

DON'T LET FALLING OBJECTS IMPACT YOUR OPERATIONS

Far too many preventable injuries occur because of improper measures for fall prevention, which is consistently one of OSHA's top-cited standards.

With StanleyBlack&Decker Total Tool Solutions from MSC, you can get help making a complete fall protection plan that includes preventing objects and tools from falling in the first place. A team of experts can help you perform a tool audit to assess your potential risks and uncover problem areas.

50,000+

OSHA recorded incidents of "struck by falling object" every year

\$42,000

is the average cost of one incident

A 4.4-pound hammer dropped from 19 feet has roughly the same impact as a concrete mixer

A half-pound bolt dropped from 75 feet feels like getting hit with a 110-pound cement bag

A 2-ounce pen dropped from 230 feet has the potential to penetrate a hard hat
