vessels and catwalks.
- Low anchorage forces
- High strength, chemical resistant polyester rope lifeline
- Quick set-up and disassembly
- Continuous protection
- Spans up to 150' for one or two workers
- Three-strand polyester rope allows easy inspection of inner fibers
- Rope vise makes tensioning easy
- One system can be used for many different spans
- Meets OSHA and ANSI standards

##### Specifications

- Type: Polyester Rope Horizontal Lifeline Kit
- Length: 30' to 100'
- Standards: Meets **OSHA 1910.66, 1926 subpart M**
- Made In USA

# TOOL TETHERING SYSTEM

## PEAKWORKS TOOL COLLAR

### A Complete Tool Tethering Safety System!

- PeakWorks introduces the patented Tool Collar tool tethering system, designed to protect workers from tools dropped at height
- Developed and manufactured in Canada, the Tool Collar system offers a unique tool attachment product that provides the strongest, most secure tool anchor clamping mechanism in the market
- The high-strength HDPE clamps can be securely mounted onto a wide variety of flat, hex, and round shaped tool bodies, ensuring a powerful and positive tether anchor point
- HDPE materials work in both extreme cold and high heat applications and are very durable and long lasting
- The clamps are secured using high-strength fasteners and are easily installed and removed using the hex key wrench provided in the kit
- Unlike traditional heat-tape anchoring systems, our clamps can be reused and/or repositioned at any time—a true cost saving system
- **Bonus**—Tool Collar anchor clamps have been specially designed to prevent tools from falling through commonly used construction site grating (19-4)
- No other tool tethering program offers this added safety feature!
- All Tool Collar anchor clamps feature a strong, molded eye hole for quick attachment to/ detachment from wrist or standard lanyards with built-in carabiners
- Currently there are no ANSI or CSA standards for tool tethering systems; however, all Tool Collar products were subjected to an extreme and rigorous series of tests at CSA's test lab to ensure maximum peace of mind and safety
- All Tool Collar anchor clamps are available in individual blister packs or 10-piece bulk packs (five bulk packs—50 pieces per box)

### Tool Collar Round Clamp

- Designed for use with round and hex shank tool bodies
- Available in four sizes: 1/2", 5/8", 3/4" and 7/8"

PRODUCT NO.	MODEL NO.	Type	Size	Package Qty.
V8561101	TT-1000-1	Round	1/2"	1 Piece (Blister)
V8561102	TT-1000-10	Round	1/2"	10/Box, 50/Carton*
V8561201	TT-2000-1	Round	5/8"	1 Piece (Blister)
V8561202	TT-2000-10	Round	5/8"	10/Box, 50/Carton*
V8561301	TT-3000-1	Round	3/4"	1 Piece (Blister)
V8561302	TT-3000-10	Round	3/4"	10/Box, 50/Carton*
V8561401	TT-4000-1	Round	7/8"	1 Piece (Blister)
V8561402	TT-4000-10	Round	7/8"	10/Box, 50/Carton*

### Tool Collar Flat Clamp

- Designed for use with wide or flat tool bodies
- Available in two sizes: 15/16" W x 5/16" H (small) and 1-15/16" W x 9/16" H (large)
- Small flat clamp fits a range of wrenches of approximately 7/16" to 1-1/4"
- Large flat clamp fits a range of larger wrenches approximately 1-1/4" to 1-7/8"

PRODUCT NO.	MODEL NO.	Type	Size	Package Qty.
V8561501	TT-5000-1	Flat	15/16" x 5/16"	1 Piece (Blister)
V8561502	TT-5000-10	Flat	15/16" x 5/16"	10/Box, 50/Carton*
V8561601	TT-6000-1	Flat	1-15/16" x 9/16"	1 Piece (Blister)
V8561602	TT-6000-10	Flat	1-15/16" x 9/16"	10/Box, 50/Carton*

### Tool Collar Press Block

- Designed for use with round and hex shank tool bodies and larger tools
- Available in two sizes: 1/2" to 3/4" and 1-1/16" to 1-1/4"
- Comes with standard hex-shaped opening and includes a separate rubber insert that can be placed between the tool and the clamp for extra sizing compatibilities and increased clamping grip

PRODUCT NO.	MODEL NO.	Type	Size	Package Qty.
V8561701	TT-7000-1	Press block	1/2" to 3/4"	1 Piece (Blister)
V8561702	TT-7000-10	Press block	1/2" to 3/4"	10/Box, 50/Carton*
V8561801	TT-8000-1	Press block	1-1/16" to 1-1/4"	1 Piece (Blister)
V8561802	TT-8000-10	Press block	1-1/16" to 1-1/4"	10/Box, 50/Carton*

### Tool Collar Lanyards

- The PeakWorks Tool Collar tethering system includes two specially designed lanyards that connect the tool anchor clamp to either the operator or to a suitable anchor point
- The wrist lanyard features a built-in heavy duty adjustable wrist collar on one end and a small carabiner on the other, conveniently tethering the tool to your wrist
- The standard lanyard features two small carabiners designed to connect to the tool anchor clamp and the other end to operator (or a suitable anchor)
- The small carabiner is designed to fit into the molded eye hole built-in to each of the Tool Collar HDPE clamps and is used to tether the tool to your body or to a suitable fixed anchor
- Both lanyards can also be used and mounted to variety of other tools in the market that feature hanging hole openings (i.e., adjustable wrenches and pipe wrenches)
- Tool Collar lanyards are designed for use with tools with a maximum weight of 15 lbs. Do not exceed this weight limitation

PRODUCT NO.	MODEL NO.	Type	Size (unstretched)	Package Qty.
V856210	TT-9900	Wrist	13"	1 Piece c/w Hang Card
V856211	TT-9900-10	Wrist	13"	10/Box, 50/Carton*
V856220	TT-9901	Standard	32"	1 Piece c/w Hang Card
V856221	TT-9901-10	Standard	32"	10/Box, 50/Carton*
V856230	TT-9902	Slim line no locking carabiners		1 Piece c/w Hang Card
V856231	TT-9902-BULK	Standard	13"	10/Box, 50/Carton*
V856240	TT-9903	Slim line with locking carabiners		1 Piece c/w Hang Card
V856241	TT-9903-BULK	Slim line with locking carabiners		10/Box, 50/Carton*
V856250	TT-9904	Slim line with loop & locking carabiner	28"	1 Piece c/w Hang Card
V856251	TT-9904-BULK	Slim line with loop & locking carabiner	28"	10/Box, 50/Carton*

\*Please note: All Tool Collar products are available individually, or in bulk 10 packs which are then master-packed five packs (50 pieces) per carton. Save by purchasing in both 10-packs and master packs of 50.

V890252  
Tool Tether Display

### Tool Tether Display

- Everything you need to get started with the new Tool Tethering System
- Designed for use on peg board or slot wall
- Modular design allows for additional merchandisers to be incorporated as needed
- 2' x 2' (70cm x 70cm) footprint that takes up less space than conventional displays
- Sets up in minutes—tool tethers, hardware, and graphics all included

## ANSI Standards

Z359.11-2014	Safety Requirements for Full Body Harness
Z359.13-2013	Personal Energy Absorbers Energy Absorbing Lanyards
Z359.14-2012	Safety Requirements for Self Retracting Devices for Personal Fall Arrest Systems and Rescue Systems
Z359.15-2014	Safety Requirements for Single Anchor Lifelines and Fall Arrester for Personal Fall Arrest Systems
Z359.12-2009	Connecting Components for Personal Fall Arrest Systems
Z359.1-2017	Safety Requirements for Anchorage Connectors for Active Fall Protection Systems

## CSA Standards

CSA Z259.1-05 (R2010)	Safety Belts and Saddles for Work Positioning and Travel Restraint
CSA Z259.2.2-17	Self-Retracting Devices for Personal Fall-Arrest Systems
CSA Z259.2.3-16	Descent Control Devices
CSA Z259.2.4-15	Fall Arrester and Fixed Rigid Rails
CSA Z259.2.5-17	Fall Arresters and Vertical Lifelines
CSA Z259.10-18	Full Body Harness
CSA Z259.11-17	Energy Absorbers and Lanyards
CSA Z259.12-16	Connecting Components for Personal Fall Arrest Systems
CSA Z259.13-16	Flexible Horizontal Lifelines
CSA Z259.14-12	Fall Restrict Equipment for Wood Pole Climbing
CSA Z259.15-12	Anchorage Connectors
CSA Z259.17-16	Selection and Use of Active Fall-Protection Equipment and Systems

## OSHA REGULATIONS GOVERNING CONSTRUCTION (29 CFR PART 1926)

**Subpart E** covers various requirements for personal protective equipment.

Safety Belts, Lifelines and Lanyards	1926.104
Safety Nets	1926.105

**Subpart L** covers Scaffolds. 1926.450-454

**Subpart M** covers fall protection fully, including when and where fall protection systems are required and for what construction work activities. It also defines system component requirements.

Scope, Application and Definitions	1926.500
Duty to Have Fall Protection	1926.501
Fall Protection Systems Criteria and Practices	1926.502
Training Requirements	1926.503

**Subpart X** covers Ladders 1926.1053

## OSHA REGULATIONS GOVERNING GENERAL INDUSTRY (29 CFR PART 1910)

**Subpart D** mentions a few specific Fall Protection requirements relative to walking/working surfaces.

Fixed Ladders, Ladder Safety Devices	1910.27(d)(5)
Safety Requirements for Scaffolding, Boatswain's Chairs	1910.28(j)(4)

**Subpart F** covers fall protection as it pertains to powered platforms, man lifts, and vehicle mounted work platforms.

Maintenance	1910.66
Personal Fall Arrest Systems	1910.66

**Subpart J** covers general environmental controls in which confined spaces are addressed.

Confined Spaces	1910.146
-----------------	----------

## ANSI STANDARDS GOVERNING CONSTRUCTION AND DEMOLITION OPERATIONS

Safety Requirements for Personal Fall Arrest Systems, Subsystems and Components	Z359.1-2007
---	-------------
