PERFORMANCE UNDER PRESSURE

Since we introduced press tools to America over a decade ago, we haven't stopped working. Today, we manufacture the most proven press tools in the industry, trusted by more plumbers and mechanical contractors than any other brand in North America. High-stakes jobs, big-money projects — you name it, RIDGID is the industry standard.

"The time savings of the RIDGID Press Tool is incredible. That coupled with no leaks, unlike the 1-3% we used to get with soldering, has significantly increased our productivity."

Larry Lee – Lee Plumbing & Heating

"We have installed over 100,000 fittings to date without a single leak. That's consistent!"

Mike Haggerty – Haggerty & Company

"RIDGID is the best investment I have made in the past 5 years. It has paid for itself job after job."

Rick Williams – Aquanaut Plumbing

SPEED

Speeds installation time with connections completed in as little as 5 seconds. Compare that to the time spent deburring a fitting, cleaning, fluxing and soldering a single joint. The more joints you press, the more time you save.

RELIABILITY

Consistent jaw pressure ensures liquid and gas-tight connections every time. That means reduced fitting rework after pressure testing.

MEASURABLE RESULTS

- Time savings = higher profits
- The flameless system eliminates the need for a burn permit or fire watches.
- Press connections can be made on a wet system.
- By eliminating the mess from flux and solder, you end up with a clean, professional installation.
