

More Sustainable Packaging for a More Protected World

Ansell is committed to making all product packaging recyclable, reusable, or compostable by 2026. Critical to this plan is to reduce the amount of packaging and plastics used, and to seek innovative solutions for sustainability.

Packaging Initiatives

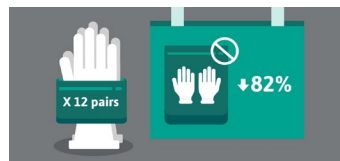

Managing Shippers & Shipping Volume

Ansell standardized shipper cases, reducing overall shipping volume by 3.5% and use of cardboard materials.

Plastic-Free HyFlex® Packaging

Ansell has introduced plastic-free packaging on select HyFlex® gloves, replacing the plastic packaging with a recyclable paper band.

Reduced Plastic Use in Chemical Glove Packaging

Selected AlphaTec® gloves will be packed in one polybag per 12 pairs, reducing the amount of plastic to handle and dispose of by 82%.

Disposable Glove Packaging Made with Recycled Paperboard

Ansell uses recyclable and at least 70%* recycled paperboard for its glove dispensers and cartons, minimizing extra packaging and printing.

“Everything we do begins – and ends- with safety, and to better protect people, we must also protect the world we live in.”

- Neil Salmon, Managing Director & CEO

* Packaging made from 100% recycled paperboard may be weaker and have poorer functional properties than packaging made with a combination of recycled paperboard and virgin fiber pulp
