## WE ARE SHOWA®

SHOWA® is a fully integrated manufacturer. We fully control our industrial ecosystem by creating our own machinery, yarns, coatings, polymers, designs, and hand formers. We control every step of our process, every step of the way – for 100% quality control at every level. SHOWA® makes protective gloves for all industries and applications requiring high quality hand protection.

Our hand protection solutions are grouped into five major product families or clusters:

# PROTECTION AND PRESERVATION IN ONE

Sustainability isn't just a commitment - it's part of SHOWA's legacy. Our revolutionary Eco Best Technology® offers the solution that makes a difference to the environment, without any compromise on protection and performance.

HOW DOES EBT™ WORK?

## SAME GLOVE, BETTER FOR THE PLANET.

SHOWA's revolutionary Eco Best Technology® makes a difference to the environment, without any compromise in protection and performance. Launched in 2012,

our biodegradable nitrile gloves are the industry's first, and today, SHOWA® offers the most extensive selection of biodegradable hand protection in the market.

**Proof of Eco-Friendly Claims** GreenCircle certification is proof that a company's eco-friendly product, operations, and multi-attribute claims have been verified as legitimate. Certification is indicated by the blue and green GreenCircle Certified mark.

## ECO BEST TECHNOLOGY®

Our Eco Best Technology® EBT™ is the breakthrough innovation that gave rise to the world's first biodegradable nitrile glove.

**EBT™ is composed of organic materials that accelerate the biodegradation of nitrile in biologically active landfills.**

We do all that we can to make a positive impact within our company, through our products and for our planet, always seeking better ways to meet the demands of today without compromising tomorrow.

This is why a large proportion of our research is devoted to biodegradable products and to developing fibers that have no impact on the environment. Our

efforts to reuse and conserve resources in Japan have enabled us to obtain the ISO 14001 certification - a global standard in environmental management that helps us to continually improve our operations.

Eco Best Technology® accelerates the biodegradation of nitrile in biologically active landfills and anaerobic digesters as validated by independent

certified laboratories using internationally recognized test methods. EBT™ is composed of organic materials designed to make our biodegradable products attractive to microbial activity. These microorganisms upon consuming the EBT™ material excrete enzymes that depolymerize the nitrile. The final result is biogases and inert humus.

# CHEMICAL PROTECTION

SHOWA® has an extensive portfolio of chemical hand protection ranging from Type A to Type C.

Chemrest makes navigating the challenges of chemical resistant hand protection easier for safety professionals by providing an entire portfolio of products, resources and tools in one platform.

## THE DANGERS OF CHEMICALS AT WORK

Chemicals and abrasive solvents are used by billions of people globally. In fact, there are more than 350,000 chemicals & chemical mixtures in the world, registered for commercial production and use (Environ. Sci. Technol. 2020). Workers who are in contact with chemicals, hazardous substances and gases - even simple cleaning detergents - are putting their hands at risk.

While chemical injuries occur more frequently in occupations where chemicals are manufactured, they also happen in other high-risk industries such as mining, painting, construction, oil & gas, healthcare, warehousing, transportation, agriculture and welding. Some chemical injuries happen when workers are (unintentionally) exposed to seemingly non-harmful solutions or gases over long periods of time.

## COMPLICATIONS FROM CHEMICAL BURNS

Patients with chemical burns can go on to suffer the following complications:

## OUR ACTIONS FOR SUSTAINABILITY

When we released our first biodegradable single-use glove 12 years ago, we considered it as the first step in our efforts towards sustainability. As we are extending our EBT™ (biodegradable technology) glove range, our offices and factories are running projects to reduce their carbon footprint. At our headquarters in Himeji, or in our factory in Malaysia, or even through our retail products in Japan, we are getting closer to sustainability. And this is only the beginning.

# SHOWA 383

BIODEGRADABLE  
MULTI-PURPOSE PROTECTION  
MADE WITH  
ECO BEST TECHNOLOGY®

## NATURALLY THE BEST, JUST GOT GREENER.

### PROTECTION. PERFORMANCE. PLANET.

The world's first sustainable general-purpose glove preserves the planet without compromising on performance or protection. Featuring our revolutionary Eco Best Technology®, the SHOWA® 383 takes 1-5 years to biodegrade in an active landfill, compared to more than 100 years for other, non-sustainable options.

The 383 is your earth-friendly choice in protection and preservation.

# SINGLE USE

SHOWA® is the first to manufacture biodegradable single use nitrile and accelerator-free nitrile hand protection. We offer a variety of different styles, thicknesses, and lengths, suitable for environments such as industrial automotive, chemical, as well as the option of accelerator-free.

## SHOWA® SINGLE USE RANGE

Combining years of expertise and market insight, SHOWA® introduces the most comprehensive biodegradable nitrile solution. The range offers a broad choice of single use gloves, composed of 9 different styles from XS to XXL sizes, suitable for laboratory, pharmaceutical, food industry, automotive and harmful chemical usage and in compliance with all CE standards.

THE SINGLE USE RANGE IS DESIGNED TO FEATURE ALL THE FOLLOWING PHYSICAL PROPERTIES AND BENEFITS:

KEY FEATURES & PHYSICAL PROPERTIES

- Nitrile and powder-free
- Elongation > 500%
- Biodegradable raw material

COMFORT & PERFORMANCES

- High chemical performance against permeation and degradation
- Second skin feel, softer texture
- Low-modulus formulation to improve fit and reduce fatigue
- Textured finish on fingertips to enhance grip

As the original inventor of the world's first single use nitrile glove in 1991, SHOWA® has continued over the last three decades to bring further innovation to single use nitrile. We analyzed trends and growth drivers to become more competitive by offering the broadest lines of superior quality single use gloves and comprehensive solutions, complying with market requirements:

- Free of powder and natural rubber
  - Easy donning and doffing
  - Chemical resistant
  - Multiple choice colors and thicknesses
- High tensile strength
  - Safe for workers' skin
  - Comfort in use and high sensitivity
  - Ergonomic fit
  - Durable and cost-effective glove
  - Accelerator-free

To us, sustainability isn't just a commitment, it's part of our legacy. We launched the first biodegradable single-use glove in 2012 as the first step in our sustainability journey: a way to reduce the impact that gloves have on the environment. This strategy remains our primary focus as we expand Eco Best Technology® into every color and inch thickness within our product offering, including reusable gloves. This way we can meet the demands of today, without compromising for tomorrow.

Today you can choose from a wide range of gloves with **Eco Best Technology®**, that meets a specific application need.

# OVER A DECADE OF SUSTAINABILITY WITH OUR BIODEGRADABLE GLOVES

As we acknowledged the increase of the single-use glove, the urge of working on a more sustainable product was inevitable.

In 2012, SHOWA® launched the first glove with EBT™ (Eco Best Technology®). This proprietary technology makes our nitrile glove biodegradable. Before production, we add EBT™ material to the nitrile. After use, and in a controlled environment, when the glove is disposed, it can achieve 82% of biodegradability in 386 days, due to microorganisms feeding on the glove.

For us, for you and the planet, it makes a big difference. In the time span of 5 years our glove is fully biodegraded whereas a 100% nitrile glove without this technology will take over 100 years to achieve the same result.

## BIODEGRADABLE NITRILE

### SHOWA® 7502PF

Nitrile, powder-free, blue, lightweight, 2.5-mil, textured fingertips, 9.5-inch, with Eco Best Technology®

# SHOWA® 9700PF ACHIEVING SUSTAINABILITY IS IN YOUR HANDS

100% Nitrile,  
Disposable Glove  
Powder-Free,  
6-mil, 11-inch,  
with Eco Best  
Technology®

**EBT™**

Engineered with SHOWA's revolutionary  
**Eco Best Technology® (EBT™)**, the SHOWA® 9700PF  
disposable glove is biodegradable, achieving 82%  
biodegradation in 386 days in a laboratory.

A rolled cuff prevents dirt from entering, and  
the powder and latex-free design reduces risk of  
discomfort and allergies.

32566358	9905PF	8-9/L	11"
33756214	9905PF	9-10/XL	11"

**PACKAGING:** 50 gloves per dispenser.  
20 dispensers per case.

### SHOWA® 8005PF

Nitrile, powder-free, blue,  
lightweight, 8-mil, textured  
fingertips, 9.5-inch, with  
Eco Best Technology®

#### BENEFITS

- Low modulus nitrile
- Biodegradable
- Easy donning and doffing
- Natural rubber free
- Silicone free

#### FEATURES

Liner: **Unlined**  
Coating: **Nitrile**  
Thickness: **8 mil**  
Grip: **Textured fingertips**  
**Eco Best Technology®**  
**Rolled Cuff**  
**+FDA 21 CFR 177.2600**

#### APPLICATIONS

- Chemical handling
- Biotechnology
- Pet Food production
- Washing and cleaning
- Laboratory, Pharma & Analysis

# GLOVE SIZE CHART

It is crucial to get the glove size right for maximum dexterity.

Here are a few recommendations to help you in finding the right size of gloves you need.

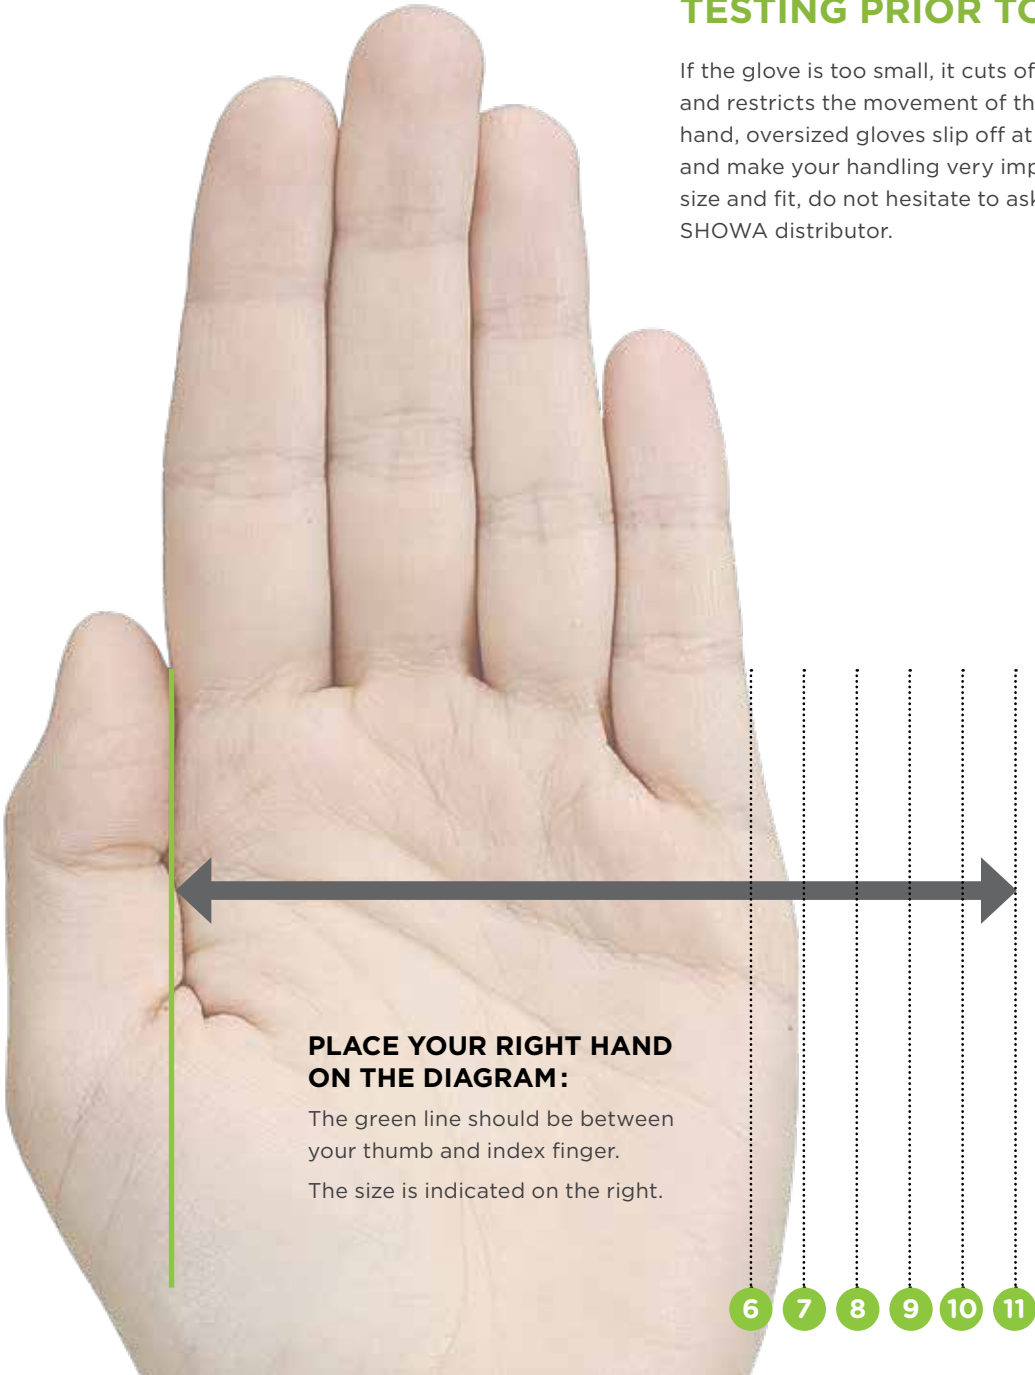

Glove size further to EN 420	Hand (mm)		Glove (mm)
	Palm circumference	Length	Minimum length
6	152	160	220
7	178	171	230
8	203	182	240
9	229	192	250
10	254	204	260
11	279	215	270

## COLOR-CODED CUFF

Some styles of SHOWA® gloves have a color-coded cuff. These cuffs enable the size recognition in the factory and the pairing after washing the gloves.

## TESTING PRIOR TO USING

If the glove is too small, it cuts off the blood circulation and restricts the movement of the hand. On the other hand, oversized gloves slip off at the slightest movement and make your handling very imprecise. To be sure of your size and fit, do not hesitate to ask for samples from your SHOWA distributor.

**PLACE YOUR RIGHT HAND ON THE DIAGRAM:**

The green line should be between your thumb and index finger.

The size is indicated on the right.
