

CUSTOMER	PROTOTYPING AND MANUFACTURING SOLUTION PROVIDER*
INDUSTRY	SERVES MULTIPLE END MARKETS
SOLUTION	MSC MILLMAX®

Founded in 2005, this company provides solutions to prototyping and manufacturing from quoting, design, research and development to full scale production. They are a registered manufacturer for the Federal Government and serve an array of industries including marine, automotive, electrical and energy.

Like many manufacturers, they are challenged with the need to increase capacity and productivity and needed expert guidance from a trusted advisor.

Cut time to finish 3 operations by 66%

50 vs. 3

Reduced machine clean-up after every 3 parts to after 50 parts

GO AGAIN

"I'm impressed with the attention and support we got from your team. Everything they said was absolutely correct. No tool breakage, no vibrations, no squealing and nothing is getting caught up. There was no guessing. They told me my sweet spots and where I needed to be. They were spot on, incredible."
