# DuPont Controlled Environments garments

Quality, comfort, and durability for your cleanroom. For more than 200 years, DuPont has been putting science to work by creating sustainable solutions essential to a better, safer, healthier life for people everywhere. One of the areas in which safety and health are of paramount importance is in cleanrooms and controlled environments.

DuPont understands your need to do everything possible to improve productivity and reduce risk in your controlled environment. The DuPont Controlled Environments (CE) portfolio offers a comprehensive selection of single-use cleanroom apparel and accessories designed for use in pharmaceutical, medical device, biotech, and electronic settings that require high standards for particle and microbiological contamination control.

DuPont™ Tyvek® garments have a long history of use in cleanrooms due to their excellent barrier to particles,

microorganisms, and non-hazardous liquids. They offer an ideal balance of protection, durability, and comfort. They are available in many styles for different cleanroom and controlled environment applications.

With the DuPont Controlled Environments offering, you get the advantage of a wide range of proven, science-based solutions that help keep your cleanroom environment protected.

# DuPont garment material

## Tyvek® sterile garments

The highest performing garments in our product line are made from Tyvek®, which has been used to make high-quality cleanroom garments for more than 25 years. Tyvek® is made by DuPont with a proprietary flash-spinning process that creates continuous fibers of high-density polyethylene that are randomly distributed and non-directional.

Tyvek® is tough, yet lightweight and soft.

Tyvek® offers an ideal balance of protection, durability, and comfort.

Tyvek® acts as a breathable barrier against particles and bacteria.

Tyvek® repels aqueous liquids and liquid aerosols.

Tyvek® is inherently low linting and abrasion resistant.

Image shown at 200x magnification.

**Tyvek® is made with a unique flash-spinning process that creates a tortuous path for particles.**

## Single-use garments from DuPont

DuPont sterile cleanroom garments, designed for single use, offer meaningful advantages in today's challenging cleanroom environments, including:

- **Quality**—single-use garments are not subjected to multiple cycles of wearing, laundering, and sterilization, so fabric barrier and strength are consistent and predictable.
- **Flexibility**—the DuPont single-use apparel program allows you to order only the quantities that you plan to use, which offers flexibility as your needs change.
- **Cost control**—single-use garments help eliminate budget uncertainties associated with garment repair, damage, and loss, helping you to better predict expenditures.

## DuPont quality systems for cleanroom garments

DuPont single-use garments for controlled environments offer the following standards of quality:

- The DuPont Controlled Environments quality management system is ISO 9001:2015 registered.
- Tyvek® IsoClean® sterile garments have a sterility assurance level (SAL) of  $10^{-6}$ . Radiation doses are validated in accordance with ANSI/AAMI/ISO 11137 through bioburden and dose verification testing.
- Tyvek® IsoClean® sterile garments are gamma irradiated in a facility that is registered by ISO 13485 quality standard and adheres to the requirements of ANSI/AAMI/ISO 11137.
- A Certificate of Sterility and a Certificate of Compliance come with every shipment of sterile single-use garments.
- Dose audits are conducted quarterly to maintain dose validation.
- Customers are invited to audit our manufacturing and sterilization facilities.
- Quality documentation is readily available and accurate when requested to help meet customer requirements.
- Lot traceability is maintained through garment manufacturing, processing, and sterilization.

# Controlled environments apparel selection guide

When it comes to working in a broad range of controlled environments, specifiers have many product options from which to select. The process to understand which option matches a given environment can be confusing and taxing. DuPont has tried to help reduce some of that burden by providing a complete line of products and information to help guide specifiers through their selection process.

To get the most out of your cleanroom apparel, it is necessary to understand where each product can be used. To provide a quicker overview of our products and where they are intended for use, we developed the simple guide below. Our goal is to provide the appropriate DuPont product that is suitable for a given environment or hazard.

## Fabric performance features

Fabric	Available sterile	Particle barrier	Non-hazardous liquid barrier	Comfort	Durability	Static dissipation†	Particle shedding	Strengths
Tyvek® IsoClean® flashspun polyolefin, clean-processed	Yes CS option	✓+	✓	✓+	✓+		✓+	Ideal combination of protection, durability, and comfort
Tyvek® IsoClean® flashspun polyolefin	Yes OS option	✓+	✓	✓+	✓+	✓+**	✓+	Ideal combination of protection, durability, and comfort
Tyvek® Micro-Clean® 2-1-2 flashspun polyolefin	Yes OS option	✓+		✓+	✓+	✓**	✓+	The protection, durability, and comfort of Tyvek® with a unique blue color
DuPont™ ProClean® microporous films	No	✓+*	✓+*	✓	✓	✓+	✓	Effective liquid barrier; low cost

## DuPont Controlled Environments garments: Tyvek® IsoClean®, Tyvek® Micro-Clean® 2-1-2, ProClean®

Environments	Tyvek® IsoClean®				Tyvek® Micro-Clean® 2-1-2		ProClean®**	Considerations
	Clean-processed sterile	Sterile	Clean-processed non-sterile	Bulk non-sterile	Sterile	Non-sterile**	Non-sterile	
ISO Class 5 Aseptic Cleanrooms (Former FED-STD-209E; Class 100)	✓+	✓			✓			Tyvek® IsoClean® sterile garments offer excellent cleanliness, barrier, and sterility assurance level.
ISO Class 6, 7, and 8 Bioburden Control Areas (Former FED-STD-209E; Class 1000, 10,000 and 100,000)	✓+	✓+			✓+			Tyvek® IsoClean® sterile garments offer excellent cleanliness, barrier, and sterility assurance level.
ISO Class 6, 7, and 8 Cleanrooms (Former FED-STD-209E; Class 1000, 10,000 and 100,000)			✓+	✓+	✓+		✓	Tyvek® is durable, low-linting and provides an inherent particle barrier. Clean processing and bound seams should be considered for more critical environments.
<b>Hazards</b>								
Non-hazardous dry particles	✓+	✓+	✓+	✓+	✓+	✓+	✓+	Tyvek® provides an inherent barrier against small particles. Bound seam garments offer a higher level of protection than serged seam garments.
Non-hazardous, light liquid splash	✓	✓	✓	✓			✓+	ProClean® provides an effective barrier against a variety of common non-hazardous liquids.
Hazardous powders Notice: DuPont Controlled Environments garments should not be used in potentially explosive or flammable environments.	✓+	✓+	✓+	✓+				Use bound seam garments when working with hazardous powders.
Hazardous liquid splash Examples: organic solvents, caustics								Please refer to our DuPont™ Tychem® product line for liquid and vapor chemical protection.
Electric arc, industrial fire hazard, welding								Please refer to DuPont™ Nomex® for flame-resistant apparel. Controlled environment garments are not suitable for firefighting activities, nor for protection from hot liquids, steam, molten metals, welding, electric arc, or thermal radiation.
<b>Do Not Use</b>

# How to interpret DuPont product part numbers

To simplify ordering and inventory management, we developed a simple, logical, and intuitive product part numbering system. Using only 16 characters, each part number comprises abbreviations that provide all the information you need.

## Base catalog number

The first six characters provide the basic representation of the product.

## Additional product detail

The remaining characters provide additional product detail and complete the full part number.

### Fabric

The first two characters are the fabric description.

#### Abbreviations

- CC** Tyvek® Micro-Clean® 2-1-2
- DT** Dura-Trac™
- IC** Tyvek® IsoClean®
- ML** Sierra™
- PB** ProShield® 10
- PC** ProClean®
- PE** ProShield® 30
- PP** Polypropylene
- QC** Tychem® 2000
- SL** Tychem® 4000
- TJ** Tyvek® 800
- TP** Tychem® 6000 FR
- TY** Tyvek® 400
- TY** Tyvek® 600

### Style

DuPont offers a wide array of garment styles— from hoods, aprons, and coveralls to fully encapsulated suits.

Each garment style has a unique three-digit code.

### Seam construction

#### Abbreviations

- S** Serged or sewn
  - B** Bound
  - T** Taped or double taped
  - O** No seam
- See page 10 for details.

### Color

Several DuPont fabrics are available in color options.

#### Abbreviations

- BU** Blue
- OR** Orange
- WH** White
- YL** Yellow

### Size

Many DuPont garments are available in a range of sizes; refer to catalog descriptions for details.

#### Abbreviations\*

- SM** Small
  - MD** Medium
  - LG** Large
  - XL** Extra large
  - 2X** 2 Extra large
  - 3X** 3 Extra large
  - 4X** 4 Extra large
  - 5X** 5 Extra large
  - 6X** 6 Extra large
  - 7X** 7 Extra large
  - 8X** 8 Extra large
  - OO** Universal
- See page 41 for sizing chart.

### Case count

The number of garments per case.

### Options

#### Abbreviations

- CS** Clean-processed and sterile
- TS** Sterile, double-bagged
- OS** Sterile
- OC** Clean-processed
- PI** Individually packaged
- OO | OB** Bulk
- BH** 50/bag
- MP** Multipack

Not all option codes are available for all products; refer to catalog descriptions for details.

See page 11 for descriptions.

\*Not all sizes are available in all styles.

# Tyvek® IsoClean® garments

## For ISO 4/5 (class 10/100) and ISO 7/8 (class 10,000/100,000) controlled environments

One of the most popular products in the DuPont Controlled Environments portfolio, Tyvek® IsoClean® clean-processed and sterile single-use garments offer an ideal balance of protection, durability, and comfort.

Tyvek® IsoClean® garments are available sterile and non-sterile in a wide variety of styles, such as coveralls, frocks, lab coats, hoods, gowns, bouffants, shoe and boot covers, and sleeve protectors.

For more information on Tyvek® IsoClean® garments, see page 19 of this catalog.

### Gowning for ISO 5 controlled environments—per IEST-RP-CC003

**Clean and sterile bouffant**  
Tyvek® IsoClean®  
IC729SWH000250CS

**Clean and sterile hood**  
Tyvek® IsoClean®  
IC668BWH000100CS

**Sterile face mask**  
Controlled environment  
ML7360WH0002500S

**Clean and sterile coverall**  
Tyvek® IsoClean®  
IC253BWHXX0025CS

Garments folded to facilitate aseptic donning

Bound seam garments offer better particle barrier than serged seams.

**Clean and sterile boot cover**  
Tyvek® IsoClean®  
IC458BWHXX0100CS

Elastic wrists and ankles are covered by garment materials so the elastic is not exposed.

Gripper™ soles offer a higher level of slip resistance than standard PVC soles.

### Gowning for ISO 7/8 controlled environments—per IEST-RP-CC003

**Bouffant**  
Tyvek® IsoClean®  
IC729SWH0002500B

**Frock with snaps**  
Tyvek® IsoClean®  
IC270BWHXX003000

**with zipper**  
Tyvek® IsoClean®  
IC264SWHXX00300B

**Shoe cover with Gripper™ sole**  
Tyvek® IsoClean®  
IC451SWHXX01000B

C	352,000	3,520,000
D	3,520,000	Not defined

# Gowning recommendations

Seam construction—even the best protective fabrics are useless without strong, tight seams.

## Serged or sewn

A seam produced when three threads are interlocked around the raw edges of two pieces of material for a strong, stress-resistant seam.

## Bound

Tightly sewn with a reinforced outer binding to increase seam strength and barrier. For potential misting exposure of non-hazardous liquids or particle penetration through the seam.

## Covered elastic

Elastic covered by garment material so elastic is not exposed.

## Taped

Both sewn and taped to provide strong chemical resistance against heavy liquid splashes and tough seam stress. A sewn seam is covered with a strip of compatible material by heat-sealing.

## DuPont™ SafeSPEC™—we're here to help

Our powerful web-based tool can assist you with finding the appropriate DuPont garments for chemical, controlled environment, thermal, and mechanical hazards.

[safespec.dupont.com](https://safespec.dupont.com)

## Certified Industrial Hygienist team

A DuPont Certified Industrial Hygienist can conduct a job hazard assessment to help you determine the best DuPont garment for a specific hazard.

# Garment processing and packaging options

## Sterile

### Clean-processed and sterile (option code CS)

Garments are specially processed to minimize particle shedding, then folded to aid in aseptic donning and individually packaged in an ISO Class 4 cleanroom. The case quantity is packaged in a cardboard case with two polyethylene liners. Sterility is achieved by gamma irradiation. Radiation dosage is validated in accordance with ISO 11137 for an SAL of  $10^{-6}$ .

### Sterile (option code OS or TS)

Garments available with the OS option code are folded to aid in aseptic donning and individually packaged. Garments available with the TS option code are folded and double-bagged individually. The case quantity is packaged in a cardboard case with two polyethylene liners.

Some sterile items are folded and individually packaged in an ISO Class 5 cleanroom (see garment data sheet). Sterility is achieved by gamma irradiation. Radiation dosage is validated in accordance with ISO 11137 for an SAL of  $10^{-6}$ .

Opaque sterile pouch packaging features a no-smear label.

## Non-sterile

### Clean-processed (option code OC)

Garments are specially processed to minimize particle shedding and individually packaged in an ISO Class 4 cleanroom. The case quantity is packaged in a cardboard case with two polyethylene liners.

### Individually packaged (option code PI)

Garments are individually packaged in an ISO Class 5 cleanroom. The case quantity is packaged in a cardboard case with two polyethylene liners.

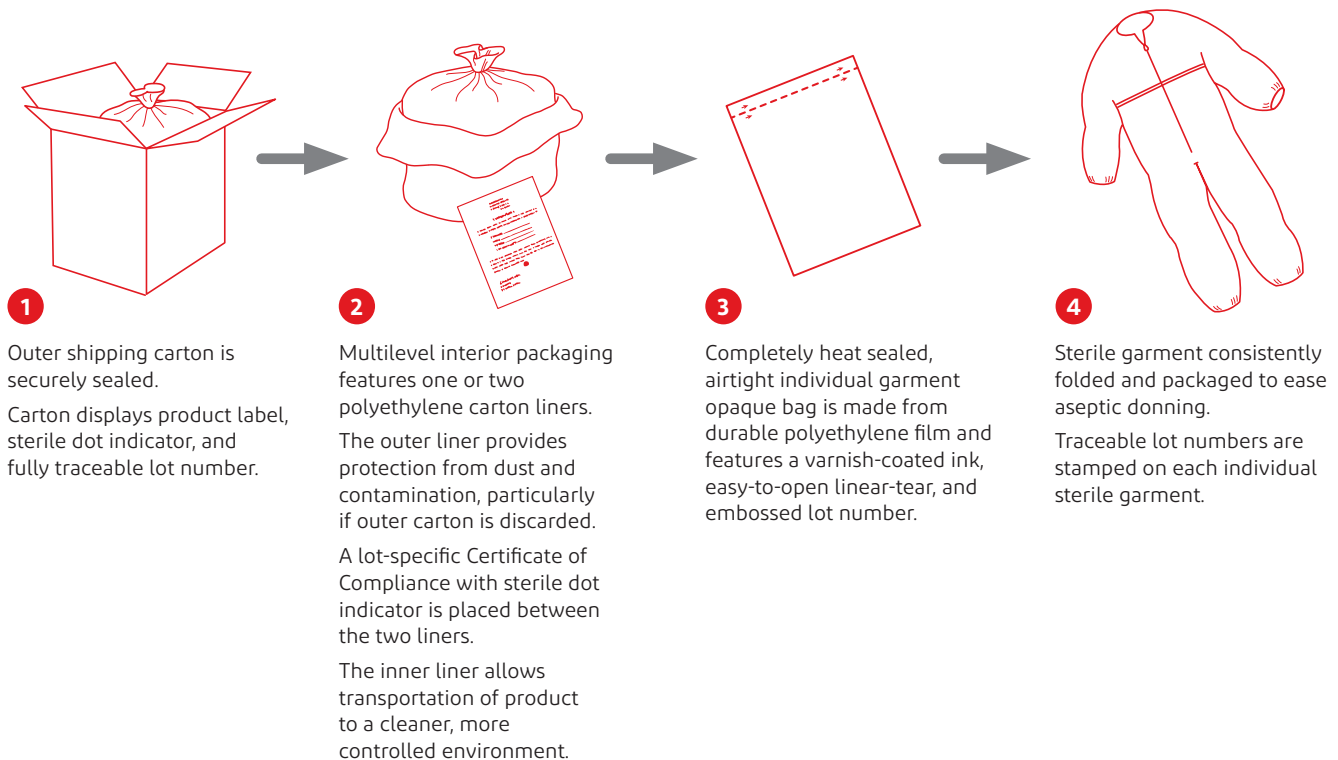

### Bulk (option code OB or OO)

Case quantities are packed in a cardboard case with two polyethylene liners. Tychem® garments are packed in a cardboard case with a single polyethylene liner.

### BH 50/bag MP Multipack

Note: Individual packaging for shoe and boot covers indicates that each pair has its own sealed bag. Masks and cuff tapes may have subgroupings of individually packaged items within the case.

## Sterile packaging process—Critical assurance sterile apparel multilevel packaging

# The DuPont CE garment portfolio

To help you select the right garments for your controlled environment, please select garment type, sterile or non-sterile, and your preference for either clean-processed, bulk or individually packaged.

## Tyvek® IsoClean®

Made from Tyvek® brand flashspun polyolefin protective material

Unique, patented flash-spinning process creates a barrier to dry particles, microorganisms, and non-hazardous liquids

Comfortable, lightweight, and durable

Garments available gamma sterilized to an SAL of  $10^{-6}$

Serged or bound seams with covered elastic options

Bound seam garments offer highest particle barrier within DuPont CE product portfolio

Traceability on all sterilized apparel

Gripper™ soles offer a higher level of slip resistance than standard PVC soles

**NOTE** Please substitute your size for XX when ordering.  
See page 7 for full part number description.

## Tyvek® IsoClean®

Made from Tyvek® brand flashspun polyolefin protective material

Unique, patented flash-spinning process creates a barrier to dry particles, microorganisms, and non-hazardous liquids

Comfortable, lightweight, and durable

Garments available gamma sterilized to an SAL of  $10^{-6}$

Serged or bound seams with covered elastic options

Bound seam garments offer highest particle barrier within DuPont CE product portfolio

Traceability on all sterilized apparel

Gripper™ soles offer a higher level of slip resistance than standard PVC soles

**NOTE** Please substitute your size for XX when ordering. See page 7 for full part number description.

## Tyvek® 800

Tyvek® 800 garments combine resistance to low-concentration, water-based, inorganic chemicals (even under pressure) with the durability of Tyvek® thanks to their innovative fabric technology and enhanced garment design

Chemical protective clothing, Category III, Type 3-B, 4-B, 5-B, and 6-B

Protection against infective agents (EN 14126), including resistance to penetration by blood and body fluids using synthetic blood (ISO 16603)

Suitable for applications such as industrial cleaning; chemical packaging and redistribution; waste treatment and disposal; environmental remediation and many others

Tyvek® 800 is white

PI = Packaged individually

### Coverall

## Tychem® 6000 FR

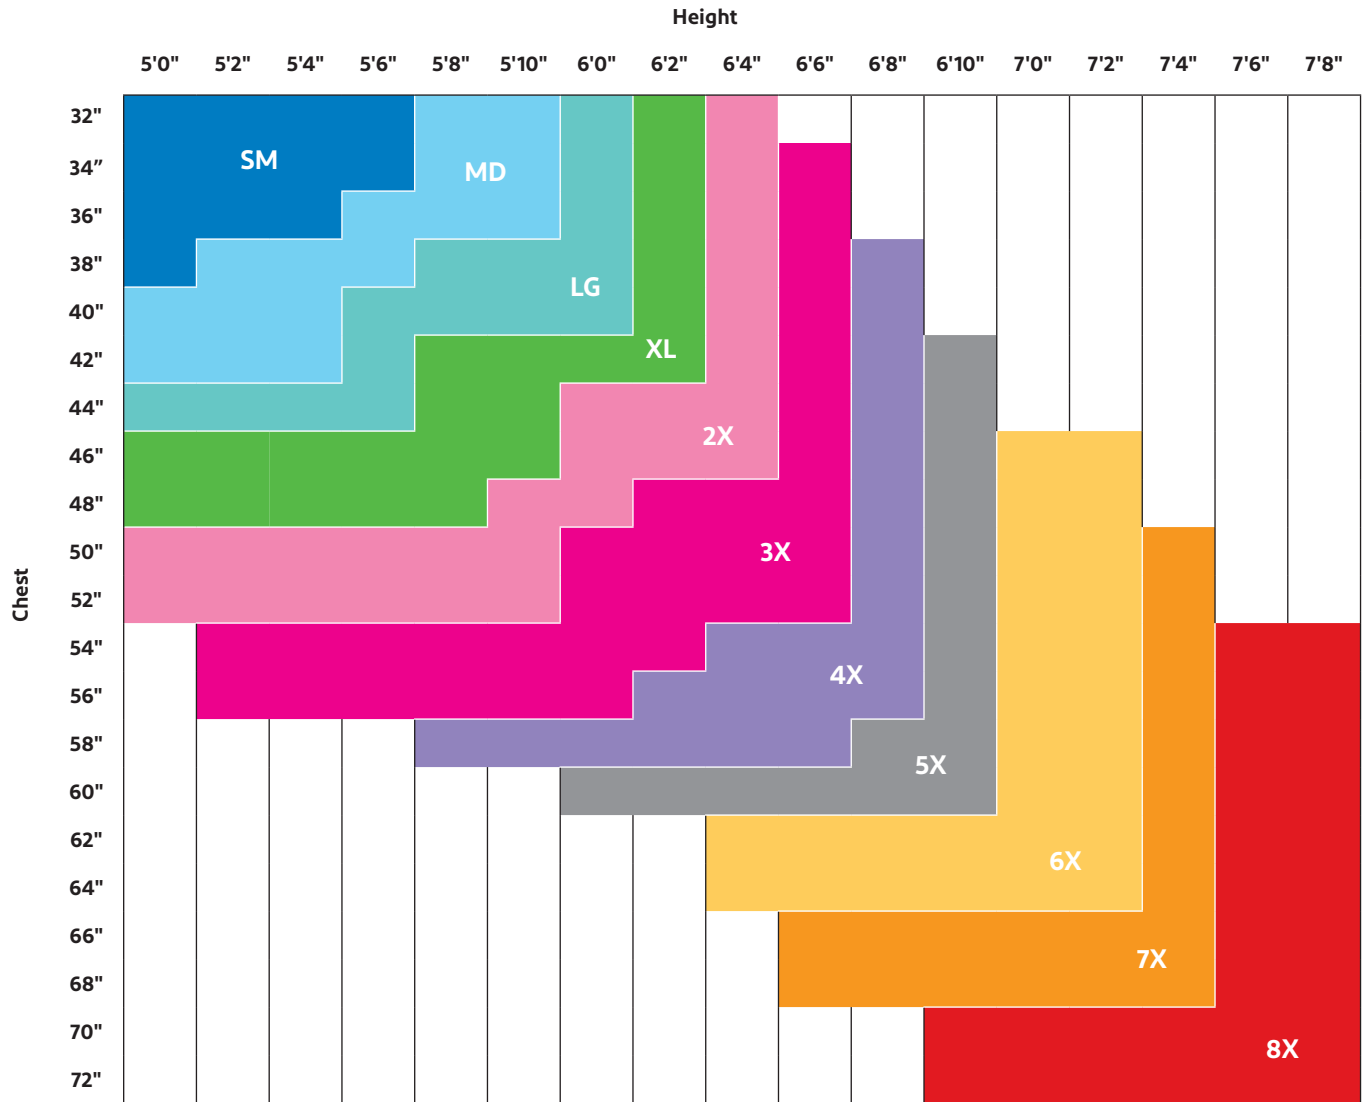

Provides triple hazard protection from chemicals, flash fire, and electric arc, combining the trusted chemical protection of Tychem® with the flame and arc flash protection of Nomex® into a single garment

Constructed for heavy use, yet lightweight and easy to wear

Tychem® 6000 FR provides at least 30 minutes of protection against >180 chemical challenges

# Sizing chart for DuPont Controlled Environments garments

Use this chart to determine what size garment is right for you.  
 Sizes are based on an individual's height and chest size.

Garment may shrink during cleaning process. Please use your best judgment to determine the most appropriate size to order based on this chart.

## Tyvek® IsoClean®

Made from Tyvek® brand flashspun polyolefin protective material

Unique, patented flash-spinning process creates a barrier to dry particles, microorganisms, and non-hazardous liquids

Comfortable, lightweight, and durable

Garments available gamma sterilized to an SAL of  $10^{-6}$

Serged or bound seams with covered elastic options

Bound seam garments offer highest particle barrier within DuPont CE product portfolio

Traceability on all sterilized apparel

Gripper™ soles offer a higher level of slip resistance than standard PVC soles

Tyvek® IsoClean® is white

Note: All sizes not available in all styles. For one size fits most use 00 in the part number.  
Seams and closures have less barrier than fabric.

# Tyvek® protective apparel recycling program

Tyvek® is proud to offer a garment recycling program that helps our customers within the continental United States manage used Tyvek® and IsoClean® protective apparel and reduce waste. The program includes setup, collection, transportation, storage, and recycling of garments.

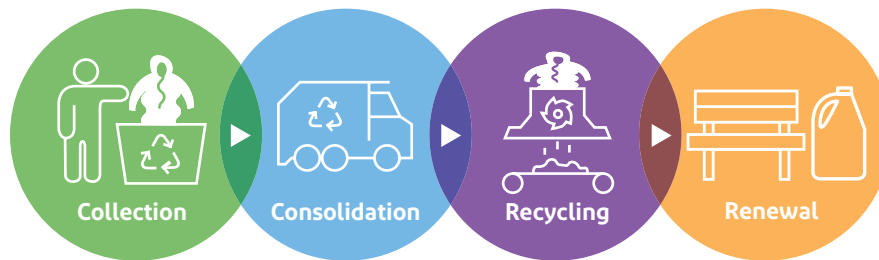

## Why recycle?

The Tyvek® protective apparel recycling program offers the chance to divert garments away from landfills and give them a second life in products like containers, lumber pallets, and park benches.

## Predicted savings

For every case of 25 Tyvek® coveralls that is recycled, 10 lbs. of Tyvek® are diverted from the waste stream and given a second life in products like pallets and park benches. DuPont offers this service for free to qualifying customers. On an annualized usage basis, the savings really add up.

## Recycling process

## DuPont sustainability

Sustainability is at the core of what we do—from reducing our operational footprint and creating market-facing sustainable solutions to addressing the global challenges of the future. This program is yet another example of the DuPont commitment to sustainability. The Tyvek® protective apparel recycling program is easy to participate in and is a cost-effective and responsible choice.

Help the environment

**Latex statement:** As of January 1, 2006, DuPont production specifications exclude use of components containing natural rubber latex in the manufacture of DuPont™ Tyvek® IsoClean®, Sierra™, and ProClean® garments.

Tyvek® 600 contains natural rubber latex which may cause allergic reactions in some sensitized individuals. Anyone who begins to exhibit an allergic response during the use of DuPont products should immediately cease using these products.

DuPont production specifications for Gripper™ PVC exclude use of latex. Notwithstanding, DuPont cannot guarantee the absence of latex in these shoe or boot covers.

Anyone who begins to exhibit allergic response during the use of DuPont products should immediately cease using these products. The incident should also be reported to DuPont at 1 800 441 3637.

**Silicone statement:** In the past, DuPont has found that threads and zippers can be the most significant source of silicone oil contamination in garments. DuPont specifies that threads and zippers used in Tyvek® IsoClean® and ProClean® garments be manufactured without the use of silicone oils. Notwithstanding, DuPont cannot guarantee the absence of silicone oils on these garments.

For end users with concerns about contamination with silicone oils or any other contaminants, the best practice is to audit inbound materials, including garments for those contaminants.

This information is based upon technical data that DuPont believes reliable. It is subject to revision as additional knowledge and experience are gained. DuPont makes no guarantee of results and assumes no obligation or liability in connection with this information. It is the user's responsibility to determine the level of toxicity and the proper personal protective equipment needed. The information set forth herein reflects laboratory performance of fabrics, not complete garments, under controlled conditions. It is intended for information use by persons having technical skill for evaluation under the specific end-use conditions, at their own discretion and risk.

Anyone intending to use this information should first verify that the garment selected is suitable for the intended use. In many cases, seams and closures may provide less barrier than the fabric. If the fabric becomes torn, abraded or punctured, end user should discontinue use of garment to avoid compromising the barrier protection. **Since conditions of use are outside our control, we make no warranties, expressed or implied, including without limitation, no warranties of merchantability or fitness for a particular use and assume no liability in connection with any use of this information.** This information is not intended as a license to operate under or a recommendation to infringe any patent, trademark or technical information of DuPont or others covering any material or its use.

**Warning:** Cleanroom apparel should not be used around heat, flames, sparks or in potentially flammable or explosive environments. Cleanroom fabrics should have slip-resistant materials on the outer sole of boots, shoe covers or other garment surfaces in conditions where slipping could occur.

**Warning:** ProShield® 10 should not be used around heat, flames, sparks or in potentially flammable or explosive environments. Garments made of ProShield® 10 fabric should have slip-resistant or anti-slip materials on the outer surface of boots, shoe covers or other garment surfaces in conditions where slipping could occur.

**Warning:** Tychem® should not be used around heat, flames, sparks or in potentially flammable or explosive environments. Only Tychem® 6000 FR, Tychem® 10000 FR and Tychem® 10000 styles 600T/601T (with aluminized outer suit) garments are designed and tested to help reduce injury during escape from a flash fire. Users of Tychem® 6000 FR, Tychem® 10000 FR and Tychem® 10000 styles 600T/601T (with aluminized outer suit) garments should not knowingly enter an explosive environment. Consult the Tychem® user manual, located on our website, for instructions on proper use, care, and maintenance of your Tychem® garments.

<sup>1</sup> **Respirator fit hoods** are designed with a longer zipper, extending to the chin for complete coverage of the neck area. **Standard hoods** only extend to the neck.

<sup>2</sup> Garments made of Tyvek® should have slip-resistant or anti-slip materials on the outer surface of boots, shoe covers or other garment surfaces in conditions where slipping could occur.

## Certified Industrial Hygienist team

A DuPont Certified Industrial Hygienist can conduct a job hazard assessment to help you determine the best DuPont garment for a specific hazard.
