

ARE YOUR BAND SAWS OPTIMIZED FOR PEAK PERFORMANCE?

LENOX can help you improve band saw performance with process optimizations and high-quality blades that will keep you ahead of the competition.

LENOX 360™ connects, monitors and optimizes your band saws regardless of age, make or model. With real-time insights, you can monitor performance so you know when to replace your band saw blades before they wear out and weaken.

Optimize Production

Improve Decision Making

Maximize Efficiency

Cut Costs

GET REAL RESULTS USING REAL-TIME DATA

80%	of facilities do not track Overall Equipment Efficiency (OEE)
67%	of facilities report uptime below 75%

MSC Lenox Certified Weld Centers

By working closely with Lenox to test and audit band saw blade production, our teams of highly trained welders deliver excellence as they build high-quality blades for both standard and custom cutting operations.

Dedicated Welding Experts

Certified by Rigorous Requirements

Capacity for Custom Builds

TURN YOUR BAND SAW INTO YOUR COMPETITIVE EDGE

With tools and revolutionary digital solutions that can be customized to your operations, **LENOX** helps you continually optimize performance, improve productivity and lower costs.
