

LOCKER

This advanced locker unit provides secure organization with inventory visibility behind plexi glass doors and LED lighting. The locker unit provides accommodations for a range of items, including small, large, or heavy items. It is available in three configurations: all small lockers; all medium lockers; or, a combination of nine small, six medium and three large lockers.

Combined with our software, this unit provides the capability to track non-consumables such as valuable measuring instruments and power tools that can be charged in place. Our weighted lockers provide quick access to small items such as abrasives and welding tools with a grab and go experience without sacrificing traceability. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

Ideal for

Accommodating a range of products including PPE, large or heavy items, measuring instruments and power tools for traceability. Our weighted system can be added to manage smaller items, such as abrasive discs and welding tips, in large quantities for a grab and go experience.

Features

- Available with a weighted locker system for faster transaction times; only available with S2 and S4 models
- Each locker capable of holding up to 165 lbs.
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit
