

WINTER WALKING

WE DON'T JUST MAKE ICE CLEATS, WE MAKE SLIPS & FALLS DISAPPEAR

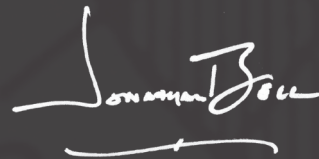

IT'S TIME TO PUT YOUR EMPLOYEES IN **THE RIGHT ICE CLEAT.**

Welcome to our brand new fully revised 2020 Catalog. What you will find in this catalog is a common sense approach to outfitting your employees with the most appropriate ice cleat for the job they do. One that will not only increase traction, but that will allow your employees to work and function in a normal capacity.

Since 1974 Winter Walking has been helping the largest corporations in North America to reduce their slips and falls in winter conditions. Our products are easy to use, durable and guaranteed to reduce accidents in your organization.

At Winter Walking, we don't just make ice cleats, we make slips and falls disappear.

Thank you,

Jonathan Bell -CEO
Winter Walking

Jordan Bell - President
Winter Walking

THE EASIEST WAY TO FIND THE CORRECT ICE CLEATS FOR YOUR EMPLOYEES.

Whether you are just getting started or already have a slip and fall program in place the world of ice cleats and traction aids can be a confusing one. In order to simplify the process we have created a system that allows you to focus on what you know best... your employees.

Every job task within your organization should fall within one of the three categories listed below. Focusing on the proper category will allow you to narrow your focus down to only those traction aids that are appropriate for that type of work. The traction aids in each category are color coded in order to help you implement, communicate and manage your slip and fall program.

WALKING TRACTION®

For employees who occasionally walk outdoors exposing themselves to icy and snowy conditions. These employees require a simple and often economical solution that is easy to use and light in weight.

INTENDED FOR: Simple Walking Outdoors

WORKING TRACTION®

For employees whose jobs require them to work outdoors in all weather conditions. These employees have the most exposure to ice and snow and therefore require the most aggressive traction.

INTENDED FOR: Sustained outdoor work

TRANSITIONAL TRACTION®

For employees who are exposed to ice and snowy surfaces while also frequently transitioning to indoor settings or operate vehicles. Ideal for employees who prefer to leave their traction aid on all day.

INTENDED FOR: Transitioning indoors to outdoors.

WALKING TRACTION®

ICE CLEATS FOR WORKERS WHO REQUIRE A LIGHTWEIGHT DEVICE THAT IS EASY TO TAKE ON AND OFF.

WALKING TRACTION® ice cleats are ideal for employees who are asked to walk outside on ice and snow but do not necessarily spend their entire day working outside. These are lightweight devices that are easy to put on and take off while providing aggressive traction when outdoors. WALKING TRACTION® ice cleats are typically the most economical solution.

SPARE SPIKE™

Model JD510

DOWNLOAD PRINTER FRIENDLY VERSION

The traction on SPARE SPIKE™ ice cleats comes from 16 tungsten carbide studs underfoot which enable employees to walk confidently in winter conditions. The spikes on the SPARE SPIKE™ are replaceable and can be done so without any special tools. Each pair of SPARE SPIKE™ features a patent pending “spare cleat” built into the upper portion of the toe area, offering a quick replacement part for a suddenly missing cleat.

The SPARE SPIKE™ ice cleat features dual rear pull-tabs for easy on and off and also has a treaded sole that is designed to provide additional traction in thicker snow conditions.

- Durable Tungsten Carbide Studs for Longer Wear
- Low Temp Elasticity for Guaranteed Stretch
- Lightweight and Compact
- Replaceable Studs
- Patent Pending “Spare Spike” on Toe
- Aggressive Tread for Deep Snow Traction
- Dual Rear Pull-Tab for Easy On/Off
- Part Of The Color Coded Traction™ System

EASY SPIKE™

Model JD350

DOWNLOAD PRINTER FRIENDLY VERSION

The EASY-SPIKE™ ice cleat is a compact and light weight industrially designed winter traction device that fits easily over all types of shoes and boots. Extremely easy to use they can be put on or taken off in seconds. Light in weight, the EASY-SPIKE™ is virtually inconspicuous on the user's foot or when carried in a pocket.

EASY-SPIKE™ ice cleats feature 22 "molded-in" carbonized steel studs for durable and permanent walking traction for employees that are faced with harsh outdoor ice and snow conditions. With the EASY-SPIKE™, employees can have the confidence to walk in harsh conditions while still wearing their everyday footwear.

- Molded in Carbonized Steel Studs
- Low Temp Elasticity for Guaranteed Stretch
- Lightweight and Compact
- Unique Contemporary Design
- Aggressive Tread Design
- Single Rear Pull-Tab for Easy On/Off
- Part Of The Color Coded Traction™ System

HEEL-GRIPS®

Model JD325

DOWNLOAD PRINTER FRIENDLY VERSION

HEEL-GRIPS® ice cleat is a light weight and compact heel grip for boots. Extremely easy to use, they can be put on or removed in seconds. Weighing in at less than 4 ounces per foot, HEEL-GRIPS® are virtually inconspicuous on the user's foot.

The traction on HEEL-GRIPS® ice cleats comes from 14 high-profile tungsten carbide studs per pair, which enable employees to walk confidently in winter conditions. The tungsten carbide studs are molded into the sole for maximum durability.

HEEL-GRIPS® feature a fully adjustable and replaceable upper strap. Adjust the strap as needed for various styles of footwear, or replace it entirely if worn out.

- Durable Tungsten Carbide Studs For Longer Wear
- Molded In Studs For Maximum Durability
- Heel-Only Traction
- Lightweight And Compact
- Aggressive Tread For Deep Snow Traction
- Replaceable Upper Strap
- Part Of The Color Coded Traction™ System

WORKING TRACTION®

ICE CLEATS FOR OUTDOOR WORKERS THAT REQUIRE AGGRESSIVE TRACTION & INDUSTRIAL STRENGTH DURABILITY.

WORKING TRACTION® ice cleats are designed for your employees who have the most exposure to icy and snowy conditions. These ice cleats are built with two primary purposes; aggressive traction and industrial strength durability. WORKING TRACTION® devices range from lightweight and easy to get on and off to heavy duty 14" insulated overshoe boots.

HIGH-PRO® ICE CLEAT

Model JD6625

DOWNLOAD PRINTER FRIENDLY VERSION

HIGH-PRO® Ice Cleats are a compact, light industrial strength ice and snow walking device that fits easily and conveniently over all types of shoes and boots. Light in weight, HIGH-PRO® Ice Cleats are virtually inconspicuous on the user's foot. The traction comes from 26 aggressively exposed tungsten carbide studs. The tungsten carbide studs are molded in for maximum durability and allow employees to walk confidently in harsh winter conditions.

The HIGH-PRO® Ice Cleat features a patent pending dual elasticity design that helps to facilitate an easy on/off process. Reduced elasticity in the sole ensures greater abrasion resistance and overall increased durability.

- High-Profile Studs For Maximum Traction
- 26 Molded in Tungsten Carbide Studs for Max Durability
- Patent Pending Dual Elasticity
- Max Elasticity in the Upper for Easy On/Off
- Reduced Elasticity in Sole for Max Abrasion Resistance
- Lightweight and Compact
- Aggressive Tread for Deep Snow Traction
- Dual Rear Pull-Tab for Easy On/Off
- Part Of The Color Coded Traction™ System

TRANSITIONAL TRACTION®

ICE CLEATS FOR WORKERS REQUIRED TO DRIVE & FREQUENTLY TRANSITION FROM INSIDE TO OUT.

TRANSITIONAL TRACTION® ice cleats are designed for the employees who are often the most difficult to provide traction for; those who frequently transition from outdoors to indoor settings and/or drive vehicles. The key to TRANSITIONAL TRACTION® devices is that they can be left on all day without the need to be removed each time you walk indoors.

LOW-PRO® ICE CLEAT

Model JD6610

DOWNLOAD PRINTER FRIENDLY VERSION

LOW-PRO® Ice Cleat is a compact, light weight industrial strength ice and snow walking device that fits over all types of shoes and boots. Extremely easy to use and light in weight, they are virtually inconspicuous on the user's foot.

The traction comes from 26 minimally exposed tungsten carbide studs that allow the employee to gain traction in winter conditions while still being able to navigate clean surfaces with reduced risk of surface damage. This makes them generally safer to wear both indoors and while driving, reducing the need for your employees to continually remove them.

- Low-Profile Studs for Versatile Traction
- 26 Permanent Tungsten Carbide Studs for Max Durability
- Safer to Wear Indoors and While Driving
- Dual Rear Pull-Tab for Easy On/Off
- Part Of The Color Coded Traction™ System
