

1/2-Inch Heavy-Duty Nut Driver

Fastening nuts on threaded rod can be a struggle due to the confined space and obstructions around the rod. Lateral movement is limited. On long sections of threaded rod, traditional nut drivers bottom out so you can only get the nut so far up the rod. Klein's Heavy-Duty Nut Driver features a through-handle, completely hollow shaft to allow for nutdriving on unlimited bolt lengths. Wrench assist provides greater torque while the magnetic tips will grab any nut appropriately.

Specifications

Application:	Nut Driving on Unlimited Bolt Lengths	Special Features:	Wrench Assist For Greater Torque
Nut Driver Sizes:	1/2"	Magnetic:	Yes
Shaft Length:	4" (10.2 cm)	Material:	Steel
Insulated:	No	Color Code:	Red
Overall Length:	9.391" (23.9 cm)	Weight:	8 oz (227 g)
