ABOUT GLOVE GUARD LP

Glove Guard LP is committed to providing quality products that meet the basic needs of keeping up with required personal protective equipment. Located in The Highlands, Texas, USA, some of the Limited Partners have been with the Glove Guard® product since its inception. Glove Guard LP was founded August 1999 and maintains a strong commitment to manufacturing products that consider the full scope of return on investment for the consumer.

It has been our policy to listen to the concerns of the people using the products and then respond by providing simple tools that work. Glove Guards product lines have withstood the test of time by offering several aspects of bottom line savings while keeping the safety of the worker in mind. All products undergo inspection and testing to ensure compliance with our own high standards of integrity and quality.

All of the products carry replacement guarantees if they break while doing their job. Glove Guard LP has a dedicated staff of personnel who genuinely care and are ready to assist both direct and indirect customers. We manufacture products but aim never to lose sight of people.

RETRUN ON INVESTMENT

1. Use of Glove Guard® products reduces direct and indirect costs associated with hand injuries. If personal protective equipment is available, it will be utilized.

“Use of the Glove Guard® clip has enabled us to far surpass our initial expectations. It has become as common as hard hats and safety glasses. Record able hand injuries have been reduced as much as 86%. Thanks for your continued support and assistance in making our site safer and more cost efficient.”

— Polymers Group, Mont Belview Plant

2. Use of Glove Guard® products reduces glove replacement costs and the costs associated with environmental cleanup. The redundant breakaway also provides a level of reduced liability.

In the Houston, Texas area, Several General Contractors on major building sites require Glove Guard® products for all contractors that work on the premises due to reduced glove loss. The strong grip of the product ensures that the items stay attached instead of just falling off, and the redundant breakaway reduces the possibility of attached items pulling an employee into machinery.

“In the last 3 months, about 80% of the glove replacement cost is due to lost or misplaced gloves, Your product will help greatly reduce that number.”

— Darren Matthews

3. Use of Glove Guard® products along with a company’s safety program incentive combines the dollars spent with tools that help accomplish the safety goals.

Major companies are using Glove Guard® products as safety incentives with their logo, safety program’s slogan, or one of our 9 Standard Safety Slogans to get the safety message across while providing a tool to accomplish the safety goal and reduce glove replacement costs.

GLOVECLIPS

GLOVE GUARD® CLIP

The Glove Guard® Clip is the original glove clip that features a flexible redundant safety breakaway. For over twenty years it has proven that its implementation can drastically reduce glove replacement cost and hand injuries because workers will have their gloves with them when needed. To use, attach the small end to your belt loop or directly to clothing and clip the large end to your gloves.

Custom imprinting is available for this product. For more information please see page 21.

METAL DETECTABLE CLIP

Glove Guard®

Handi Klip®

Utility Guard®

The Glove Guard®, Handi Klip®, and Utility Guard® glove clips are available molded entirely out of metal detectable plastic. This plastic was designed with the food processing industry in mind to keep gloves safely close at hand.

Custom imprinting is available for this product. For more information please see page 21.

CORD MANAGEMENT

OKTOLOCK® CLIP

The OktoLock® clip is made out of a strong, durable, and flexible PC-ABS plastic that is manufactured in the USA. It's unique features securely fasten cords hoses, or cables to railings, pipes, or lifts. Designed with the worker in the mind the OktoLock® clip takes those waiting trip hazards and securely contains them to a safe, elevated location.

PART NUMBER	COLOR
OK0203BK	BLACK
OK0203YW	YELLOW

UTILITY CATCHER® CLIP

The Utility Catcher® clip is a versatile catch-all for a variety of tools and PPE items. It can be worn on a belt, slid on a grid wall or hung on a wall with the keyhole! The Utility Catcher® clip is perfect for cord management, ear muffs, larger gloves, hard hats, face shields, hoses, safety lanyards, and much more! To use slide the clip over your belt and then open by either pulling outward on the tab or twisting left or right. Once open, insert the item you wish to hold and close.

Custom imprinting is available for this product. For more information please see page 21.

CABLESAFE® CABLE RAIL

Avoid tripping accidents by smaller cables by using the cable management product: Cable Rail. The unique reverse hook arrangement allows cables to be quickly and easily loaded. Cable rail can be directly surface mounted with two screws or attached to poles and columns with its cable tie features. Cable rail provides the perfect solution to safely handling and managing cable runs in any industrial sector using smaller cables.

Part Number | CS-CR, description

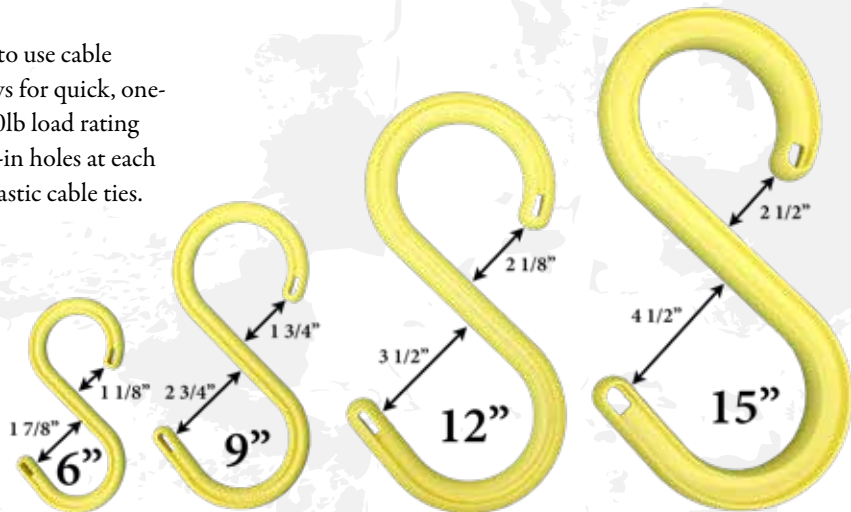

Part Number | CS-CRHD, description

CABLESAFE® SAFETY HOOKS

The CableSafe® safety hooks is an ultra-strong, easy to use cable management solution. The open-ended design allows for quick, one-handed installation, while still providing up to a 340lb load rating from the glass-filled polyester material. The molded-in holes at each end allow you to secure the hook and cables with plastic cable ties.

HARD HAT ACCESSORIES

GOGGLE GUARD® CLIP

PART NUMBER	COLOR
80200BL	BLUE
80300RD	RED
80400YW	YELLOW
80510WH	WHITE

The Goggle Guard® clip is a fast and convenient way to keep safety goggles or glasses securely held to a hard hat. The clip snaps to the brim of both full brim and ball cap style hats without any alterations or detriment to the hat. The Goggle Guard® clip also features a pencil clip that can hold a No. 2 or carpenter pencils or any small to medium sized pens.

Custom imprinting is available for this product. For more information please see page 21.

Goggle Guard™ Kit (*Accessory Kit, Goggle Guard™ Clip*)

Complete Headlamp Kit (*Headlamp, Goggle Guard™ Clip, Accessory Kit*)

HAT GRABBER®

The Hat Grabber® hard hat component offers you the most comfortable and secure way to wear a hard hat. It is simple but useful part that is a perfect complement to your existing suspension gear and allows it to be adjusted more loosely for comfort. Using the Hat Grabber® hard hat component reduces neck strain, headaches, and discomfort. To install, just wrap it around the suspension system and buckle together.

Part Number | HG10

UTILITY BAG™ TOTES

CUSTOM UTILITY BAG

Need a bag that fits a specific application on your jobsite? Contact us and ask about our custom bag options!

HALF MASK RESPIRATOR TOTE

If you are required to have a respirator on site at all times, whether you use it or not, then this Utility Bag™ Half Mask Respirator Tote by Glove Guard LP is a great place to carry it. The tote keeps your respirator fully assembled and stowed until needed, while the adjustable belt allows you to carry the bag hands free. Made from a durable 1200D polyester fabric, the tote holds up to the most rigorous environments and helps keep the mask clean when not in use.

Part Number | UBHMR

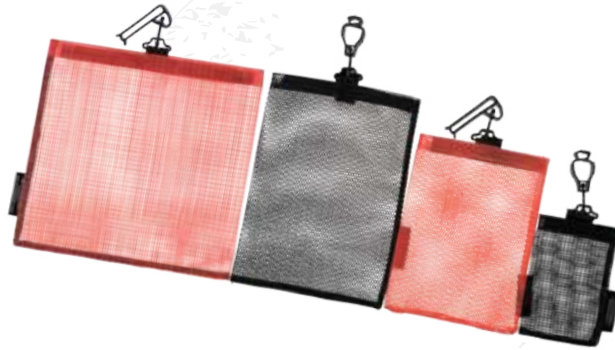

FULL MASK RESPIRATOR TOTE

Much like our Half Mask Respirator tote, the full mask tote also allows you to keep your mask fully assembled and properly stowed when not in use. Thus increasing the longevity and the integrity of the mask. The 1200D Polyester ensures that the face shield doesn't get any unwanted scratches, while the included adjustable belt makes carrying convenient and simple. Fits small, medium and large full masks.

Part Number | UBHMR

OPEN MESH UTILITY BAG™

The Open Mesh Utility Bag™ tote has an open weave design for visibility and breathability.

KEWLLID®

KEWLID®

The KewLid™

Is easy to use. Just place it on top of either a 44-gallon trash can or a 55-gallon drum and it is ready to work. It supports a beverage cooler while leaving an opening to dispense trash.

Part Number | **KL10101**

REASONS TO USE KEWLLID®

Proper hydration is vital for health and well-being and the KewLid® cover your hydration station can be consolidated to a single space saving tower. Also since using the KewLid® cover provides a space for cups, single-serve drink mixes and a trash receptacle it can increase productivity!

Bottle water costs over 100 times as much as tap water per gallon and is no healthier or cleaner than tap water. In fact, bottled water isn't as tightly regulated as tap and can have more contaminants or bacteria. Bottles also create a huge environmental problem from both their production and disposal.

BOTTLECHOCK®

OVERVIEW

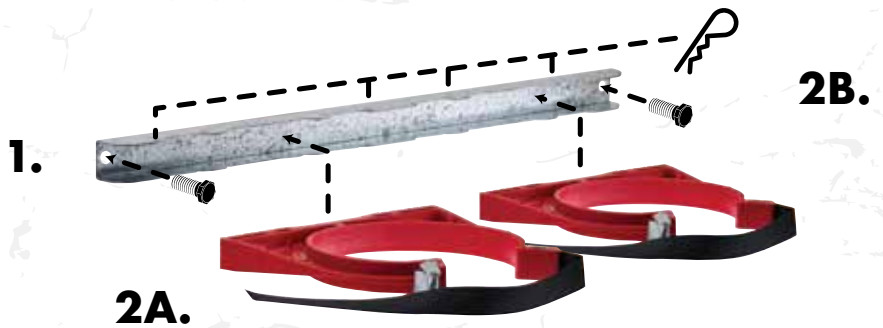

A gas cylinder hitting the ground can be catastrophic, and yet all too often they are being "secured" by a loose chain. By conforming to the bottle and restricting all forms of movement, the BottleChock™ restraint takes an extra step in ensuring your cylinders are fully secured.

Features

- Completely Restricts Cylinder Movement
- Quick Cylinder Change Over
- Available in a range of sizes
- Flexible design makes it a "Snap to place cylinders"

EASY 3-STEP INSTALL

1. Secure the bracket with bolts of any length to suit your application. Bracket holes suit 3/8" bolts or 5/16" bolts for small kits.

2A. Fasten the restraint into the bracket.

2B. There is two pins for each restraint.

3. Insert pins and it is ready to use.

SINGLE CYLINDER BRACKET

The single cylinder bracket is galvanized or stainless steel and is available in four sizes.*
