

DRAWER

The Drawer unit provides unsurpassed floor space efficiency – up to 180 different SKUs can be independently managed in a 30" x 20" footprint.

This solution's multi-drawer, configurable design features progressively opening drawers, set up in pods that can be configured in a variety of formats for managing all item types. All while providing absolute security over your items. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

Ideal for

High value production needs, including carbide indexable inserts and round cutting tools, offering high storage capacity with minimal footprint: holds twice the number of SKUs in half the space of a coil machine.

Features

- Multi-drawer design:
 - Configures to your inventory
 - Progressive drawer technology opens a drawer just enough to dispense the needed quantity
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit
